RECEIVED

Dear Sirs,

I am writing today in regards to First Energy + Duke's response to the "clean power plan. I'm writing to state my opinion that the PUCO should NOT approve the plan submitted by the power companies to force consumers to continue buying power from coal power. I'm writing to voice my concern over the 2 year freeze on Ohio's renewable energy plan. This issue is a concern to me because I believe we need to be moving away from "dirty energy" and moving towards sustainable, re-newable energy. I know big changes like these don't happen overnight but no change can happen when we let big money + big corporations force us to buy their energy from their coal fired power plants. No changes can come when we ignore the issues + the taxpayer voices when we freeze programs for corporations. I want to reduce air pollution, pay cheaper prices for cleaner energy. I just had a discussion

old if we continue along the same path. I don't care for the toxic pollution that comes with coal fired power plants.

My family & I should not have to pay for Duke to continue with their status quo polluting air and ignoring the need for change. Duke needs to be held accountable to their customers NOT their shareholders. Each state has a goal to meet by 2030 to reduce carbon emissions from coal fired power plants & Duke needs to part of the solution.

Please consider my concerns & comments when making your decision

Sincerely, Kathryn J. Feisler
