

**BEFORE  
THE PUBLIC UTILITIES COMMISSION OF OHIO**

In the Matter of the Application of	)	
Vectren Energy Delivery of Ohio, Inc.	)	Case No. 15-0865-GA-RDR
for Authority to Adjust Its Distribution	)	
Replacement Rider Charges.	)	

**APPLICATION**

Vectren Energy Delivery of Ohio, Inc. (VEDO or the Company) respectfully requests that the Commission approve an adjustment to its Distribution Replacement Rider (DRR) charges as described and supported herein. In support of this Application, VEDO states:

1. VEDO is an Ohio corporation engaged in the business of providing natural gas distribution service to approximately 314,000 customers in west central Ohio and, as such, is a “natural gas company” and “public utility” as defined by R.C. 4905.03(E) and 4905.02(A), respectively.

2. On January 7, 2009, in Case No. 07-1080-GA-AIR, the Commission first approved the DRR to recover the costs of VEDO’s accelerated bare-steel and cast-iron replacement program (the Replacement Program). The DRR was approved to be in effect for a five-year period ending in February 2014 beginning on the date rates approved in that case were implemented.

3. On August 22, 2013, in Case No. 13-1571-GA-ALT, VEDO filed an application to expand the scope of the Replacement Program and to extend the DRR to recover the associated costs incurred through the end of calendar year 2017. On January 17, 2014, VEDO and the Commission’s Staff entered into a Stipulation and Recommendation (the 13-1571 Stipulation), which the Commission approved in an Opinion and Order dated February 19, 2014 (the 13-1571 Order).

4. On August 27, 2014, in Case No. 14-813-GA-RDR, the Commission approved VEDO's application that established the current DRR charges. Those charges became effective on September 1, 2014.

5. As approved under the 13-1571 Order, VEDO proposes for recovery through the DRR the following costs that were incurred in 2014:

- The cost of replacing and retiring bare-steel and cast-iron mains and bare-steel service lines;
- The cost of replacing and retiring field-coated steel pipe that was installed prior to 1955;
- The cost of replacing, retiring, and testing field-coated steel pipe installed beginning in 1955 and prior to 1971 and that failed a cathodic-protection test;
- The cost of replacing and retiring obsolete pipe and appurtenances that were encountered within the context of a main replacement project undertaken as part of the Replacement Program;
- The cost of replacing and retiring vintage plastic pipe that was encountered within the context of a main replacement project undertaken as part of the Replacement Program, to the extent that the total footage of vintage-plastic-pipe replacement did not exceed five percent of total replacement program footage in 2014;
- The cost of replacing and retiring segments of interspersed plastic pipe, under the following conditions:
  - For any individual segment of plastic pipe that meets the length and diameter limitations set forth in ¶ 5 of the 13-1571 Stipulation, such costs shall be included;
  - For segments of interspersed plastic pipe in excess of the limitations set forth in ¶ 5 of the 13-1571 Stipulation, such costs may be included unless it is shown that it was less economical to replace the segment than to tie it into the existing plastic segment;
- The cost of replacing segments of pipe that included target pipe where (a) VEDO's pipe was in a public right-of-way, (b) VEDO was required to relocate its facilities at the request of a governmental entity, and (c) the plastic pipe associated with the relocation was less than or equal to 25 percent of the total footage of that governmental relocation; and
- The incremental costs of assuming ownership and repair of customer service lines.

(13-1571 Stipulation at 2–4.)

6. The 13-1571 Stipulation provided that VEDO would work with Staff to agree on a methodology that accurately identified VEDO’s actual incremental service-line costs and investment. (*Id.* at 3–4.) In Case No. 14-813-GA-RDR, following discussions with Staff, VEDO proposed a methodology to accurately identify actual incremental service-line costs and investments. Staff recommended approval of VEDO’s 14-813 Application, including the treatment of service lines, without modification (*see* Staff Comments at 4–5), and the Commission approved. *See* 14-813 Opin. & Order at 3–4 (Aug. 27, 2014). As described in the Direct Testimony of James M. Francis, VEDO’s Application in this case uses the same methodology approved in Case No. 14-813-GA-RDR.

7. Costs recoverable in the DRR have been offset by operations and maintenance (O&M) savings, which were determined by adding together (*a*) a baseline credit of \$294,116 and (*b*) a credit of \$5,882 per mile of bare-steel and cast-iron main replaced (collectively, O&M Savings Credit). Given that VEDO replaced a cumulative 88.60 miles of bare-steel and cast-iron main in 2013-2014, the O&M Savings Credit is \$815,261. VEDO also calculated actual O&M savings by comparing actual O&M costs to the O&M baseline established in Case No. 07-1080-GA-AIR and used in previous annual DRR filings, but this amount was \$44,876 and thus less than the O&M Savings Credit.

8. VEDO requests that the Commission establish the revised DRR charge to be effective on September 1, 2015, for the subsequent 12-month period and that this application not be considered an application to increase rates and charges.

9. As a part of this application, VEDO is required to provide support for the following:

- The return of and on the plant investment, inclusive of capitalized interest or post-in-service carrying costs charges (PISCC). PISCC shall be accrued and recovered at the rate of 7.02% for the accumulated infrastructure investment amounts in the DRR from the date that the applicable assets are placed in service until the effective date of the next subsequent DRR;
- The incremental costs of assuming ownership and repair of customer service lines as described in the rate case application;
- The incremental revenue requirement for the year and for each component of the DRR;
- A summary of its construction plans for the next year, including expected investment, expected location of the infrastructure replacement work, and the expected miles to be replaced; and
- The calculation of the O&M Savings Credit and of actual annual savings of O&M expenses compared to the O&M baseline established in Case No. 07-1080-GA-AIR.

(13-1571 Stipulation at 2, 4.)

10. In accordance with the 13-1571 Stipulation, VEDO shall bear the burden of proof of demonstrating the justness and reasonableness of the level of recovery proposed in this case and shall support the adjustment to the annual revenue requirement for increases or adjustments to the then-existing DRR charge. (*Id.* at 2.)

11. In order to demonstrate the justness and reasonableness of the proposed DRR charges and to support the proposed adjustment to the underlying annual revenue requirement, VEDO submits the following exhibits:

- VEDO Exhibit 1.0: Direct Testimony and Exhibits of James M. Francis;
- VEDO Exhibit 2.0: Direct Testimony and Exhibits of J. Cas Swiz; and
- VEDO Exhibit 3.0: Direct Testimony and Exhibits of Scott E. Albertson.

