

To The Public Utilities Commission of Ohio,

I am writing this letter as a concerned parent and resident of Cuyahoga County. My wife and I have a young daughter and would like to have her and her children and her children's children live in a state that has less pollution than the one we grew up in. The state of Ohio needs to be investing in more efficient ways to generate energy. The politicians in Columbus need to stop looking for ways to allow the outdated heavily polluting coal fired electrical plants to run. As a taxpaying citizen in the future I would like to save money on my electrical bills without jeopardizing the water I drink and the air that I breathe.

Thank you for your time,

Sincerely,

Charles E. [Signature]

Hello,

I care about reducing pollution and believe "natural" sources of energy should be the way we attain our energy. Energy sources like wind, solar, geothermal, and tidal should be invested in over coal, oil, or ... there's probably others. I'm not sure who if anyone will read this, but I do care and would like to make a difference. I don't believe companies that use depleting, polluting, antiquated forms of creating energy should receive any funding from the government.

DAVID A. WASKI
I hope this helps,
David A. Waski

To whom it may concern,

I am writing to request that you deny the bailout of old, polluting technology that is harmful to the health and vitality of our citizens and economy. As the head of a household with young children, I am concerned about their well being. The oldest and dirtiest plants in the electric grid system need to be replaced with cleaner alternatives. I would be willing to pay more for my electric service if I knew that it was being produced with the latest, sustainable technologies. However, I am opposed to a rate increase that would allow these coal-fired plants to continue operating.

Sincerely,

John Fellenstein

Dear Public Utilities Commission of Ohio,

This is regarding First Energy Case # 14-1297-EL-SSO.
I write with the faint hope that somehow this will circumna-
vigate the filters that prevent letters of dissent from troubling
your conscience. I don't know the pressure you are under
to keep your jobs, but I can't believe your life passion is
to rationalize being used as pawns for corrupt lobbyists.

I implore you to Deny the rate increase to keep those
monstrosities of the obsolete ^{ancient COAL} "technology" patched up. I
pay my bill to First Energy and can't believe they are
still antiquated after 50 yrs of pollution being targeted, and
45 years after the Cuyahoga River Fire made Cleveland, Ohio
the poster child for a toxic environment. Surely someone
in charge is capable of justifying a profitable scam that
at least upgrades our technology.

My adult children don't plan to give us grandchildren
but all four of us have excellent voting records and are civic
minded. I suggest that a further postponement and bail-
out of such corrupt proposals be denied. All but the elite in
Ohio are feeling betrayed for the future of the children and
grandchildren and are looking for institutions to blame.

It's time for you to stand up for the good future of Ohio.
Please help us to start making thoughtful decisions.

Please Vote Against First Energy 14-1297-EL-SSO and
know that unborn generations are affected by your civic
sense of responsibility. Deny the rate increase for their mistakes.

Thank you every much,

1. Janet King

Bay Village, OH 44140

Dear Pucc,

My name is Jonathan Grco and I have been an Ohio resident for over 10 years. I am a married man with 2 healthy young children, and have made a promise to myself and them to do all in my power to always keep them that way. Poor air quality goes against this promise.

With my job I literally travel the world and see how different parts of the US handle air quality. In China I see everyone wearing masks and am frightened by that thought right here in Ohio.

Please do all you can to not keep Ohio as one of the more polluted states (air quality wise). I explore you to make the necessary moves to do whatever is necessary so we don't even have to see our own children in masks, with debilitating lung issues.

I sincerely thank you for your time on this important issue.

Sincerely, Jonathan Grco

11/21/2014

To whom it may concern,
Please deny the rate increase
to lock consumers into buying
power from Ohio's oldest,

Columbus, Ohio 43215

Attn: case 14-1297-EL-SSO

Dear Sirs & Madams:

We are long-time ratepayer of Northeast Ohio's electric utilities. Thanks to Ohio Citizen Action, we are again reminded of the PUCO's inability to stand up to the rich and powerful utilities and your unwillingness to represent the vast majority of private citizens who deeply desire to live in a cleaner world. Please help us fight the utilities!

I can't stand the thought of you allowing the various utilities to again force us to pay extra for dirty power from coal & oil-powered generating plants which are well outdated. Even Davis-Bessie and Perry are outmoded, poorly run and maintained and must be closed immediately. As a former nuclear engineer with the US Navy, I know whereof I speak.

Please deny the rate increase and agreement to lock us into power from Ohio's oldest, dirtiest plants.

I pay my bill to First Energy (Cledo), the case number being 14-1297-EL-SSO. Many western/European countries are far beyond Ohio in investment of new, renewable wind and solar. I strenuously object to the concept of a "non-bypassable" charge for expensive, dirty power just so robber barons can line their purses at our expense.

