Chamberlin-Mansfield 345 kV Transmission Line Loop to Hanna Substation
Case No. 13-0834-EL-BLN
Completion of Construction

Dear Mr. Steele,

This letter is associated with the Letter of Notification submitted on April 15, 2013 for the Chamberlin-Mansfield 345 kV Transmission Line Loop to Hanna Substation Project. As previously indicated, these facilities began commercial operation on May 28, 2014, while minor construction activities continued. Please be advised the minor construction activities, primarily maintaining erosion controls while vegetation become reestablished in areas disturbed by construction, have been completed and the Notice of Termination of Ohio EPA NPDES General Permit OHC000004 was processed shortly before the end of November. As such, construction of the project has been completed on approximately December 1, 2014. Additionally it may be helpful to note that construction of the Bruce Mansfield-Glenwillow 345 kV Transmission Line (Docket 12-1726-EL-BLN) continues and partially overlaps the east end of the Chamberlin-Mansfield 345 kV Transmission Line Loop to Hanna Substation Project.

If you have any questions regarding this project, please contact me at (330) 761-4268.

Sincerely,

Ted Krauss,
 Manager Siting, Survey & Right-of-Way
 FirstEnergy Service Company