12. The data and information contained in the Application and supporting testimony support the following revised DRR charges:

Rate Schedule	\$ Per Month	\$ Per Ccf
310, 311 and 315	\$4.79	
320, 321 and 325 (Group 1)	\$4.79	
320, 321 and 325 (Group 2 and 3)		\$0.03578
341	\$26.09	
345		\$0.00889
360		\$0.00679

The proposed DRR charge applicable to residential and small general service (Group 1) customers complies with the rate cap of \$5.45 per month applicable to those same customers during the period September 1, 2015 through August 31, 2016. (13-1571 Stipulation at 4.)

13. A redlined and clean revised tariff Sheet No. 45, Ninth Revised Page 2 of 2, which reflects the revised DRR charges, is included as Exhibit No. SEA-2 to the Direct Testimony of Scott E. Albertson.

WHEREFORE, VEDO respectfully requests that the Commission approve the DRR charges, approve the proposed Sheet No. 45, Ninth Revised Page 2 of 2, and grant all other necessary and proper relief.

Dated: May 1, 2015

Respectfully submitted,

/s/ Andrew J. Campbell

Delivery of Ohio, Inc.

1 **Direct Testimony of**  
2 **James M. Francis**

3 **I. INTRODUCTION**

4 **Q1. Please state your name, business address and occupation.**

5 A. My name is James M. Francis. My address is One Vectren Square, Evansville, Indiana,  
6 and I am Director of Engineering & Asset Management for Vectren Utility Holdings, Inc.  
7 (VUHI), the immediate parent company of Vectren Energy Delivery of Ohio, Inc.  
8 (VEDO or the Company).

9 **Q2. What are your duties in your present position?**

10 A. I have responsibility for engineering and technical support for VEDO utility operations.  
11 My specific responsibilities include System Design and Planning, Corrosion Control,  
12 Project Engineering, Compliance, Standards, Asset Management, Pipeline Integrity  
13 Management, and Capital Planning and Management. Additionally, I am responsible for  
14 identifying and implementing many of VEDO's asset management programs.

15 **Q3. Please describe your work experience.**

16 A. I have been employed by VEDO since April 8, 2004, as the Director of Technical  
17 Services. My title has subsequently been changed to Director of Engineering & Asset  
18 Management. I have been employed with VEDO since the purchase of the gas assets of  
19 the Dayton Power & Light Company by Vectren Corporation in 2000. Immediately prior  
20 to my current position, I was the Regional Manager of the Troy Operating Region with  
21 responsibility for field operations. I also held other positions at VEDO including  
22 Planning Manager and Measurement Supervisor. Prior to my employment with VEDO,  
23 in 1991, I became an employee of Dayton Power & Light serving as a Project Engineer,  
24 System Planner and Measurement Supervisor.

1 **Q4. What is your educational background?**

2 A. I received a Bachelor of Science in mechanical engineering from the University of  
3 Dayton in 1993. I received a Masters in Business Administration from The Ohio State  
4 University in 2000.

5 **Q5. Are you involved in any gas industry association activities?**

6 A. Yes. I am active in the American Gas Association's (AGA) Operating Section. I am  
7 currently a member of the AGA's Distribution and Transmission Engineering  
8 Committee.

9 **Q6. Have you previously testified before this Commission?**

10 A. Yes. I testified in VEDO's most recent general rate case, Case No. 07-1080-GA-AIR  
11 (the Rate Case), in support of the need for recovery of certain costs under the Distribution  
12 Replacement Rider (DRR) proposed in that proceeding. I also testified in VEDO's 2010  
13 DRR proceeding, Case No. 10-0595-GA-RDR, its 2011 DRR proceeding, Case No. 11-  
14 2776-GA-RDR, its 2012 DRR proceeding, Case No. 12-1423-GA-RDR, its 2013 DRR  
15 proceeding, Case No. 13-1121-GA-RDR, and its 2014 DRR proceeding, Case No. 14-  
16 0813-GA-RDR, plus the DRR extension, Case No. 13-1571-GA-ALT.

17 **Q7. What is the purpose of your testimony in this proceeding?**

18 A. First, I will provide details on the progress of VEDO's accelerated bare steel and cast iron  
19 replacement program (the Replacement Program). I will discuss the status of pipe  
20 replacement and retirement, the costs incurred, and the benefits identified in 2014. I will  
21 discuss certain other issues, such as meter relocations and plastic pipe retirements, and  
22 how these are addressed within the Replacement Program. I will discuss the processes  
23 used to assess and award the construction work associated with the Replacement  
24 Program. I will conclude this section by discussing the 2015 replacement plan.

1           The second portion of my testimony will discuss VEDO's experience with the  
2 change in service line ownership and responsibilities which took effect in 2009 and  
3 VEDO's incremental investments in 2014 that resulted from this change.

4           The final portion of my testimony will discuss the calculation of operations and  
5 maintenance (O&M) savings under the Stipulation approved in Case No. 13-1571-GA-  
6 ALT (the 13-1571 Stipulation).

7 **Q8. What Exhibits are you sponsoring in this proceeding?**

8 A. I am sponsoring the following exhibits:

- 9       • Exhibit No. JMF-1 – 2014 VEDO Replacement Program Progress
- 10      • Exhibit No. JMF-2 – 2014 VEDO Plastic Main Retirement Causes
- 11      • Exhibit No. JMF-3 – VEDO 2015 BS/CI Replacement Plan
- 12      • Exhibit No. JMF-4 – VEDO 2014 Service Replacement Cost Summary
- 13      • Exhibit No. JMF-5 – VEDO Service Replacement Unit Rates and Cost Allocations
- 14      • Exhibit No. JMF-6 – VEDO 2014 Service Replacement Work Order Detail & Cost  
15        Allocation
- 16      • Exhibit No. JMF-7 – VEDO Operating & Maintenance Savings Calculation Per 13-  
17        1571 Stipulation
- 18      • Exhibit No. JMF-8 – VEDO 2014 Maintenance Expense - BS/CI & Service Line  
19        Ownership
- 20      • Exhibit No. JMF-9 – VEDO Replacement Program Cost Savings 5 Year History

1 **II. BARE STEEL AND CAST IRON REPLACEMENT PROGRAM**

2 **Q9. Please provide a brief description of VEDO’s Replacement Program.**

3 A. As of the end of 2013, VEDO had a total of 404 miles of bare steel and 141 miles of cast  
4 iron main remaining in its system. Starting in 2014 and going forward through the  
5 completion of the program, VEDO plans to retire between 45 and 60 miles of bare steel  
6 or cast iron mains annually.

7 **Q10. How much bare steel and cast iron infrastructure did VEDO retire in 2014 as part**  
8 **of the Replacement Program?**

9 A. In 2014, VEDO retired 44.8 miles under the Replacement Program, including 42.1 miles  
10 of bare steel and 2.7 miles of cast iron mains for projects placed in service in 2014.  
11 Additionally, VEDO had in progress projects to retire an additional 4.8 miles of bare steel  
12 or cast iron main. These projects in progress will be placed in service during early 2015,  
13 and will be included in subsequent DRR filings. Together, this mileage is comparable to  
14 the 47 miles planned for 2014, as discussed in my testimony in last year’s update filing.  
15 VEDO also retired 5,282 service lines, with 5,052 of those being replaced for projects  
16 placed in service in 2014.

