RE: Access Tariff Revision (Case No. 14-1312-TP-ATA)
Common Point LLC (Docket No.90-9405)

Dear Commission:

Enclosed for filing are replacement access tariff revision pages filed on behalf of Common Point LLC. This filing updates Common Point LLC's new address throughout its tariff, adds VoIP-PSTN language, updates some rates to be compliant with the ongoing ICC Transformation project, and adds 8XX Data Base Access Service Query rates and services..

If you have any questions or need additional information, please do not hesitate to contact me at (405) 755-8177 extension 25, mdean@telecompliance.net.

Respectfully,

/s/ Matt Dean

SECTION 1 - TERMS AND ABBREVIATIONS (con't)

Trunk – A communications path connecting two switching in systems in a network, used in the establishment of connections between switching systems in which all of the communications paths are interchangeable.

Trunk Group – A set of trunks which are traffic engineered as a unit for the establishment of connections between switching systems in which all of the communications paths are interchangeable.

Toll VoIP-PSTN Traffic – A Customer's interexchange voice traffic exchanged with the Telephone Company in Time Division Multiplexing format over PSTN facilities, which originates and/or terminates in Internet Protocol (IP) format. "Toll VoIP-PSTN Traffic" originates and/or terminates in IP format when it originates from and/or terminates to an End User Customer of a service that requires IP-compatible Customer Premises Equipment.

(N)
↑
↓
(N)

Underlying carrier(s) - Means the provider of facilities utilized by a wholesaler in the provisioning of its interexchange service to its customers.

Wire Center – A physical location in which one or more central offices, used for the provision of exchange services, are located.

Access Tariff

SECTION 4 - SWITCHED ACCESS SERVICE**4.1 GENERAL**

Switched Access Service, which is available to Customers for their use in furnishing their services to End Users, provides a two-point electrical communications path between a Customer's premises and an End User's premises. It provides for the use of common terminating, switching and trunking facilities, and for the use of common subscriber plant of the Company. Switched Access Service provides for the ability to originate calls from an End User's premises to a Customer's premises in the LATA where it is provided.

The following provision applies to the treatment of Toll VoIP-PSTN Traffic pursuant to the Federal Communications Commission's Part 51 Interconnection Rules and in compliance with the Federal Communications Commission's Report and Order and Further Notice of Proposed Rulemaking in CC Docket Nos. 96-45 and 01-92; GN Docket No. 09-51; WC Docket Nos. 03-109, 05-337, 07-135 and 10-90; and WT Docket No. 10-208, adopted October 27, 2011 and released November 18, 2011 (FCC 11-161). In the absence of an interconnection agreement between the Company and the customer specifying the treatment of Toll VoIP-PSTN Traffic, the Company will bill the customer the applicable switched access rates and charges specified in Section 6.1, following, on all jurisdictionally intrastate voice traffic identified as Toll VoIP-PSTN Traffic.

↑
↓
(N)

The application of rates for Switched Access Service is described in Section 4.2.3 following.

4.2 RATE CATEGORIES

The rate categories that apply to Switched Access Service, as provided by Company, are:

- Tandem Switching
- Tandem Switched Transport
Tandem Switched Facility
Tandem Switched
Termination
- 8XX Data Base Query

(N)

SECTION 4 - SWITCHED ACCESS SERVICE (cont'd)**4.3 OBLIGATIONS OF THE COMPANY (Cont'd)****4.3.3 Provision of Service Performance Data**

Subject to availability, end-to-end service performance data available to the Company through its own service evaluation routines may also be made available to the Customer based on previously arranged intervals and format. The data provides information on overall end-to-end call completion and non-completion performance e.g., Customer equipment blockage, failure results and transmission performance. The data does not include service performance data provided under other Tariff sections, e.g., testing service results. If data is to be provided in other than paper format, the charges for such exchange will be determined on an individual case basis.

4.3.4 Trunk Group Measurements Reports

Subject to availability, the Company will make available trunk group data in the form of usage in CCS, peg count and overflow to the Customer based on previously agreed to intervals.

4.3.5 8XX Data Base Query

The 8XX Data Base Query Charge will apply for each Toll-Free 8XX call query received at the Company's (or its provider's) Toll-Free 8XX data base. A Basic or Vertical Feature Query charge is assessed for each completed query returned from the data base identifying the Customer to whom the call will be delivered whether or not the actual call is delivered to the Customer. The Basic Query provides the identification of the Customer to whom the call will be delivered and includes area of service routing which allows routing of 800 series calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides the same Customer identification as the basic query and vertical features which may include: (1) call validation, (ensuring that calls originate from subscribed service areas); (2) POTS translation of 800 series numbers; (3) alternate POTS translation (which allows subscribers to vary the routing of 800 series calls based on factors such as time of day, place or origination of the call, etc.); and (4) multiple carrier routing (which allows subscribers to route to different carriers based on factors similar to those in (3)). The Vertical Feature charge will be assessed for each feature used on a call.
