

4901:1-40-05(C), OAC:

Staff shall review each electric utility's or electric services company's alternative energy portfolio status report and any timely filed comments, and file its findings and recommendations and any proposed modifications thereto.

The findings and recommendations in this document pertain to the company's compliance status. This document does not address such matters as cost recovery or status relative to the statutory 3% cost provision.

II. Company Filing Summarized

Texas Retail Energy, LLC (TRE or Company) filed its AEPS compliance status report for the 2013 compliance year on April 15, 2014. In its compliance filing, TRE proposed a baseline of 155,920 megawatt-hours (MWHs) comprised of its Ohio retail sales for 2012. TRE indicated that 2012 was the first year it had retail sales in Ohio. Applying the statutory benchmarks to its proposed baseline, TRE calculated its 2013 compliance obligations to be as follows:

- 2,980 non-solar MWHs, of which at least 1,490 must originate from Ohio facilities
- 140 solar MWHs, of which at least 70 must originate from Ohio facilities

The Company indicated that it had obtained the necessary renewable energy credits (RECs) and solar RECs (S-RECs) to satisfy its 2013 compliance obligations. The Company further indicated that it had transferred the necessary RECs and S-RECs to its PJM EIS Generation Attributes Tracking System (GATS) reserve subaccounts for Ohio compliance purposes.

III. Filed Comments

No persons filed comments in this proceeding.

IV. Staff Findings

Following its review of the annual status report and any timely comments submitted in this proceeding, Staff makes the following findings:

- (1) That TRE is an electric services company in Ohio with retail electric sales in the state of Ohio, and therefore the Company had an AEPS obligation for 2013.
- (2) That the baseline proposed by TRE is reasonable, and given the proposed baseline and the 2013 statutory benchmarks, TRE accurately calculated its AEPS compliance obligations.

- (3) That the Company has transferred RECs and S-RECs to its GATS reserve subaccounts for Ohio compliance purposes.
- (4) That following a review of the Company's reserve subaccount data on GATS, Staff confirmed that the Company satisfied its total non-solar¹ obligation, as well as the specific minimum in-state non-solar requirement, for 2013. The RECs that the Company transferred to its GATS reserve subaccount were sourced from generating facilities certified by the Commission and were appropriately associated with electricity generated between August 1, 2008, and December 31, 2013.
- (5) That following a review of the Company's reserve subaccount data on GATS, Staff confirmed that the Company satisfied its total solar obligation, as well as the specific minimum in-state solar requirement, for 2013. The Company exceeded the specific minimum in-state solar requirement because it retired exclusively Ohio S-RECs. The S-RECs that the Company transferred to its GATS reserve subaccount were sourced from generating facilities certified by the Commission and were appropriately associated with electricity generated between August 1, 2008, and December 31, 2013.

V. Staff Recommendations

Following its review of the information submitted in this proceeding and other relevant data, Staff recommends the following:

- (1) That TRE is found to have satisfied its 2013 AEPS compliance obligations.
- (2) That for future compliance years in which the Company is utilizing GATS to demonstrate its Ohio compliance efforts, the Company initiates the transfer of the appropriate RECs and S-RECs to its GATS reserve subaccount between March 1st and April 15th so as to precede the filing of their Ohio annual compliance status report with the Commission.

¹ Staff uses "non-solar" in this context to refer to the total renewable requirement net of the specific solar carve-out. Staff acknowledges that there is not a specific "non-solar" requirement in the applicable statute.
