

August 27, 2014

Mrs. Barcy McNeal Commission Secretary The Public Utilities Commission of Ohio 180 East Broad Street Columbus, OH 43215

Re: Case No. 07-464-TP-UNC Case No. 90-5032-TP-TRF

Dear Mrs. McNeal:

On August 11, 2014, tariff pages for the Ameritech Operating Companies were filed with the Federal Communications Commission under Transmittal No. 1812. This filing in the FCC No. 2 Tariff became effective on August 26, 2014.

This was a clean-up filing intended to correct punctuation and grammar; update section references; remove expired USOCs; and remove references to FGC, which was previously sunset.

These tariff pages can also be viewed on the FCC website at http://svartifoss2.fcc.gov. Once you have accessed the page, please follow the following steps to access this filing:

- 1. Click on FCC Electronic Filing and Public Access Systems.
- 2. Click on Electronic Tariff Filing System (ETFS).
- 3. Click on Public Access.
- 4. Click on the Browse Filed Tariff Documents block.
- 5. Click on the Browse Filed by an ILEC block.
- 6. Click on Ameritech Services.
- 7. Click on FCC 2 Access Services.
- 8. Locate tariff pages for Transmittal No. 1812 and click on the block showing "Acrobat PDF" (third column from the left).

This process will provide you with the specific pages filed for Ohio.

Should you have any questions or require additional information, please contact me at (216) 822-0086.

Very truly yours,

Director, Regulatory

1st Maryann Mackey

Patrick Doherty
Director – Access Regulatory Affairs
Four AT&T Plaza
Room 1921
Dallas, Texas 75202

This filing is being made on a streamlined basis on 15 days notice under Section 204(a) (3) of the Communications Act.

FRN: 0020-5728-30

August 11, 2014

Transmittal No. 1812

Ms. Marlene H. Dortch Secretary Federal Communications Commission Washington, D.C. 20554

Attention: Wireline Competition Bureau

The accompanying tariff material, issued by the Ameritech Operating Companies (Ameritech) and bearing Tariff F.C.C. No. 2, is sent to you for filing in compliance with the requirements of the Communications Act of 1934, as amended.

This filing, scheduled to become effective August 26, 2014, consists of the tariff pages as indicated on the following Check Sheets:

Tariff F.C.C. No.	Check Sheet Revision No.
2	1638th Revised Page 1
	332nd Revised Page 1.2
	248th Revised page 1.4
	237th Revised page 1.5
	205th Revised page 1.6
	147th Revised page 1.7
	157th Revised page 1.9
	28th Revised page 1.14

With this filing, Ameritech is proposing a clean-up filing to correct punctuation and grammar; update section references, remove expired USOCs; and remove references to FGC, which was previously sunset.

In accordance with Section 61.14, this transmittal letter and associated attachments are being filed electronically today via the Federal Communications Commission's Electronic Tariff Filing System (ETFS) in compliance with the electronic filing procedures.

Wireline Competition Bureau Page 2 August 11, 2014

Payment in the amount of \$910.00 has been electronically transmitted to the US Bank in St. Louis, Missouri, in accordance with the fee program procedures. The Form 159 is being transmitted electronically via ETFS as a proprietary document. These actions have been committed on the date established as the issued (filed) date as reflected above.

Personal or facsimile service petitions against this Transmittal, as required under Section 1.773(a)(4) of the Commission's Rules, should be sent to Scott Murray, Area Manager – Rates/Tariffs, 311 S. Akard St., Room 1940.04, Dallas, TX 75202, facsimile number (214) 464-2006. All other correspondence and inquiries concerning this Transmittal should be addressed to Debra L. Clemens, Director-Federal Regulatory, (202) 457-3066, 1120 20th Street, N.W., Suite 1000, Washington, D.C. 20036.

Sincerely,

Attachments:

Tariff Pages

ACCESS SERVICE

- 5. Ordering Options for Switched and Special Access Service (Cont'd)
 - 5.2 Access Order (Cont'd)
 - 5.2.5 Minimum Period (Cont'd)
 - (B) The minimum period for part-time Video and Program Audio Special Access Services is one day even though the service will be provided only for the duration of the event specified on the order (e.g., one-half hour, two hours, five hours, etc.).
 - (C) Service Rearrangements as set forth in Sections 6.8.2(C)(5), 7.4.2(C)(5) and (T) 7.4.2(C)(6) for Switched Access, Special Access and Specialized Network Services (T) respectively, may be made without a change in minimum period requirements.

The changes listed below will cause a new minimum period to be established.

