To Whom It May Concern:

I am writing in regard to Case Number 14-0841EI-SSO. I am concerned about the reducing toxic pollution in our community and saving money on our electric bills. We need to invest in efficient and renewable energy resources and retire the old, outdated power plants. I oppose the bailout of Duke Energy, and the proposed increased rates that I, as a taxpayer, would have to pay as a result.

Please deny the rate increase. A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficient and renewable energy.

Sincerely,

Karen Lewis

Dear PUCO,

My family and I care too much about investment in efficiency and renewable energy. We need to reduce toxic pollution in order to save on our electric bills. Please don't charge consumers more money to put towards Ohio's old, dirty coal plants!