17 **Q11. Is VEDO still targeting the completion of the Replacement Program by the end of**  
18 **2023?**

19 A. Yes. VEDO expects to complete the retirement of the remaining bare steel and cast iron  
20 mains by the end of 2023. Although VEDO substantially met its mileage targets for  
21 2014, it would have completed even more investment, but was impacted by the polar  
22 vortex and the extreme cold weather, which delayed much of the construction early in the  
23 year. By contrast, VEDO is significantly ahead of last year’s construction activity for  
24 work being completed in 2015.

1 **Q12. How much did VEDO invest in the Replacement Program in 2014?**

2 A. As identified by VEDO witness J. Cas Swiz, VEDO's Replacement Program investment  
3 for projects placed in service in 2014 was \$32,710,362. Exhibit No. JMF-1 provides a  
4 detailed list of bare steel and cast iron, and ineffectively coated steel projects placed in  
5 service under the Replacement Program in 2014, the costs of each project as of December  
6 31, 2014, and the amount of pipe (main footage and number of service lines) retired and  
7 replaced. For some projects placed in service in 2014, additional trailing charges (such as  
8 restoration costs) will be incurred in 2015. These costs will be included in a future DRR  
9 filing.

10 **Q13. Were any of the projects completed as part of the Replacement Program in 2014 the**  
11 **result of a public improvement project?**

12 A. Yes. Three projects included in the 2014 Replacement Program originated as a result of a  
13 public improvement project: specifically, project groups V-1032, V-1044, and V-839  
14 which are included in the list of completed projects in Exhibit No. JMF-1.

15 **Q14. Was the footage of plastic pipe retired on projects V-1032, V-1044, and V-839 less**  
16 **than or equal to 25% of the total footage of those government projects?**

17 A. Yes. The footage of plastic pipe retired on the three projects was well less than 25% of  
18 the total footage relocated on these projects. The specific footage retired on these  
19 projects may be found in Exhibit No. JMF-1.

20 **Q15. Did VEDO retire any plastic main as part of the Replacement Program in 2014?**

21 A. Yes. VEDO retired a total of 13,753 feet of plastic main within the replacement projects  
22 completed in 2014. There were a number of reasons why plastic main segments were  
23 retired, which were discussed in my testimony in the Rate Case. Some short segments of  
24 plastic main existed within the bare steel or cast iron systems. It would have been more  
25 costly to attempt to salvage that main than to replace it. Also, some sections of plastic

1 main at the ends of distribution systems were retired because those segments no longer  
2 served any customers and there was no reason to continue to maintain them.

3 Additionally, some sections of plastic main failed pressure tests and needed to be  
4 replaced. Exhibit No. JMF-2 provides a brief description of the cause of retirement of  
5 plastic for each applicable project.

6 **Q16. Were any of the plastic segments retired considered “Vintage Plastic”?**

7 A. No. While VEDO has retired segments of vintage plastic pipe during prior Replacement  
8 Program projects, none of the segments retired in 2014 were of this material type.

9 **Q17. The Stipulation approved in Case No. 13-1571-GA-ALT provided that VEDO may**  
10 **recover the costs of replacing and retiring individual segments of plastic pipe that**  
11 **exceeded certain diameter and length criteria, unless it is shown that it was less**  
12 **economical to replace the segment than to tie it in. Did any segments of plastic pipe**  
13 **exceed the criteria provided in the Stipulation?**

14 A. Yes. Exhibit No. JMF-2 identifies the plastic pipe retired on each project (where  
15 applicable) and identifies the length of each individual segment. VEDO had six projects  
16 in which it retired a segment of 2-inch plastic pipe longer than the applicable criterion of  
17 435 feet, and one project in which it retired a segment of 4-inch plastic pipe longer than  
18 the applicable criterion of 365 feet, for a total of seven projects that exceeded diameter  
19 and length criteria. Three of these seven projects, however, were pipeline retirements  
20 only, and thus did not involve pipeline replacement.

21 **Q18. Was it more economical to replace segments associated with the four projects**  
22 **involving pipeline replacements than to tie them into the existing system?**

23 A. Yes. Projects V-1044, V-809, and V-817 had sections of existing plastic mains and  
24 service lines that were scheduled to be pressure tested so that they could operate at a  
25 higher pressure. In each case, the existing plastic pipe failed under the required pressure  
26 test. Given that specific leak locations could not be readily identified, it was more cost

1 effective to replace the plastic segment than to locate and remediate the respective leaks.  
2 Project V-1020 involved the required replacement of a plastic segment due to an  
3 identified issue where the gas main was in conflict with the sewer and was buried at a  
4 depth that made it susceptible to excavation damage. This replacement was conducted to  
5 mitigate the risk of third-party damage, particularly with the system operating at a higher  
6 pressure. Thus, tying the existing line into the system was not an economical option for  
7 this project.

8 **Q19. Did VEDO move any meters outside as part of the Replacement Program?**

9 A. Yes. VEDO moved 3,637 meters outside in 2014. Because the newly installed mains  
10 operate at a higher pressure (requiring the installation of a service regulator), the cost  
11 associated with moving the meters outside was less than if the meter remained inside and  
12 the necessary service regulator was installed outside. In addition to better utilization of  
13 VEDO's capital, moving the meters outside should improve operational efficiency  
14 associated with future meter order work and will eliminate the need for inside  
15 atmospheric corrosion inspections. VEDO has employed this meter move-out approach  
16 since the Replacement Program was first implemented.

17 **Q20. Does VEDO believe that the Replacement Program is achieving or will achieve the**  
18 **expected benefits?**

19 A. Yes. VEDO expects to continue to experience improved service reliability and safety  
20 through the reduction of leakage and the replacement of the mains and service lines that  
21 contribute most to system leaks. Proactive replacement of this pipe, moving meters  
22 outside, and retiring the older assets will drive workforce efficiencies. The Company was  
23 able, in 2014, to achieve improved capital utilization by retiring more existing main  
24 infrastructure than it was necessary to replace. Customers and property owners will

1 experience a reduction in the number and frequency of disturbances and inconveniences  
2 (such as leak repair, service interruptions, etc.) as the older sections of main are retired.  
3 VEDO has historically repaired approximately one leak per mile per year on the bare  
4 steel and cast iron mains retired. Additionally, as quantified below, there are active leaks  
5 and meter orders that will be eliminated as a result of replacing bare steel and cast iron  
6 infrastructure. Reducing active leaks is necessary to address lost and unaccounted for  
7 gas. Finally, VEDO expects long term benefits in terms of reduced impacts on the  
8 communities where public infrastructure improvements may occur after these projects are  
9 completed.

