Greenwich, Ohio 44837

Re: Greenwich Windpark – Case Number 13-0990-EL-BGN

Mr. White,

Thank you for contacting the Ohio Power Siting Board regarding the Greenwich Windpark. Your correspondence will be docketed in the public comments for case number 13-0990-EL-BGN

On September 23, 2014, Omega Crop Company filed an application for rehearing in this case. On October 22, 2014, the Board's administrative law judge issued an entry granting Omega Crop Company's application for rehearing for the limited purpose of affording the Board additional time to consider the issues raised in the application.

It is important to note that the Board does not plan to hold an additional public hearing in this case. Following a complete review of the issues raised by Omega, the Board will issue a final Entry on Rehearing at a yet to be scheduled Board meeting in Columbus.

Additional information regarding the Greenwich Windpark is available on the Board's website at [www.OPSB.ohio.gov](http://www.OPSB.ohio.gov). If you have any additional questions, please contact me at (866) 270-6772.

Sincerely,

Matt Butler  
Public Outreach Manager  
Ohio Power Siting Board

RE: CASE NO. 13-0990-EL-BGN

Attn. OPSB

We, in this community, REQUEST ANOTHER HEARING ON THE PROPOSED WIND TURBINES slated to be put up in our midst. I hope that you at the OPSB, because of your power to approve or turn down these projects, are aware of the many negative effects of these huge turbines compared with the advantages. As you know, if government money wasn't helping to pay for them, they would NEVER be put up.

If they are allowed to be put up, it definitely takes away the property rights of hundreds being forced to live next to these monsters the rest of their lives.

Consider that the wind turbine industry's only interest is PROFITS, much of it tax payer money. In our area, these turbines are NOT a constant, reliable source of electricity. They never pay for themselves with electricity generated. They shouldn't be erected just because it's the "politically correct" thing to do. The wind energy people have developed a very positive spin on these turbines and buy out communities and governments. They have no real interest in 'Green Energy' or the communities where they put them. They don't have to live next door to these monsters for the rest of their lives as we will.

As public servants, we hope you at the OPSB will please look more carefully into the negative effects of these turbines and what is best for the MAJORITY in our community.

A concerned resident and land owner.
