Chairman Thomas W. Johnson
OH

Chairman Johnson, Chairman Johnson,

I do not support Duke Energy's attempt to bail out aging, outdated coal plants on my dime through a non-bypassable rider. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy. I am a part of the City of Cincinnati's electric aggregation program and am proud my monthly bill goes towards clean renewable energy and not dirty coal. Coal, which generates nearly 70 percent of electricity in Ohio causes air pollution, negatively impacts public health and is a major contributor to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air pollution in the nation. Duke Energy's request is outrageous, and will cost ratepayers more than money. It will cost us our health and right to clean air by keeping dirty coal plants online.

Please do not approve Duke Energy's request, do what is right for all Ohioans, not just the companies. Reject this proposal.

Sincerely,

Justin and Ann Feldman

Chairman Johnson, Chairman Johnson,

Duke Energy does a lot of shady things. They already seem to be immune to many consequences for their actions. They should not be allowed to become the taxpayer's burden by law. It is their responsibility to manage and update their own facilities. Let them make investments. Let them take loans and risks like the rest of us.

I do not support Duke Energy's attempt to bail out aging, outdated coal plants on my dime through a non-bypassable rider. Chairman Thomas W. Johnson
OH

Chairman Johnson, Chairman Johnson,

I do not support Duke Energy's attempt to bail out aging, outdated coal plants on my dime through a non-bypassable rider. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy. I am a part of the City of Cincinnati's electric aggregation program and am proud my monthly bill goes towards clean renewable energy and not dirty coal. Coal, which generates nearly 70 percent of electricity in Ohio causes air pollution, negatively impacts public health and is a major contributor to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air pollution in the nation. Duke Energy's request is outrageous, and will cost ratepayers more than money. It will cost us our health and right to clean air by keeping dirty coal plants online.

Please do not approve Duke Energy's request, do what is right for all Ohioans, not just the companies. Reject this proposal.

Sincerely,

Amie Taylor

I am a young graduate student who has lived in Ohio for 23 years. I am planning on spending my entire life fighting to build a more sustainable, environmentally friendly planet. Although coal WILL play a role in any plan toward a more sustainable world, using outdated coal burning power plants is not a smart way to go about it. Not only does coal produce more pollutants than any other fossil fuel source, affecting human health and the environment, but the process to mine and burn coal is inefficient and there are several more economical solutions.

Please do not continue the support of coal plants in Ohio!

Sincerely,

Jeff Beegle

OH

Chairman Johnson, Chairman Johnson,

I do not support Duke Energy's attempt to bail out aging, outdated coal plants on my dime through a non-bypassable rider. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy. I am a part of the City of Cincinnati's electric aggregation program and am proud my monthly bill goes towards clean renewable energy and not dirty coal. Coal, which generates nearly 70 percent of electricity in Ohio causes air pollution, negatively impacts public health and is a major contributor to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air pollution in the nation. Duke Energy's request is outrageous, and will cost ratepayers more than money. It will cost us our health and right to clean air by keeping dirty coal plants online.

Please do not approve Duke Energy's request, do what is right for all Ohioans, not just the companies. Reject this proposal.

Sincerely,

Ann Gimbert

Docketing Case No.: 14-08-EL-SSO

Notes: Duke is working to force me to bail out their oldest most expensive coal plants. Please end the freeze on renewable energy standards and dont fall for Dukes submission because I dont want anymore dirty energy. We deserve to breathe healthy clean air, especially with the technology and alternatives available to do so. If you breathe air in Ohio like I do, I ask that you think about the quality of it and then take action. Dont let Duke and the other companies fool you. Let them phase out their own plants, on their own dime.

Please docket the attached in the case number above.

COMMENT DESCRIPTION:

NO COAL PLANT BAILOUTS FOR DUKE! It's Duke's responsibility, not those of its customers, to foot the bill for modernizing/replacing its aging coal plants. Duke should be held responsible for its bad investments, not its customers.

Respectfully, Ethan Fletcher

COMMENT DESCRIPTION:

I am concerned about rising costs. I wholeheartedly support renewable energy, and expect the state to transition to cleaner fuels and more energy efficiency measures, which are cheaper options. The utilities originally wanted to use the free market to sell energy, but the plants are not competitive with today's market prices for electricity. They're losing money in the market. As a result these corporations are asking that their oldest, dirtiest and most uneconomical coal and nuclear power plants make a profit and they are doing this basically by asking consumers to bail them out. The utility companies say the proposal would stabilize rates for customers, but it would prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution. Please do NOT allow them to increase rates to pay for extra costs associated with continuing to generate power from existing power plants.

Chairman Thomas W. Johnson
OH

Chairman Johnson, Chairman Johnson,

I do not support Duke Energy's request for a non-bypassable rider on transmission costs. It is an attempt to make ratepayers foot the bill to bail out aging, outdated coal plants. These plants are not competitive with today's market prices for electricity, and stands to undermine the past fifteen years of the Commission's work to create a competitive wholesale market with a diversity of supplies and suppliers. My family should not have to pay more for dirty energy. Duke Energy's request to bail out obsolete coal plants that are no longer

economically viable is bad public policy that will cost Ohio electric customers more. Please do your job and do what is right for Ohioans by rejecting this proposal.

Sincerely,

Dawn Bickett
