COMMENT DESCRIPTION:

I am writing to voice my opposition to allowing Duke to make me and other customers pay more for their outdated coal-burning plants. We need to be shutting down and phasing out coal-burning facilities, not sustaining them. The pollution problem is already reaching crisis proportions, and this proposed plan would just contribute to it. I am very concerned about the climate, even more than the proposed hike in payments. I urge you to reject the request by Duke/First Energy.

Chairman Thomas W. Johnson
OH

Chairman Johnson, Chairman Johnson,

I do not support Duke Energy's request for a non-bypassable rider on transmission costs. It is an attempt to make ratepayers foot the bill to bail out aging, outdated coal plants. These plants are not competitive with today's market prices for electricity, and stands to undermine the past fifteen years of the Commission's work to create a competitive wholesale market with a diversity of supplies and suppliers. My family should not have to pay more for dirty energy. Duke Energy's request to bail out obsolete coal plants that are no longer economically viable is bad public policy that will cost Ohio electric customers more. Please do your job and do what is right for Ohioans by rejecting this proposal.

Sincerely,

Kate MacKinnon

COMMENT DESCRIPTION:

“PLEASE FILE OPPOSITION COMMENT UNDER CASE #: 14-1297-el-sso. I am adamantly against the financial bail out at tax payer expense of the Davis Besse nuclear power plant. The plant is old. I would cost a fortune to make it safe. It has had a plethora of problems not adequately addressed, such as the huge running crack in the containment (?) building. I think it is a waste of money to keep such a dangerous old unsafe nuclear reactor running. So much money has been already pumped into it and it continues to have extremely hazardous issues, also sump pump failure and other related problems. In fact, it is one of the most dangerous nuclear reactors in the US. It should be shut down. Sincerely, Kathryn Barnes

COMMENT DESCRIPTION:

Please file this opposition comment under case#14-1297-EL-SSO

The Davis-Besse Nuclear power plant has had many problems from its inception. Among them cracks repeatedly in the concrete shield building, cracking in the reactor head, and a 12 minute loss of coolant in a June, 1985 incident. This power plant sits on Lake Erie and has the potential to cause harm to the drinking water, air and land of thousands of people in this part of the country. The bad record of accidents should not be rewarded with an extension of its license.

COMMENT DESCRIPTION:

Opposition comment, Case No. 14-1297-EL-SSO.

Do NOT approve FirstEnergy's request to charge customers more for uneconomic plants. In fact, under deregulation the Company is supposed to eat these costs. Approval of this request would amount to a bailout or reward for bad investments in dirty coal plants and costly nuclear plants.

Do not charge me for these bad management decisions!

David Hughes Madison, OH

COMMENT DESCRIPTION:

PLEASE FILE OPPOSITION COMMENT UNDER CASE #: 14-1297-EL-SSO.

Deny the coal and nuclear plant bailout requests from FirstEnergy (Kyger Creek, Sammis, and Davis-Besse nuclear plant)and from AEP and Duke. Please don't make me (an AEP customer) and other Ohioans pay more for dirty energy we don't want. Don't continue to raise my Ohio electricity bill rates. Invest in renewable energy,like solar and wind. And invest in measures to increase energy efficiency, for homes and businesses - support rebates & incentives for (retrofitting more insulation,improved HVAC and water heating systems, etc.) Denying these bailouts (from off the backs of public customers) and retiring dirty coal plants and outdated dangerous deteriorating nuclear plants will help clean up our air, water, reduce pollution-related illness, and encourage electric suppliers to utilize more modern cleaner proven power generation systems. Ohio's utilities don't need a dirty energy bailout and we customers definitely should not be financing it.

Thank you for your consideration.
