**Re: Oregon Clean Energy, LLC,
Case No. 14-1396-EL-BGA**

Dear Ms. McNeal:

This letter includes a map that consolidates the various maps that have been filed in this Amendment and the original Application. Though all of the information about the Project area has been filed, the information is not in one place. For clarification, the attached map was prepared which shows both (1) the project area as approved in the original application by the Ohio Power Siting Board in Case No. 12-2959-EL-BGN on May 1, 2013 and (2) the new area proposed to be added in the Amendment, which is the subject of this proceeding. The Project area is shown outlined in red and green.

The map also shows two areas outlined in blue that are temporary construction use areas to be used for laydown, parking, and other construction activities. These areas are shown because the Staff has considered them in its investigations of the Application and this Amendment.

In the case of this Amendment, the Staff Report issued September 19, 2014 references the temporary construction use area shown on the northern portion of the map, which will be used for construction activities such as trailer parking as well as the switchyard area, outline in green, to the north of the main project site.

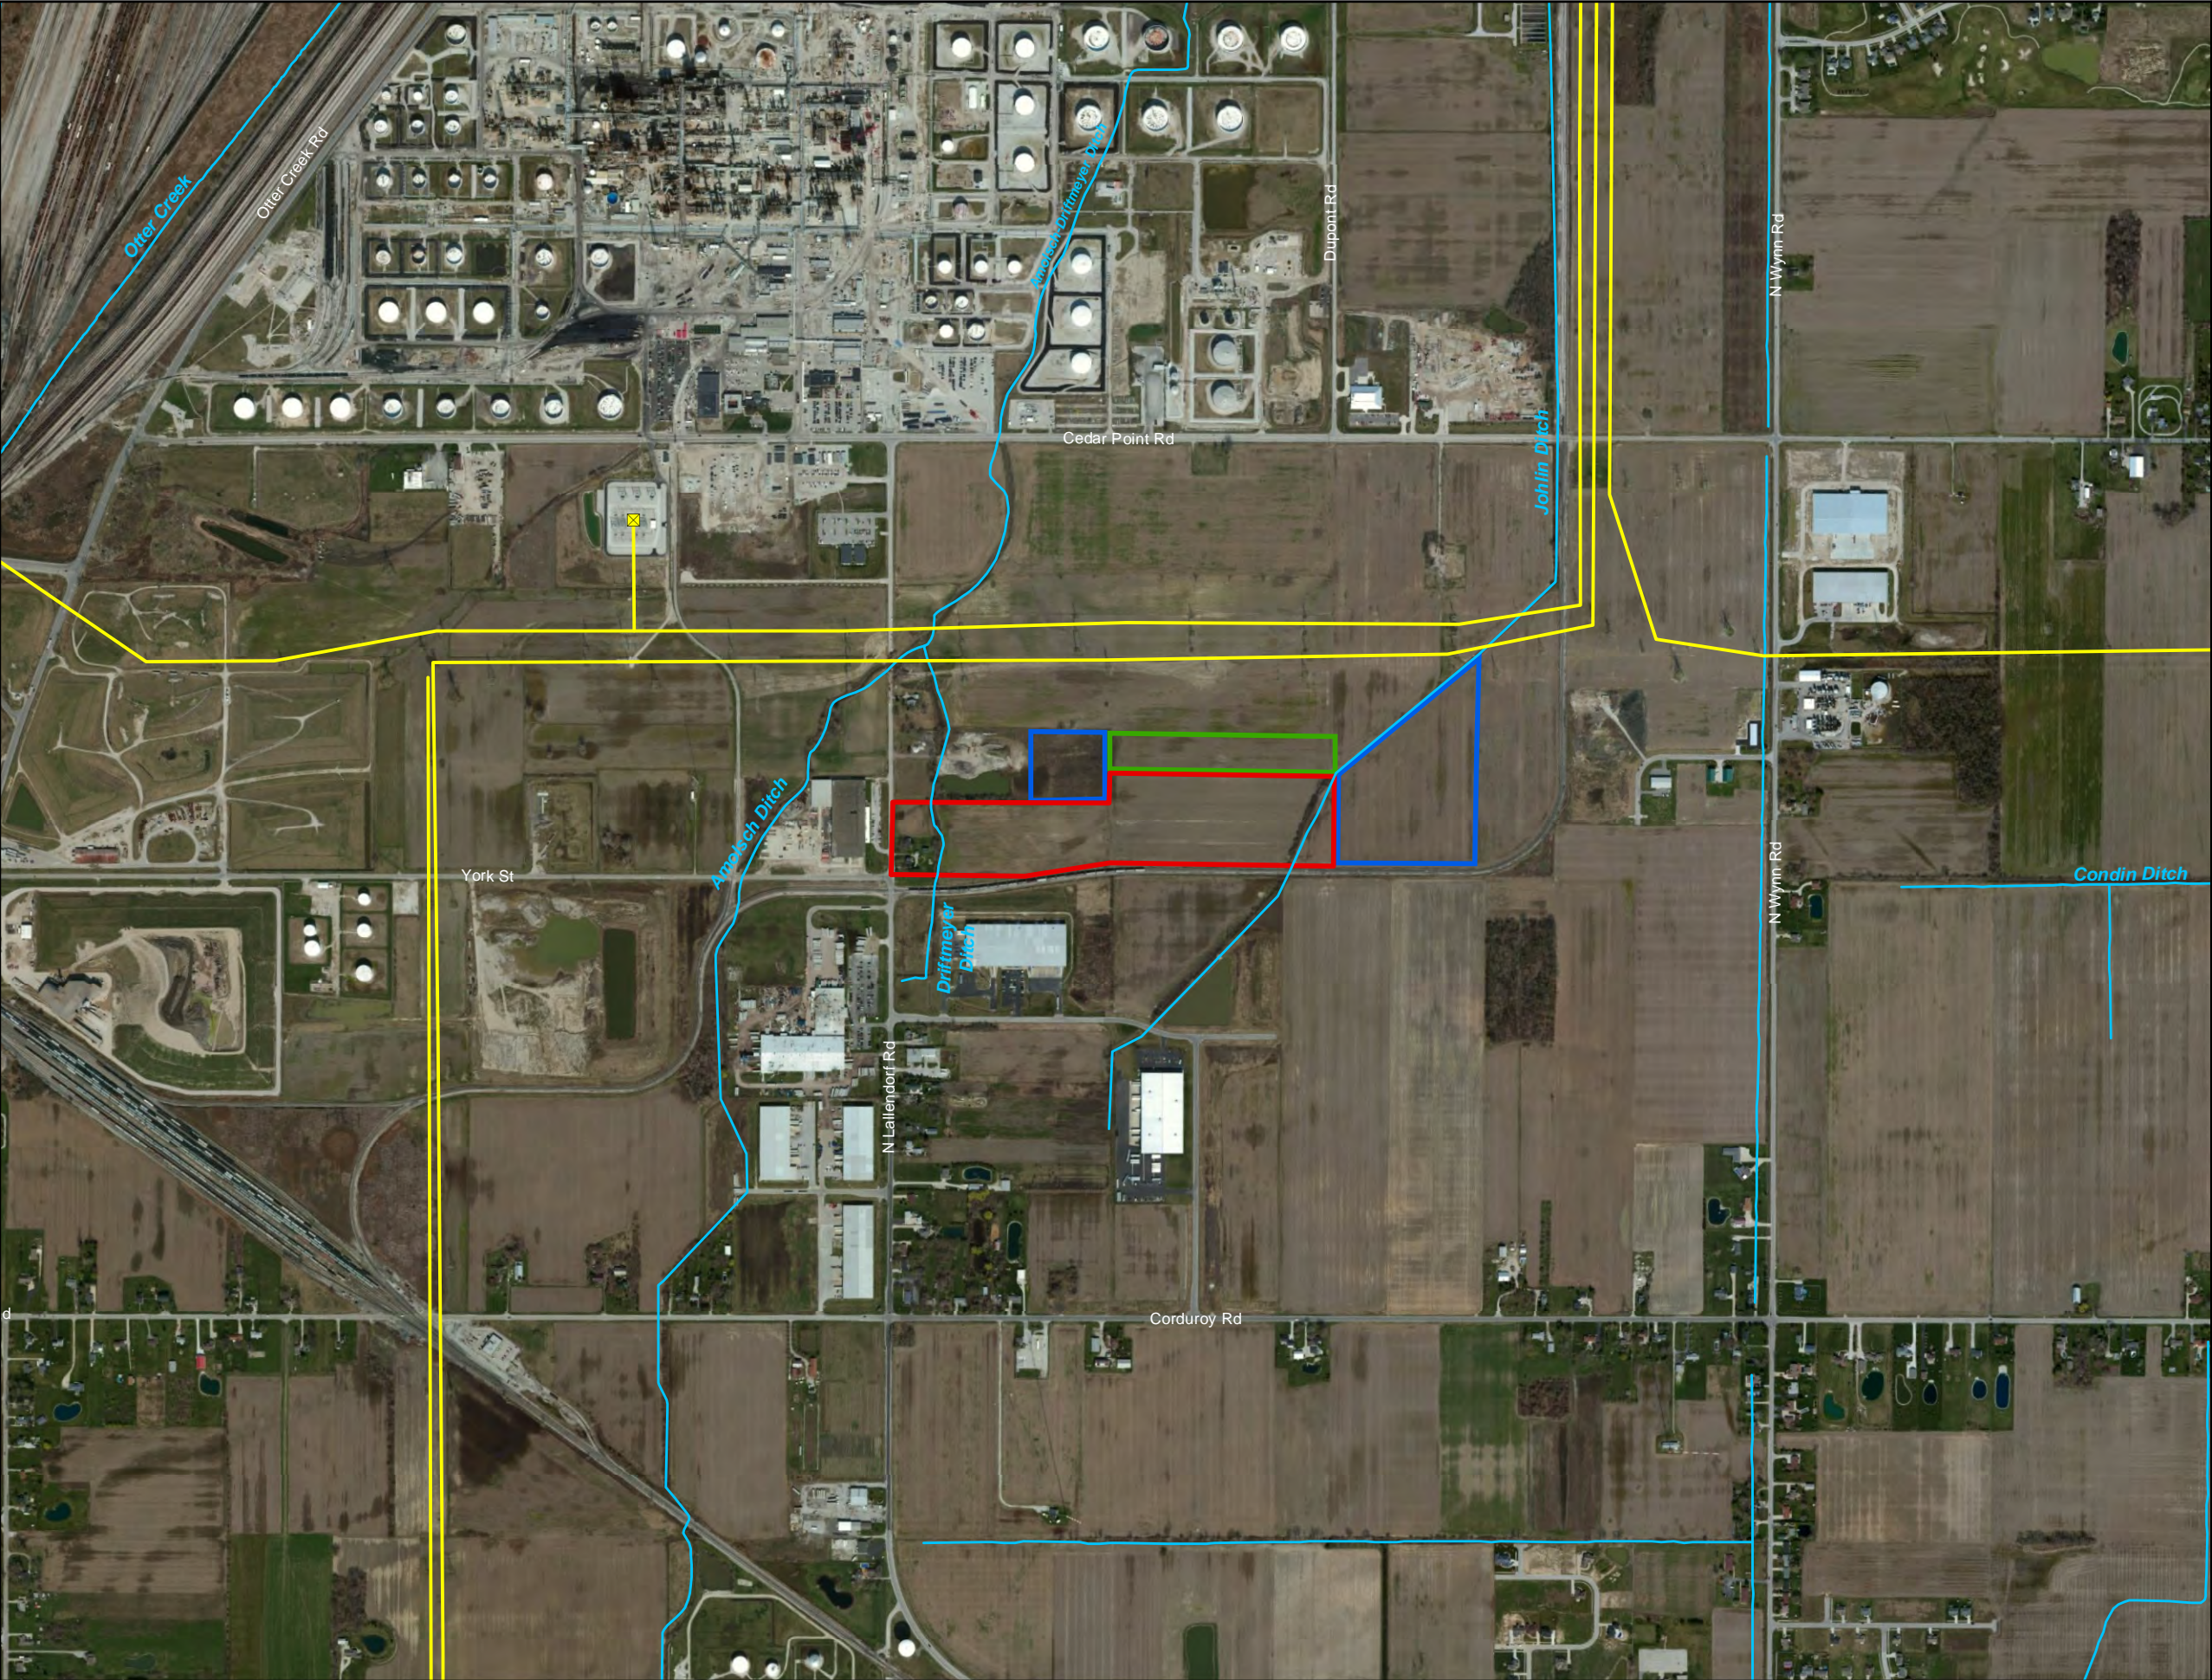

It is hoped that this map will be useful for reference since it consolidates the various maps that have been filed in this case. If you have any questions please call at the number listed above.

Sincerely,

Sally W. Bloomfield