10 **Q21. What operational benefits did VEDO achieve as a result of the Replacement**  
11 **Program in 2014?**

12 A. There are a number of operational benefits that VEDO has achieved as a result of the  
13 Replacement Program.

14 The replacement of bare steel and cast iron infrastructure removes active leaks in  
15 VEDO's system, is expected to reduce the occurrence of future leaks and leak repair  
16 work, and will reduce interruptions, inconveniences and disturbances to customers.  
17 Specifically, the replacement of bare steel and cast iron infrastructure from 2014 have  
18 allowed VEDO to eliminate 242 active leaks on the affected assets, of which 82 would  
19 have required a more immediate and less efficient repair.

20 Over the past 8 years, the Company has experienced an average of 411 asset  
21 condition related meter orders on the types of assets that were replaced in 2014. VEDO  
22 will experience a reduction in the number of these meter orders (Outside Gas Leak, Gas  
23 Emergency, Water in Line, and No Gas orders) through the retirement of bare steel and  
24 cast iron infrastructure.

1 As stated above, VEDO moved 3,637 inside meters outside. This will eliminate  
2 the requirement for a separate atmospheric corrosion check.

3 Certain system components that had been used to address issues associated with  
4 assets in poor condition have been eliminated, such as the 116 drips used to remove water  
5 from low pressure mains.

6 Additional operational efficiencies come as a result of the retirement of regulator  
7 stations, valves, casings, test stations for cathodic protection, and reduced frequency of  
8 leak surveys.

9 Ultimately, these types of improvements provide reliability and safety benefits to  
10 VEDO's customers or property owners that live in the vicinity of the replacement  
11 projects.

12 **Q22. Did VEDO derive cost savings from the 2014 replacement projects?**

13 A. Yes. Quantification of the savings achieved in 2014 under the guidelines approved in  
14 Case No. 13-1571-GA-ALT will be discussed later in my testimony.

15 **Q23. Were the construction projects within the 2014 Replacement Program competitively**  
16 **bid?**

17 A. Yes.

18 **Q24. How were the bid packages organized, bid, and awarded?**

19 A. Based on the geographical location of the projects, VEDO divided the planned 2014  
20 projects into 20 bid packages. Contractors that either received a small entry level  
21 package in 2013 or did not complete a BS/CI project in 2013 were eligible to bid on all  
22 work but were only awarded a certain amount to monitor growth. All contractors could  
23 bid on any of the 20 packages but were not required to bid on all packages. Each bid  
24 package was independently evaluated.

1 Four different construction contractors were invited to provide bids for the  
2 work. Information was provided on each project, and contractors had an opportunity to  
3 ask questions with regard to the work to be performed and the bids to be submitted. Each  
4 contractor was provided with copies of prints for all of the projects and given time to visit  
5 the project sites prior to submitting bids.

6 Bids were submitted based on unit pricing; that is, a fixed price for a given unit of  
7 work to be performed. VEDO used the unit prices and the estimated work units for each  
8 project to create comparative cost estimates. These comparative estimates were then  
9 summarized for each bid package. Each package was evaluated based on overall cost,  
10 and the contractor's capacity. If a contractor submitted bids on several projects, the  
11 contractor's capacity was evaluated to ensure that the potential award did not exceed their  
12 capacity.

13 **Q25. What is VEDO's replacement plan for 2015?**

14 A. VEDO's planned replacement projects for 2015 are identified in Exhibit No. JMF-3. In  
15 2015, VEDO plans to spend approximately \$35 million on bare steel and cast iron  
16 projects, retiring approximately 53 miles of bare steel and cast iron main, along with the  
17 bare steel service lines served from those mains. In addition, approximately 4.8 miles of  
18 bare steel and cast iron main will be retired along with the 2015 retirement plan from  
19 projects started in 2014. As was the case in 2014, VEDO reserves the right to modify the  
20 plan as necessary, including to accommodate higher priority projects as circumstances  
21 may change throughout the year.

1 **Q26. Is VEDO also planning on replacing some ineffectively coated steel pipelines in its**  
2 **2015 Replacement Program?**

3 A. Yes. In 2015, VEDO plans to spend approximately \$2.8 million under the Replacement  
4 Program to replace approximately 5.1 miles of ineffectively coated steel mains. A list of  
5 those projects can be found in Exhibit No. JMF-3.

6 **III. SERVICE LINE RESPONSIBILITY**

7 **Q27. How does VEDO view the transition to service line responsibility?**

8 A. VEDO continues to view the transfer of service line responsibility to the Company as a  
9 positive for both the Company and its customers. In general, VEDO's assumption of  
10 service line responsibility has been a benefit to its customers. Customers no longer are  
11 required to schedule the services of a plumber to repair or replace their service line,  
12 minimizing inconvenience and out of pocket costs for customers. VEDO's response  
13 times to leak calls and its repair activities reduce the amount of time customers are out of  
14 service, which also aligns with Ohio's minimum gas service standards. The Company's  
15 ability to adjust to an ever-changing schedule to meet the needs of customers has also  
16 been a benefit. Also, confusion over customer responsibility for the service line has been  
17 essentially eliminated because there is now a clear delineation of responsibility between  
18 the customer and VEDO. VEDO continues to respond to numerous leak calls, many on  
19 bare steel or ineffectively coated steel service lines that have required replacement.  
20 Because VEDO (and its customers) have a significant number of aged service line assets,  
21 the annual amount of service line replacements is significant and will remain so for the  
22 foreseeable future.

1 **Q28. Does VEDO continue to experience incremental costs as a result of assuming service**  
2 **line responsibility?**

3 A. Yes. VEDO continues to repair a number of gas leaks on the portion of the buried  
4 service line and the above-ground meter setting that had previously been maintained by  
5 the customer. Incremental capital replacement costs related to service line responsibility  
6 are included in Witness Swiz's DRR revenue requirement. The incremental O&M  
7 expenses will be discussed later in my testimony.

8 **Q29. Has VEDO devoted incremental investment to the replacement of service lines?**

9 A. Yes. When VEDO assumed responsibility for the replacement of service lines, which  
10 includes the portion of the service line beyond the curb valve (formerly the customer's  
11 responsibility for installation or replacement), it began incurring incremental investments.

12 **Q30. Can you explain how VEDO identified its actual incremental service line costs?**

13 A. Yes. The first step identified portions of the service line representing incremental  
14 investment for VEDO. Figure 1 below is a drawing of a standard service line. The entire  
15 service line runs from the main to the meter setting, and the drawing shows the three  
16 distinct segments of the line: the portion from the main to the curb valve; the portion  
17 from the curb valve to the meter; and the meter setting.