- (1) A change of customer of record (i.e., Access Service is provided to and billed to a different entity), unless the new customer assumes liability for both current and prior charges for the service.
- (2) A change in customer premises or customer's end user's premises
- (3) A change in type of service (i.e., Switched Access to Special Access, one type of Special Access to another, or one type of Switched Access Feature Group to another except as set forth in Section 6.7.5)
- (4) A change in Local Distribution Channel (number or type) in Special Access (Section 7)
- (5) A change in Interface Group in Switched Access or Directory Assistance Service (Sections 6 and 9)
- (6) A change in traffic type
- (7) A change from two point to multipoint Special Access Service or from multipoint to two-point Special Access Service
- (D) The minimum period for Special Access Services provided on an Individual Case Basis (ICB) and for Specialized Services Arrangement is as specified in the ICB filing.

^{**} For each LT-O trunk port, the customer will be assessed a rate equal to 1/24th the LT-1 rate.

ACCESS SERVICE

7. Special Access Service (Cont'd)

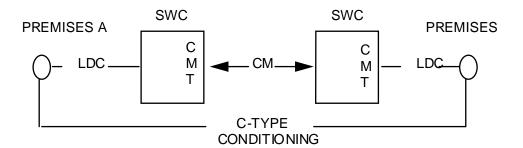

7.1 General (Cont'd)

7.1.3 Service Configurations (Cont'd)

(A) Two-Point Service (Cont'd)

In addition, a Special Access Surcharge as set forth in Section 7.4.3 and a Message (T) Station Equipment Recovery charge as set forth in Section 7.4.4 may be applicable. (T)

The following diagram depicts a two-point Direct Analog Service connecting two customer designated premises located 15 miles apart. The service is provided with C-Type conditioning.

Idc - local distribution channel
 CMT - mileage termination
 cm - channel mileage
 swc - serving wire center

Applicable rate elements are:

- -Local Distribution Channel (two applicable)
- -Channel Mileage Termination (two applicable)
- -Channel Mileage (15 miles)
- -C-Type Conditioning Optional Feature (two applicable)

(T)

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.3 Service Configurations (Cont'd)

(B) Multipoint Service

Multipoint service connects three or more customer designated premises through a Telephone Company Hub. There is no limitation on the number of mid-links available with multipoint service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded. A mid-link is a channel between Hubs (i.e., bridging locations). Only certain types of Special Access Service are provided as multipoint service. These are so designated in the Service Descriptions set forth in Section 7.2.

Multipoint service utilizing a customized technical specifications package as set forth in Section 7.2 will be provided when technically possible. If the Telephone Company (T) determines that the requested characteristics for a multipoint service are not compatible, the customer will be advised and given the opportunity to change the order.

When ordering, the customer will specify the desired bridging Hub(s) selected from the NECA Tariff FCC. NO. 4. This tariff identifies the type(s) of bridging functions which are available and the serving wire centers where they are available. (T)

Applicable Rate Elements are:

- Local Distribution Channels (one per customer designated premises)
- Channel Mileage Termination (one per end of Channel Mileage)
- Channel Mileage (as applicable between each designated customer premises and the Hub and between Hubs.)
- Bridging
- Additional Optional Features (when applicable).

In addition, the Special Access Surcharge as set forth in Section 7.4.3 and a Message (T) Station Equipment Recovery Charge as set forth in Section 7.4.4 may be applicable. (T)

ACCESS SERVICE

- 7. Special Access Service (Cont'd)
 - 7.2 Service Description (Cont'd)
 - 7.2.9 Base Rate Services, DS1 Service and DS3 Service (Cont'd)
 - (B) Channel Configuration (Cont'd)
 - (5) Network Reconfiguration Service (NRS) (Cont'd)
 - (B) Service Description

Network Reconfiguration Service gives customers the ability to reconfigure their networks via cross-connections of their DS3, DS1 and Base Rate Service channels which are identified in a customer specific network database. The NRS system location provides an interface at the DS3 (44.736 Mbps), DS1 (1.544 Mbps) and Base Rate (2.4 - 64 Kbps) levels. The customer may specify cross-connections at the DS3, channelized DS3, DS1, channelized DS1, or Base Rate level.

Customer access to NRS may be made directly by the customer utilizing customer provided terminal equipment on the customer's premises in conjunction with a Dedicated Network Access Link or dial-in line. Access is also available through a Telephone Company attendant reached by a dial access telephone line.

NRS will give the customer the ability to make changes in the individual channel segments of their network. Customers may reconfigure DS3, DS1 or Base Rate or DS1 service. Customers may also reconfigure Direct Analog channels that are channels of a reconfirgurable channelized DS1 service. To utilize this capability, customers must order appropriate DS1 multiplexing in addition to the ANRS Terminations at the DS1 level and the NRS service.

NRS will be available on a continuous basis except for the performance of scheduled preventative and routine maintenance or scheduled software updates. The customer will be notified at least 24 hours in advance of any scheduled service interruptions.

