To whom it may concern:

Case # 14-0841 E-SSU

As both a concerned citizen and Steward of the environment, I am adamantly opposed to the support of the coal utility industry and it's resultant cost in taxpayer dollars and most importantly the cost to our environment.

I would very much like to leave a cleaner and safer environment to my children and subsequent generation of kids.

There are cleaner and safer alternatives to coal fired power utilities, and suggest we spend our taxpayer dollars supporting those cleaner technologies.