Figure 1: Standard Service Line Installation

1

2 **Q31. What types of service line replacements does VEDO perform, and which**  
 3 **replacements represent incremental investment?**

4 A. There are four types of service line replacements that VEDO may perform, which  
 5 correspond to the service line and individual segments described above.

6 A Main to Meter replacement means that the entire service line is replaced from  
 7 the connection at the main, beyond the curb valve, to the outlet side of the meter setting.  
 8 Only a portion of this type of replacement is incremental, namely, from the curb valve to  
 9 the outlet of the meter setting.

10 A Main to Curb Valve replacement replaces the service line from the connection  
 11 at the main to the outlet side of the curb valve and is *not* an incremental investment.

12 A Curb Valve to Meter Setting replacement replaces the service line from the  
 13 outlet side of the curb valve to the inlet side of the meter setting and is entirely

1 incremental. Prior to VEDO's assumption of responsibility for service lines, the  
2 customer would have borne the cost for this type of replacement.

3 A Meter Setting replacement replaces the service line from the inlet side of the  
4 meter setting through the meter bar to the connection with the customer's fuel line and is  
5 entirely incremental. Prior to VEDO's assumption of responsibility for service lines, the  
6 customer would have borne the cost for this type of replacement.

7 **Q32. Not including service lines that were part of Replacement Program projects, how**  
8 **many service lines did VEDO replace in 2014, and what segments of the line were**  
9 **replaced?**

10 A. In 2014, VEDO replaced all or part of 2,140 service lines. This represents an increase  
11 from prior years. The breakdown of service replacement types were as follows:

Service Line Replacement Type	Quantity
Main to Meter Setting	1,244
Curb Valve to Meter Setting	573
Meter Setting	177
Main to Curb Valve	146
<b>Total</b>	<b>2,140</b>

12  
13 VEDO invested \$10,582,748 in the replacement of these service lines.

14 **Q33. What caused VEDO to increase the number of service replacements in 2014 over**  
15 **prior years?**

16 A. Primarily, the identification of leaks led to the service replacements. VEDO anticipates it  
17 will continue to see an increase in service replacements. VEDO is evaluating strategies  
18 to enable it to stay on top of the increases in leaks.

19 **Q34. Is only a portion of the \$10,582,748 invested in the replacement of service lines an**  
20 **incremental investment?**

21 A. Yes. Because many of the replacements involved the Main to Curb Valve portion of the  
22 service line, only a portion of this investment is incremental. Exhibit No. JMF-4

1 provides a summary of the 2014 investments in service line replacements, identifying  
2 both the incremental and non-incremental investments by replacement type. In 2014,  
3 VEDO's incremental investment in service line replacements was \$5,617,793.

4 **Q35. How did VEDO identify 2014 incremental investment in service line replacements?**

5 A. VEDO identified incremental investment through a detailed review of service line  
6 replacement work orders, through which it determined both how many orders pertained  
7 to the various segments of the service line (Main to Meter Setting, Main to Curb Valve,  
8 Curb Valve to Meter Setting, or Meter Setting) and how much of the investment should  
9 be considered fully incremental, partially incremental, or non-incremental.

10 **Q36. How did VEDO identify and differentiate the work orders in question?**

11 A. VEDO queried its work management system for all service replacement work orders  
12 completed between January 1, 2014, and December 31, 2014, and compiled them into a  
13 single table in an Excel spreadsheet. It then reviewed each order and identified the type  
14 of service replacement as being one of the following: Main to Meter, Main to Curb  
15 Valve, Curb Valve to Meter, or Meter Setting replacements. This allowed VEDO to  
16 identify whether the service line investment was fully incremental, partially incremental  
17 or not incremental.

18 **Q37. How did VEDO identify the value of the investment associated with each**  
19 **replacement?**

20 A. VEDO used information on each service replacement (primarily work type, length, size  
21 and material) to determine which costs were applicable to each work order.

22 **Q38. How did VEDO determine the applicable costs?**

23 A. Costs for service replacement work are generally based on pre-defined unit rates for  
24 certain activities, such as a cost per foot installed, cost per meter setting installed, and

1 cost for sewer locates. VEDO determined the applicable unit rates by manually  
2 reviewing and identifying the cost categories associated with each job and identifying  
3 which costs were applicable to which type of service replacement. For example, hard  
4 surface removal and restoration is applicable to most Main to Meter and Main to Curb  
5 Valve replacements (older mains are generally under pavement), but not to Curb Valve to  
6 Meter and Meter Setting replacements (which are generally under lawns). In VEDO's  
7 review, it also distinguished between fixed and variable costs and allocated them  
8 accordingly.

9 **Q39. Do the exhibits to your testimony identify each cost type and how it was allocated?**

10 A. Yes. Exhibit No. JMF-5 is a table identifying how each of the various cost types is  
11 allocated to each of the different service replacement types.

12 **Q40. How did VEDO use this methodology to determine the incremental amount of**  
13 **service line investment in 2014?**

14 A. Having identified the applicable unit rates, fixed and variable costs, and appropriate  
15 allocations, VEDO applied them to each service replacement work order to determine the  
16 incremental and non-incremental portion of each investment. Exhibit No. JMF-6  
17 provides a listing of each service line replacement work order with its applicable costs,  
18 identifying the incremental and non-incremental investments on each service line  
19 replacement. The summary of the individual service order costs is included in Exhibit  
20 No. JMF-4.

21 **Q41. Is the methodology described above the same methodology that was used and**  
22 **approved as part of VEDO's filing for recovery of 2013 costs?**

23 A. Yes. VEDO used this same methodology, which was approved during the DRR filing  
24 that occurred in 2014.

1 **IV. OPERATING AND MAINTENANCE SAVINGS**

2 **Q42. Under the 13-1571 Stipulation, VEDO is required to credit the DRR based on one of**  
3 **two savings methods. Did VEDO perform these calculations?**

4 A. Yes. The first method required VEDO to determine an “O&M Savings Credit” by adding  
5 together a baseline credit of \$294,116 and a credit of \$5,882 per mile of bare-steel and  
6 cast-iron main replaced. This calculation resulted in a cumulative O&M Savings Credit  
7 of \$815,261 (43.8 miles in 2013 plus 44.8 miles in 2014 times \$5,882, plus \$294,116).  
8 See Exhibit No. JMF-7 for the calculation of this savings.