Society must act to fight global warming, whose terrible consequences are increasing yearly (go ahead! buy some coastal beach-front property!!) due to increased greenhouse gases which the utilities emit and due to environmental pollution from coal & oil & gas mining which foul our earth and water. Valuable changes can and must be made! Thirty years ago, my in-law's house in Vermont (plenty cloudy!) had a solar hot water system on the roof which provided unlimited free hot water year round. What a savings on gas and electricity!

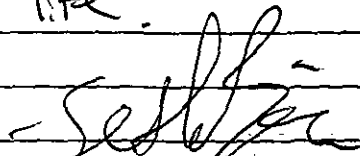

Please help save Ohio & the good 'ol USA. Your offspring will thank you as will I.

To whom it may concern,

Please deny the rate increase to lock consumers into buying power from Ohio's oldest dirtiest coal plants. As an Ohio public utility customer for over 20 years, I feel that this plan is short-sighted. It comes off as a reward for short term thinking.

This rate increase merely delays an inevitable upgrade and retooling of our power plants. This should be happening now, or, at a minimum, ~~the~~ Duke Energy, AEP and First Energy should ^{be} presenting plans for change.

The responsible plan in this situation is to deny this rate increase until the companies present a plan for reducing toxic emissions and modernizing their plants.

Re: Requested and proposed bailout of Ohio's outdated coal plants

Raising utility rates that lock consumers into buying power from Ohio's oldest, most polluting coal plants goes against the ecological health of all of our environment. The state, as well as the world, is on a path of environmental destruction that at some point will ignore who has big bucks to protect his insular world. We are all connected.

A bailout of obsolete, polluting technology only benefits utility shareholders for the moment while delaying practical and likely eventual investment in efficiency and renewable energies.

Please deny this rate increase.

My family and I care deeply about reducing toxic pollution while saving money on our electric bills. I care about this issue as an opportunity for Ohio to take a step in the direction of responsible stewardship of our environment. It seems to make sense that utility companies would wish to participate in responsible and renewable energies for our near and later futures and not be fearful of changes that all may benefit from.

I pay my bill for reliable electric energy. The service I receive includes multiple and lengthy power outages, despite my prompt calling in of "loss of power". If the average customer can someday afford to be "off the grid", utility companies will have only themselves to look for answers.

Respectfully

To whom it may concern:

I am writing to you to express my firm and strong belief of the importance of *supporting initiatives and measures that encourage development of renewable sources of energy* such as wind and solar, instead of measures that encourage continued use of outmoded technologies such as coal and natural gas-fired power plants. I am an opponent of technologies such as fracking, which simply delay the adoption of clean energy technologies-a change that we must accept and embrace sooner or later.

In the interest of a change to the use of clean energy, I would like to request that you deny the rate increase requested by Duke Energy, AEP, and FirstEnergy, which is intended to further delay progress toward a switch to renewable sources of energy, and transfer to the consumer the cost of keeping outmoded technologies in service.

It is high time to stop bailing out old, inefficient power plants, and to instead, make a switch to technologies that produce power in a way that is both clean and sustainable. The future of our children and grandchildren depend on it.

Attention case Number 14-1297-El-SSO

Public Commission of Ohio,

My name is Katie Raith & my family and I are lifelong residents of Aurora OH. Our Ohio roots are important to us, & we want to keep Ohio clean & beautiful — not a top producer of toxic pollution.

Also as lifelong Ohioans, I find it inevitable & unjust for a rate increase that lends support to outdated & inefficient coal plants. Ohio as a whole needs to look forward to a cleaner, "greener" future & leave antiquated coal plant technology in the past.

Please look beyond making dirty money at the cost of our quality of life. We all deserve clean air!

In hopes of compelling PUCO to do the right thing,
I thank you for your time

Sincerely

K. Raith

Attention: Case number
14-1297-EL-SSO
180 East Broad St.
Columbus, OH 43215

The environment & reducing toxic pollution in exchange for clean energy is foremost on my list of priorities & concerns. Money* should not be spent on maintenance of outdated & inefficient coal plants. This money should be spent on research & development of clean & green efficient plants & procedures.

Respectfully,

Lafayette Citizen

* Money - Profits from consumer rate increases

I believe my rates are high enough as is, and
don't believe, they should be raised. Especially
if the extra revenue doesn't go towards new
sustainable energy facilities.

Thank you,

17433 Woodford Ave

Columbus, OH 43215

I am writing to advise you that as a
consumer of The Illuminating Company, a trust energy
company, I do not feel ~~we~~ that PUCO should
institute a bailout of the state's
outdated coal plants. My family
and I care about reducing toxic
pollution and saving money on
our electric bills. Furthermore,
I am in support of clean energy
now and for our future generations.