(T)

NRS system locations are found in NECA Tariff FCC No. 4.

ACCESS SERVICE

- 7. Special Access Service (Cont'd)
 - 7.2 Service Descriptions (Cont'd)
 - 7.2.12 SONET Xpress Service(1)
 - A. Basic Service Description

SONET Xpress service is a shared ring service which provides high performance and reliability parameters with the level of survivability designed to limit a single event from interrupting service. It provides route, central office equipment, and signal payload protection for point-to-point DS1 and DS3 channels provisioned on the shared ring. No additional optional features are required for this level of protection. It provides flat rate transport across the network of DS1, DS3, OC-3 and OC-12 (VT1.5 and STS-1) channels. SONET Xpress utilizes SONET facilities and is available only in buildings and wire centers (SONET Xpress Network) where the Telephone Company has established shared rings.

For locations where SONET Xpress is not yet available Special Construction charges may apply. Expansion of service areas by means of Special Construction will only be allowed in designated areas consistent with the Telephone Company's construction program. The construction program is anticipated to include Chicago, Illinois; Detroit, Michigan; Columbus, Ohio; Cleveland, Ohio; Indianapolis, Indiana and Milwaukee, Wisconsin, to be completed by approximately the year 2005. SONET Xpress service areas are designated in NECA Tariff FCC No. 4.

(T)

SONET Xpress service must be specifically ordered even if a customer premises or serving wire center is located in the designated SONET Xpress serving area.

SONET Xpress will provide 50 millisecond protection switching to assure 100 percent availability of the end to end services within the network. When a customer's end to end service utilizes both the SONET Xpress network and non SONET Xpress network, the non SONET Xpress network portion will have the appropriate service guarantees as specified in Section 2.4.4.

(D)

SONET Xpress Service is excluded from any application of Shared Use provisions as described in Section 7.4.9.

(T)

- B. Channel Configuration
 - (1) Network Access Connection (NAC)

The Network Access Connection provides SONET based access to the SONET Xpress shared transport network. NACs are available with:

- A) Electrical 1.544 Mbps (DS1) interface
- B) Electrical 44.736 Mbps (DS3) interface
- C) Optical 622.08 Mbps (OC-12) interface

The NAC is applicable when the customer's premises is located in a building on the SONET Xpress network.

(1) Effective February 16, 2012, SONET Xpress is available only to existing Customers, for existing service arrangements. Existing Customers may continue to receive service under existing service arrangements, or on a month-to-month basis after their existing service arrangements expire, until SONET Xpress is discontinued.

(This page filed under Transmittal No. 1812)

7. Special Access Service (Cont'd)

7.4 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for Special Access Service.

7.4.1 Rate Zones

Rate zones are applicable to DS1 (1.544 Mbps) and DS3 (44.736 Mbps) services described in this section, and Special Facilities Routing Arrangements for these services as described in Section 11. Each Telephone Company Wire Center, under an Optional Payment Plan term, has been assigned to a rate zone. To determine the rate zone wire center assignments use the following:

(D)

 For DS1 and DS3 services subscribed to prior to November 18, 2000, the wire center rate zone assignments can be found in Section 7.7.

(D)

 For DS1 and DS3 services subscribed to on or after November 18, 2000, the wire center rate zone assignments included in NECA Tariff FCC No. 4 are assigned to rate zones 1, 2, 3, 4, and 5. All other telephone company offices are assigned to zone 5.

(T)

In addition, Local Distribution Channel, Channel Mileage and Channel Mileage Termination rates are dependent upon the zone assignment of the Service Wire Center. Channel Mileage and Channel Mileage Termination that is computed between wire centers in different rate zones will be assessed the rates in the higher priced rate zone. Multiplexing rates will be determined by the location of the multiplexing arrangement.

7.4.2 Types of Rates and Charges

There are three types of rates and charges. These are monthly rates, daily rates and nonrecurring charges. The rates and charges are described as follows:

(A) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

(T)

(T)

ACCESS SERVICE

7. Special Access Service (cont'd)

7.4 Rate Regulations (cont'd)

7.4.3 Surcharge for Special Access Service (cont'd)

- (E) Application of Rates (cont'd)
 - (2) In the case of multipoint Special Access Service, one Special Access Surcharge will apply for each termination at a customer designated premises except that no surcharge applies at the customer designated premises at which the Access Service is connected to Interstate Service.
 - (3) The Telephone Company will bill the surcharge to the customer who orders the Special Access Service unless the Service is exempt as set forth in Section 7.4.3(B).

7.4.4 Message Station Equipment Recovery Charge

The Message Station Equipment Recovery Charge is a charge to recover that portion of message station equipment that is assigned to Special Access Service.