9 **Q43. Did VEDO also calculate maintenance savings in 2014 compared to a baseline**  
10 **amount of \$1,192,953?**

11 A. Yes. The 13-1571 Stipulation also required VEDO “to calculate actual O&M savings by  
12 comparing actual O&M costs to the O&M baseline established in the Rate Case and used  
13 in previous annual DRR filings.” VEDO calculated its maintenance expenses incurred in  
14 2014 by the same method it used to calculate the baseline maintenance expense amount  
15 of \$1,192,953. The actual comparable maintenance expenses in 2014 were \$1,148,077  
16 resulting in a cumulative savings against the baseline of \$44,876. This amount is broken  
17 into expense reductions attributable to mains of \$91,407 and expense increases from  
18 service lines, now owned or maintained by VEDO, of \$46,531 for a total savings of  
19 \$44,876. Additionally, VEDO experienced an increase in maintenance expenses of  
20 \$193,901 for those service lines that are not bare steel. Exhibit No. JMF-8 provides the  
21 actual 2014 maintenance expenses and a comparison against the baseline expense  
22 amount. Additionally, this exhibit provides a breakdown of the maintenance expenses  
23 between mains and services.

1 **Q44. What amount of O&M savings does VEDO propose to include as a credit in this**  
2 **DRR filing as a result of the 2014 Replacement Program?**

3 A. Because the O&M Savings Credit is greater than the savings reached under the baseline-  
4 comparison method, VEDO will apply the credit of \$815,261.

5 **Q45. By way of comparison, what does VEDO believe were its actual O&M savings in**  
6 **2014?**

7 A. VEDO believes that its actual O&M savings in 2014 were \$224,589. Exhibit No. JMF-9  
8 provides a breakdown of the cost savings into the various operating or maintenance  
9 categories. The amount of savings resulted in an average per mile savings cost of  
10 \$5,013.15. This amount was arrived at by dividing the annual savings achieved in 2014  
11 (\$224,589) by the mileage retired (44.8).

12 **Q46. How did VEDO calculate this figure?**

13 A. For each of the projects completed in 2014, VEDO was able to identify specific cost  
14 drivers related to regulator stations, casings, valves, cathodic protection reads, residential  
15 leak surveys, service calls, leaks repaired, leaks rechecked, meter move outs, and drips  
16 retired, and tally the quantity of work eliminated as a result of the replacement of these  
17 assets. O&M costs associated with the respective work on these assets (such as an  
18 inspection or a survey) were then summarized into a cost savings by cost driver. As an  
19 example, in 2014, VEDO retired 16 regulator stations. As a result of these retirements,  
20 VEDO will reduce annual costs for conducting regulator inspections by \$12,672 annual  
21 cost savings since the regulators have been retired and thus no longer require inspection.  
22 A similar summary of cost savings was determined for each cost drivers listed above and  
23 can be found Exhibit No. JMF-9.

1 **Q47. Is VEDO proposing only to credit actual savings against the DRR?**

2 A. No. VEDO only notes the actual savings for comparative purposes and to confirm that  
3 the Stipulation is providing real benefits for customers.

4 **Q48. Does this conclude your testimony?**

5 A. Yes.

1 **Direct Testimony of**  
2 **J. Cas Swiz**

3 **I. INTRODUCTION**

4 **Q1. Please state your name and business address.**

5 A. My name is J. Cas Swiz, and my address is One Vectren Square, Evansville, Indiana  
6 47708.

7 **Q2. What position do you hold with Applicant Vectren Energy Delivery of Ohio, Inc.**  
8 **(VEDO or the Company)?**

9 A. I am Director, Regulatory Implementation and Analysis for Vectren Utility Holdings, Inc.  
10 (VUHI), the immediate parent company of VEDO. I hold the same position with two  
11 other utility subsidiaries of VUHI—Southern Indiana Gas and Electric Company d/b/a  
12 Vectren Energy Delivery of Indiana, Inc. (Vectren South) and Indiana Gas Company, Inc.  
13 d/b/a/ Vectren Energy Delivery of Indiana (Vectren North).

14 **Q3. Please describe your educational background.**

15 A. I am a 2001 graduate of the University of Evansville with a Bachelor of Science Degree  
16 in Accounting, and a 2005 graduate of the University of Southern Indiana with a Masters  
17 of Business Administration.

18 **Q4. Please describe your professional experience.**

19 A. From 2001 to 2003, I was employed by ExxonMobil Chemical as a Product and  
20 Inventory accountant. Since 2003, I have been employed with VUHI in various  
21 accounting capacities. In 2008, I was named Manager, Regulatory and Utility  
22 Accounting, and in November 2012, I was promoted to Director, Regulatory  
23 Implementation and Analysis.

1 **Q5. What are your present duties and responsibilities as Director, Regulatory**  
2 **Implementation and Analysis?**

3 A. I am responsible for the financial analysis and implementation of all regulatory initiatives  
4 for VEDO (and VUHI's other utility subsidiaries), as well as the preparation of  
5 accounting exhibits submitted in various regulatory proceedings.

6 **Q6. Are you familiar with the books, records, and accounting procedures of VEDO?**

7 A. Yes, I am.

8 **Q7. Are VEDO's books and records maintained in accordance with the Uniform System**  
9 **of Accounts (USoA) and generally accepted accounting principles?**

10 A. Yes.

11 **Q8. Have you previously testified before this Commission?**

12 A. Yes. I testified in VEDO's 2013 and 2014 DRR proceedings, Case Nos. 13-1121-GA-  
13 RDR and 14-0813-GA-RDR.

14 **Q9. What is the purpose of your testimony in this proceeding?**

15 A. My testimony explains the calculation of the revenue requirement for VEDO's  
16 Distribution Replacement Rider (DRR), which includes the bare steel and cast iron  
17 replacement program (the Replacement Program), the completed natural gas riser  
18 replacement program, and incremental costs associated with the Company's assumption  
19 of service line responsibility. I will also provide an explanation of the accounting  
20 procedures the Company uses to record and segregate the costs recoverable in the DRR.

21 **Q10. Please identify the exhibits to your testimony?**

22 A. The following exhibits are attached to my testimony:

- 23 • Exhibit No. JCS-1 – Summary of DRR Revenue Requirement
- 24 • Exhibit No. JCS-2 – Revenue Requirement for Main Replacement Program
- 25 • Exhibit No. JCS-2a – Utility Plant Additions for Main Replacement Program