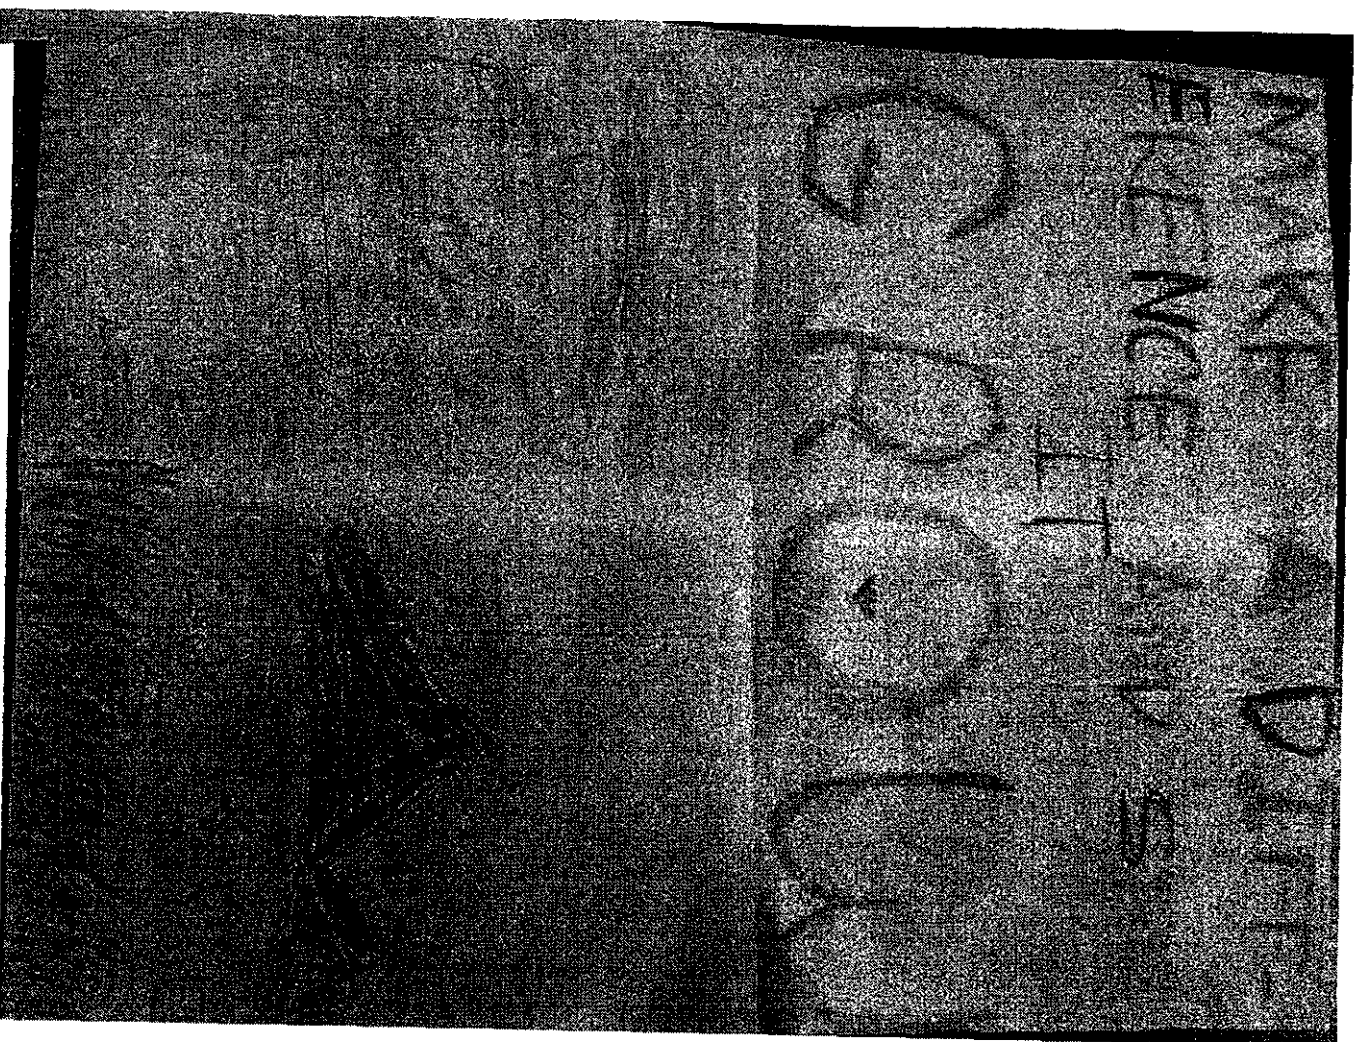

Please deny the rate increase that
is being imposed to lock consumers
into buying power from Ohio's oldest,
dirtyest coal plants.

Your support on this matter is greatly
appreciated. ✓

Thank You,

Victoria Gonzalez