Pursuant to CC Docket 83-1145 Memorandum Opinion and Order adopted by the Federal Communications Commission on November 8, 1984, and released on November 9, 1984, this charge is assessed only to those customers to which the Special Access Surcharge applies. The rate for the Message Station Equipment Recovery Charge is set forth in Section 7.5.13.

(This page filed under Transmittal No. 1812)

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.6 Moves (Cont'd)

(B) Moves To a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new services. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

7.4.7 Mileage Measurement

The mileage to be used to determine the monthly rate for the Channel Mileage is calculated on the airline distance between the locations involved, i.e., the serving wire centers associated with two customer designated premises, the serving wire center associated with a customer designated premises and an international boundary point, a serving wire center associated with a customer designated premises and a Telephone Company Hub, a serving wire center associated with a customer designated premises and a WATS Serving Office. The serving wire center associated with a customer designated premises is the serving wire center from which the customer designated premises would normally obtain dial tone.

The Vertical and Horizontal (V&H) coordinates method is used to determine mileage. This method is set forth in NECA Tariff FCC. No. 4. When the calculation results in a fraction of a mile, always round up to the next whole mile before applying the rate.

(T)

When Hubs are involved, mileage is computed and rates applied separately for each section of the Channel Mileage, i.e., customer designated premises serving wire center to Hub, Hub to Hub and/or Hub to customer designated premises serving wire center. However, when any service is routed through a Hub for purposes other than customer specified bridging or multiplexing (e.g., The Telephone Company chooses to so route for test access purposes), rates will be applied only to the distance calculated between the serving wire centers associated with the customer designated premises.

When the mileage measurement is to an international boundary point, one Channel Mileage Termination charge applies in addition to the per mile rate (Use USOC 1L5BX in lieu of 1l5xx).

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.11 Fiber Hubs for DS1 or DS3 Services

A customer has the option of ordering DS3, DS1 (excluding DS1 - 128.0, 256.0, 384.0, 512.0 and 768.0 Kbps transport) Base Rate or Direct Analog services to terminate in a Fiber Hub for cross-connection to another service of the same speed. Fiber Hub locations are specified in NECA Tariff FCC No. 4.

(T)

When a customer orders a service terminating in a Fiber Hub, the service is installed, and service parameters are measured from the customer designated premises to the Fiber Hub. When this service is subsequently cross-connected to another service, the two cross-connected services are treated separately for service performance measurement and service interruption credit purposes. For example, if Customer A cross-connects to Customer B's service at a Fiber Hub, and Customer B's service is subsequently interrupted, the Telephone Company will credit only Customer B for the service interruption.

DS1 channels from two multiplexed DS3 services may be cross-connected at the Fiber Hub. The customer must provide the DS3 system and channel assignment information for the DS1 channels.

- 7. Special Access Service (Cont'd)
 - 7.5 Rates and Charges (Cont'd)
 - 7.5.16 Optional Payment Plan Vintage Rates

A. General Regulations

Optional Payment Plan (OPP) vintage rates are those rates that apply to existing services provided under an OPP term in the event the Telephone Company initiates a rate increase. Vintage rates as set forth following are classified as vintage because the Telephone Company ensures that rates provided under an OPP term will not be increased by the Telephone Company above the OPP rate in effect at the beginning of the customer's OPP term. Each Telephone Company Wire Center has been assigned to a rate zone. To determine the rate zone wire center assignments use the following:

• For OPP terms in effect prior to November 18, 2000, wire center rate zone assignments can be found in Section 7.7.

(D)

 For OPP terms in effect on or after November 18, 2000, wire center rate zone assignments can be found in the NECA Tariff FCC No. 4.

(T)

Customers under their current OPP term will continue to pay the rates as shown in Section 7.5.16(B) until such time as:

- the effective tariff rate in Section 7.5.9 becomes lower than the vintage rate,
- the assignment of a new rate zone involves a lower rate,
- the customer's existing OPP term expires, or
- the service is terminated by the customer.

In addition, other customer modifications, other than termination, that cause a new rate or OPP term to be established will result in the service becoming non-vintage and the rates as specified in Sections 7.5.5 through 7.5.12 will apply.

(T)

- B. Vintage Rates
 - 1. The following rates apply to DS1 services installed prior to April 23, 1997 in Illinois, Michigan, Ohio and Wisconsin and prior to June 6, 1997 in Indiana unless rates as specified under Section 7.5.9(B) are lower, in which case the referenced rates apply.

Recurring Charges

		Optional Payment Plan		
Local Distril Channel - Per Point o	bution of Termination	24 Month	48 Month	
All States	Zone 1 Zone 2 Zone 3	\$134.87 139.37 149.85	\$118.38 122.33 131.54