- 1 • Exhibit No. JCS-2b – Utility Plant Retirements for Main Replacement Program
- 2 • Exhibit No. JCS-2c – Accumulated Depreciation for Main Replacement Program
- 3 • Exhibit No. JCS-2d – Cost of Removal for Main Replacement Program
- 4 • Exhibit No. JCS-2e – Post in Service Carrying Costs (PISCC) for Main Replacement
- 5 Program
- 6 • Exhibit No. JCS-2f – Annualized Property Tax Expense for Main Replacement
- 7 Program
- 8 • Exhibit No. JCS-2g – Deferred Taxes on Liberalized Depreciation for Main
- 9 Replacement Program
- 10 • Exhibit No. JCS-2h – Deferred Depreciation Regulatory Asset Balance for Main
- 11 Replacement Program
- 12 • Exhibit No. JCS-3 – Revenue Requirement for Service Line and Completed Riser
- 13 Replacement Program
- 14 • Exhibit No. JCS-3a – Utility Plant Additions for Service Line and Riser Replacement
- 15 Program
- 16 • Exhibit No. JCS-3b – Utility Plant Retirements for Service Line and Riser
- 17 Replacement Program
- 18 • Exhibit No. JCS-3c – Accumulated Depreciation for Service Line and Riser
- 19 Replacement Program
- 20 • Exhibit No. JCS-3d – Cost of Removal for Service Line and Riser Replacement
- 21 Program
- 22 • Exhibit No. JCS-3e – PISCC for Service Line and Riser Replacement Program
- 23 • Exhibit No. JCS-3f – Annualized Property Tax Expense for Service Line and Riser
- 24 Replacement Program
- 25 • Exhibit No. JCS-3g – Deferred Taxes on Liberalized Depreciation for Service Line
- 26 and Riser Replacement Program
- 27 • Exhibit No. JCS-3h – Deferred Depreciation Regulatory Asset Balance for Service
- 28 Line and Riser Replacement Program
- 29 • Exhibit No. JCS-4 – DRR Revenue Requirement Variance at December 31, 2014
- 30 • Exhibit No. JCS-4a – DRR Recoveries by Tariff

1     **II.    DRR REVENUE REQUIREMENT**

2     **Q11.   Please explain the work order process that VEDO uses to segregate and record the**  
3     **capital costs of the bare steel and cast iron replacement and riser/service line**  
4     **replacement programs (collectively, the Programs) while the projects are under**  
5     **construction (the Program Construction Costs).**

6     A.    To ensure proper accumulation and segregation of Program Construction Costs, a project  
7     number is assigned to each capital work order. All Program Construction Costs, as  
8     incurred, are recorded to the assigned project number and are maintained in the  
9     Company’s financial systems (specifically the Financial Information System (FIS)  
10    Projects Accounting (PA) module). The project number is required for the recording of  
11    all Program Construction Costs into any of the FIS feeder systems. Each of the feeder  
12    systems, which include payroll, accounts payable, and material inventory, interface with  
13    the PA module. Total Program Construction Costs incurred can be viewed and/or  
14    reported by the project number at any point in time as the Programs progress.

15    **Q12.   What costs did VEDO include in the value of the property for the DRR rate base**  
16    **additions?**

17    A.    The DRR includes the construction costs of the Programs, as well as engineering and  
18    project management, permitting, consulting services, site preparation, equipment and  
19    installation, cost of retirement, an allocation of administrative overhead, and other related  
20    expenses.

21    **Q13.   Is an allowance for funds used during construction (AFUDC) included in the**  
22    **Program Construction Costs?**

23    A.    Yes, AFUDC has been recorded as part of the Program Construction Costs in accordance  
24    with USoA. The 2014 AFUDC rate used for all other VEDO construction projects was  
25    0.30%.

1 **Q14. When does VEDO discontinue recording AFUDC on the Program Construction**  
2 **Costs?**

3 A. VEDO ceases the accrual of AFUDC when each work order is placed in service and  
4 begins accruing PISCC at an annual rate of 7.02%. The Commission's order in Case No.  
5 07-1080-GA-AIR approved the accrual of PISCC after the work order in service date,  
6 along with the fixed rate utilized. The net PISCC deferred as of December 31, 2014, has  
7 been reflected on Exhibit No. JCS-2, Line 11 for mains and Exhibit No. JCS-3, Line 18  
8 for service lines.

9 **Q15. What is PISCC?**

10 A. PISCC stands for post-in-service carrying costs and is an allocation of interest cost to the  
11 infrastructure investments made in the Programs and is accumulated from the in-service  
12 date through the date each project's costs are included for recovery in the DRR or in base  
13 rates.

14 **Q16. Does the DRR revenue requirement include retirements and the cost of removal of**  
15 **utility plant assets?**

16 A. Yes. Existing bare steel and cast iron mains and service lines are being retired as part of  
17 the Program. VEDO had discontinued the installation of bare steel and cast iron pipe by  
18 the 1950s; therefore any retirements of these types of mains and service lines represent  
19 fully depreciated plant in service. As the retirements are performed, VEDO is also  
20 recording the cost to retire or remove the bare steel and cast iron assets as part of the  
21 Replacement Program.

22 **Q17. How did VEDO account for the asset retirements and associated cost of removal?**

23 A. In accordance with the USoA, the retirement of utility assets, at original cost, and the  
24 retirement's related cost of removal made necessary by the Replacement Program were  
25 charged to the associated depreciation reserve(s). The Replacement Program's original

1 cost retirements are reflected on Exhibit No. JCS-2, Lines 4 and 9 for mains, and on  
2 Exhibit No. JCS-3, Lines 7 and 8 and Lines 15 and 16 for service lines, and cost of  
3 removal is reflected on Exhibit No. JCS-2, Line 8 for mains and Exhibit No. JCS-3, Line  
4 14 for service lines.

5 **Q18. What operating expenses are included in the DRR revenue requirement?**

6 A. VEDO has reflected the incremental property tax (Exhibit No. JCS-2, Line 20 (mains)  
7 and Exhibit No. JCS-3, Line 29 (service lines and risers)) and annualized depreciation  
8 expense (Exhibit No. JCS-2, Line 21 (mains) and Exhibit No. JCS-3, Line 30 and 31  
9 (service lines and risers)) based on the net additions to plant in service shown on Exhibit  
10 No. JCS-2, Line 5, mains, and Exhibit No. JCS-3, Line 9, service lines. The annualized  
11 depreciation expense was calculated using the depreciation rates approved in VEDO's  
12 base rate case, Case No. 04-0571-GA-AIR, and property tax expense is supported by  
13 Exhibit No. JCS-2f (mains) and Exhibit No. JCS-3f (service lines and risers).

14 VEDO has also included in the DRR revenue requirement the incremental cost  
15 associated with assuming ownership of service lines. This expense is reflected on Exhibit  
16 No. JCS-3, Line 35. VEDO witness James M. Francis provides the support for the  
17 incremental expense in Exhibit No. JMF-8.

18 **Q19. Are there maintenance expense adjustments associated with the Replacement**  
19 **Program?**

20 A. Yes. As approved by the Commission in Case No. 13-1571-GA-ALT, O&M savings  
21 attributed to the Replacement Program are included as an offset to the costs recoverable  
22 in the DRR. In this case, the amount of the offset, reflected on Witness Francis' Exhibit  
23 No. JMF-7, was determined by adding together a baseline credit of \$294,116 and a credit  
24 of \$5,882 per mile of cumulative bare-steel and cast-iron main retired, for a total credit of

1 \$815,261. This credit is reflected in the DRR revenue requirement on Exhibit No. JCS-2,  
2 Line 24 for mains and Exhibit No. JCS-3, Line 36 for services. Witness Francis  
3 discusses the determination of this O&M savings credit.

