DESCRIPTION OF PROPOSED SERVICES

GC Pivotal, LLC d/b/a Global Capacity (“Global Capacity” or “Applicant”), hereby applies for a Certificate of Public Convenience and Necessity to authorize it to provide facilities-based and resold local exchange telecommunications services and facilities-based and resold interexchange non-voice telecommunications service to business customers throughout the State of Ohio. Global Capacity was granted a Certificate in Case No. 11-1158-TP-ACE, Certificate No. 90-9385 to provide data services on April 12, 2011.

This Application is being filed as part of a larger transaction whereby Global Capacity intends to obtain certain network assets and data service customers from MegaPath Corporation (“MegaPath”).¹ Global Capacity intends to provide services to those customers under the same rates, terms and conditions as they are currently provided by MegaPath. Consistent with the services provided by MegaPath, Global Capacity does not intend to provide voice services at this time. In order to serve those customers, Global Capacity is hereby requesting facilities-based and resold authority, and intends to adopt the existing MegaPath tariffs (if any). Any future changes in the rates, terms or conditions of services provided to affected customers will be undertaken pursuant to their service contracts and/or applicable federal and state tariffing requirements. Applicant will initially provide local exchange services using the same methods as those used by MegaPath in Ohio.

¹ Global Capacity requests that the filing it makes with respect to the transfer of assets from MegaPath to Global Capacity be associated with this Application.

Global Capacity seeks authority to provide facilities-based and resold local exchange and interexchange non-voice telecommunications services to and from all points in the State of Ohio that are currently or become open to competition.

Global Capacity will provision telecommunication services through a combination of its own facilities, facilities leased from other carriers, and resale of facilities and equipment of Incumbent Local Exchange Carriers ("ILECs") operating in Ohio. Global Capacity's facilities may include ducts, wires, cables, end-office switches, telecommunications equipment and other telecommunications transmission facilities. Facilities-based service will be provided via (1) commercial wholesale agreement with incumbents or other carriers, (2) Global Capacity's own facilities, or (3) a combination thereof.

Applicant requests authority to operate throughout the State of Ohio. Therefore, Global Capacity seeks statewide authority. At this time, Global Capacity does not seek to terminate any small or rural exemptions existing under Section 251(f)(1) of the Federal Telecommunications Act of 1996; however, Global Capacity seeks statewide authority so that it may expand its service areas as those areas become open to competition.

Granting this Application will promote the public interest by increasing competition in the provision of telecommunications services in the State of Ohio. Applicant will provide customers high quality, cost effective telecommunications services, with an emphasis on customer service. In addition to driving prices closer to costs, thereby ensuring just and reasonable rates, competition promotes efficiency in the delivery of services and in the development of new services. These benefits work to maximize the public interest by providing continuing incentives for carriers to reduce costs while, simultaneously, promoting the

availability of potentially desirable services. Global Capacity agrees to adhere to all state laws and all Commission policies, rules and orders.
