PUCO

This letter is regarding case number 14-0841EL-SSO.

I am highly opposed, as a tax payer, to the proposed bailout of inefficient coal plants. I resent that we will be asked to cover costs for coal plants that are ineffective and are destructive to our environment. I would like to think that Ohio is a forward-thinking state that is looking for clean, efficient ways to produce renewable energy, rather than a backward state that is still pouring my tax dollars into old inefficient ways of producing energy.

I encourage a denial of the rate increase to maintain an old, polluting technology. I hope that instead a more promising solution will be explored. One that is good for the people of Ohio and for our environment.

Sincerely,

Maggie Morrison
126 W. N. College St.
