**Re: Vectren Energy Delivery of Ohio, Inc.
OPSB Case No. 13-1651-GA-BTX**

Dear Ms. McNeal:

On March 17, 2014, the Ohio Power Siting Board ("Board") issued a Certificate of Environmental Compatibility and Public Need subject to a number of conditions.

Condition No. 17 of the Board's Order requires the following:

Vectren shall have a Staff-approved environmental specialist on site during construction activities that may affect sensitive areas, as mutually agreed upon between the Applicant and Staff, and as shown on the Applicant's final approved construction plan. Sensitive areas include, but are not limited to, areas of vegetation clearing, designated wetlands and streams, and locations of threatened or endangered species or their identified habitat. The environmental specialist shall be familiar with water quality protection issues and potential threatened or endangered species of plants and animals that may be encountered during project construction.

In compliance with Condition No. 17 of the Board's Opinion, Order, and Certificate, attached for filing is a memo dated October 29, 2014, from Ms. Stahl notifying Board's Staff that wetland #2 has been restored, and temporary stormwater control devices installed. This is the last environmentally sensitive area to be restored. Thus, Vectren has complied with Condition No. 17.

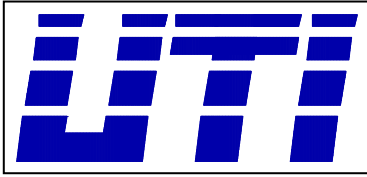

Please do not hesitate to contact me if you have any questions.

Sincerely,

Sally W. Bloomfield

MEMORANDUM

To: Ed Steele
From: Melinda Stahl
Date: October 29, 2014
Subject: Wetland 2 Restoration and Completion of Construction Activities in Environmentally Sensitive Areas:
Vectren's Z-167 Relocation Project
OPSB # 13-1651-GA-BTX - Condition #17 Notification

Ed,

This memo is to notify the Staff that Vectren has removed the wetland matting from wetland #2 on the Z-167 Relocation Project, OPSB Case No. 13-1651-GA-BTX. The wetland and surrounding areas have been restored and temporary storm water control devices installed. This was the last environmentally sensitive area on the project site to be restored and all construction activities associated with these areas have been completed. Vectren will continue to monitor this wetland along with the other environmentally sensitive areas on the project as part of their stormwater pollution prevention plan.

Please contact me if you have any questions or need additional information.

Sincerely,

Melinda Stahl
