Subject: Staff Interrogatories – Initial Set - 14-1955-EL-REN Pearl Valley Cheese Plant Biogas Microturbine 65

TO: Chuck Ellis

Dear Mr. Ellis,

Below is the initial set of staff interrogatories for the application of the Pearl Valley Cheese Plant Biogas Microturbine 65 facility for certification as an eligible Ohio renewable energy resource generating facility in case number 14-1955-EL-REN. As the representative of the facility, please file your response in the PUCO Docketing Information System under case number 14-1955-EL-REN within a week. Please feel free to copy and paste the question below into a word document in order to provide your answer in e-filing the document. If you have any questions, please feel free to reply to this e-mail. Thank you.

**Case No. 14-1955-EL-REN
Pearl Valley Cheese Plant Biogas Microturbine 65 facility
Staff Interrogatories – Initial Set**

Question 1: The application notes in section G.10g that the projected annual gross generation is 569 MWh, however, the projected gross annual generation given in section I.1 is 375 MWh. Please provide corrected information for Section G.10g and/or Section I.1 (including projected gross annual generation, as well as expected annual capacity factor % if applicable) that addresses the discrepancy.

Answer 1: < It should be only 375 MWh as the projected gross annual generation in section G.10g. The 569 MWh was initially calculated as the total capacity if it was 100% efficient, but we later determined that was not realistic. I must have forgot to update that section after we determined the lower efficiency percentage. >

Thank you.
