PUCO Commissioners

Subject: Reduce coal use for electricity in Ohio

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Brian Kuru

Let's just call the emissions poison governor. That's the reality. And you allowed these corporations to continue to increase their poisoning of our air, water, and land, without a means of reigning them in such as requiring them to expand on renewable energy. This is morally wrong. This is also becoming a legal issue for an upwind state such as ours which can be held accountable to other states for our poison. I do not support this move.

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Sally Newman

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not want to put coal miners out of work, but I also want a responsible, sustainable environment in Ohio. The administration is headed in the wrong direction for the best interests of the public in Ohio.

Please stop now!!!!

Sincerely,  
Laura Fay

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Rebecca Katzenmeyer

PUCO Commissioners

Subject: Support Ohioans, not Coal

Dear PUCO Commissioners,

It was disgusting to hear about the Ohio electric utilities' attempt to bail out their old coal plants and have users pay for their complacency. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation. It is time to start protecting our homes and families, not the last century ways of doing things.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is counter to all free market principles. It is also bad public policy that in effect amounts to a policy-mandated, special interest sponsored tax increase, costing Ohio electric customers more.

Staying in the past will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution. This is not the way to attract industry and jobs to the state, nor is holding onto the past a smart way to build a sound economic structure for the future.

Sincerely,  
Joseph Mucci

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Travis Campbell

Dear PUCO Commissioners,

Dear Governor Kasich,

I know that you are an intelligent person so I can't believe that you don't accept the fact that climate change is happening and that it's anthropogenic. Keeping old coal plants online will be disastrous, not only to the health of the citizenry, but to the health of the planet. I urge you not to let electric utilities keep their dirtiest power plants open!

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Charles Holmes

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Rick Schomaker
