Subject: Case 13 0990 EL BGN

This is pertaining to case #13-0990-EL-BGN

Attn: I am totally against having 25 Wind turbines in Greenwich Twp and very near the Town of Greenwich: I know from personnel experience from closed friends in Illinois and Kansas; that they very much high noise, much vibrations, and infrasound; these can cause many high case health conditions to people that live in this area. very serious conditions that could last a lifetime, will cause high sleep disturbance, head aches, ringing in ears, ear pressure, dizziness, blurring vision ,vertigo, problems with concentration and memory, irritability.

This would ruin the lives of the people including myself that live in the area, I have serous health problems, nerve problems, and this would make it alot worse for me and many other i know that live in this area,

Please do not let this happen or go through., Please stop it.