4 **III. EXPLANATION OF EXHIBITS**

5 **Q20. Please explain Exhibit No. JCS-1.**

6 A. Exhibit No. JCS-1 summarizes the annualized revenue requirement for the Programs.  
7 The revenue requirement is supported by Exhibit Nos. JCS-2 through JCS-4.

8 **Q21. Please explain Exhibit No. JCS-2 and Exhibit No. JCS-3.**

9 A. Exhibit No. JCS-2 and Exhibit No. JCS-3 represent the revenue requirement calculation  
10 for VEDO's DRR charges based on net rate base at December 31, 2014, inclusive of  
11 PISCC and deferred taxes related to depreciation and PISCC. Exhibit No. JCS-2  
12 represents the revenue requirement calculation for the main replacement program, and  
13 Exhibit No. JCS-3 represents the revenue requirement calculation for service line and  
14 riser replacements.

15 **Q22. Please explain Exhibit No. JCS-2a and Exhibit No. JCS-3a.**

16 A. Exhibit No. JCS-2a and Exhibit No. JCS-3a provide the balance of plant additions at  
17 December 31, 2013, and actual plant additions by month for the twelve months ended  
18 December 31, 2014, to determine utility plant additions at December 31, 2014. Exhibit  
19 No. JCS-2a provides information for the main replacement program, and Exhibit No.  
20 JCS-3a provides information for the service line and riser replacement programs.

21 **Q23. Please explain Exhibit No. JCS-2b and Exhibit No. JCS-3b.**

22 A. Exhibit No. JCS-2b and Exhibit No. JCS-3b provide the balance of the original cost plant  
23 retired under the Program as of December 31, 2013, as shown in Case No. 14-0813-GA-  
24 RDR, and the actual original cost retired by month for projects completed during the

1 twelve months ended December 31, 2014, to calculate the Replacement Program's total  
2 original cost retirements. Exhibit No. JCS-2b provides information for the main  
3 replacement program, and Exhibit No. JCS-3b provides information for the service line  
4 and riser replacement programs.

5 **Q24. Please explain Exhibit No. JCS-2c and Exhibit No. JCS-3c.**

6 A. Exhibit No. JCS-2c and Exhibit No. JCS-3c provide the balance of accumulated  
7 depreciation at December 31, 2013, and actual provision for depreciation by month for  
8 the twelve months ended December 31, 2014, to calculate the accumulated depreciation  
9 provision at December 31, 2014. Exhibit No. JCS-2c provides information for the main  
10 replacement program, and Exhibit No. JCS-3c provides information for the service line  
11 and riser replacement programs.

12 **Q25. Please explain Exhibit No. JCS-2d and Exhibit No. JCS-3d.**

13 A. Exhibit No. JCS-2d and Exhibit No. JCS-3d provide the balance of cost of removal at  
14 December 31, 2013, and the actual cost of removal by month for the twelve months  
15 ended December 31, 2014, to calculate the Program's total cost of removal through  
16 December 31, 2014. Exhibit No. JCS-2d provides information for the main replacement  
17 program, and Exhibit No. JCS-3d provides information for the service line and riser  
18 replacement programs.

19 **Q26. Please explain Exhibit No. JCS-2e and Exhibit No. JCS-3e.**

20 A. Exhibit No. JCS-2e and Exhibit No. JCS-3e provide the balance of the PISCC regulatory  
21 asset at December 31, 2013, and the PISCC activity by month for the twelve months  
22 ended December 31, 2014, to calculate the PISCC regulatory asset balance at December  
23 31, 2014. These schedules also provide the amortization of PISCC by month for the  
24 twelve months ended December 31, 2014, and an accumulated PISCC amortization

1 balance at December 31, 2014. Furthermore, these schedules provide the Net PISCC  
2 Regulatory Asset at December 31, 2014. Exhibit No. JCS-2e provides information for  
3 the main replacement program, and Exhibit No. JCS-3e provides information for the  
4 service line and riser replacement programs.

5 **Q27. Please explain Exhibit No. JCS-2f and Exhibit No. JCS-3f.**

6 A. Exhibit Nos. JCS-2f and Exhibit No. JCS-3f provide the calculation of the annualized  
7 property tax expense based on the net additions (mains, service lines and risers) to Plant  
8 In-Service under the Programs. This calculation follows the process used in VEDO's  
9 Annual Report to the Ohio Department of Taxation to determine the Net Property  
10 Valuation and uses the latest known average personal property tax rate. Exhibit No. JCS-  
11 2f provides information for the net main additions, and Exhibit No. JCS-3f provides  
12 information for the net service line and riser additions.

13 **Q28. Please explain Exhibit No. JCS-2g and Exhibit No. JCS-3g.**

14 A. Exhibit Nos. JCS-2g (mains) and Exhibit No. JCS-3g (service lines/risers) provide the  
15 calculation of depreciation-related deferred taxes for the Programs' capital investments  
16 placed in service during 2009, 2010, 2011, 2012, 2013 and 2014.

17 **Q29. Please explain Exhibit No. JCS-2h and Exhibit No. JCS-3h.**

18 A. Exhibit No. JCS-2h (mains) and Exhibit No. JCS-3h (service lines) provide the balance  
19 of the deferred depreciation regulatory asset as of December 31, 2013, and deferred  
20 depreciation activity by month for the twelve months ended December 31, 2014, to  
21 calculate the deferred depreciation regulatory asset balance as of December 31, 2014.  
22 These schedules also provide the amortization of deferred depreciation by month for the  
23 twelve months ended December 31, 2014, and an accumulated deferred depreciation  
24 amortization balance at December 31, 2014. Furthermore, these schedules provide the

1 net deferred depreciation Regulatory Asset at December 31, 2014. Exhibit No. JCS-2h  
2 provides information for the main replacement program, and Exhibit No. JCS-3h  
3 provides information for the service line and riser replacement programs.

4 **Q30. Please explain Exhibit No. JCS-4 and Exhibit No. JCS-4a.**

5 A. Exhibit No. JCS-4 provides the calculation of the DRR variance at December 31, 2014.  
6 This variance is associated with the DRR revenue requirement for the twelve months  
7 ended December 31, 2014.

8 Exhibit No. JCS-4a reflects DRR recoveries by month by customer group for the  
9 twelve months ended December 31, 2014.

10 **Q31. Does this conclude your direct testimony?**

11 A. Yes.

**Notes:**

[1] Reference column is applicable to column 2014 under In Service Year section to the left.

[2] Agrees to Exhibit JMB-3g in Case No. 12-1423-GA-RDR, with the exception of the Cost of Removal Incurred amount (Line 13). See Note 4 for tax depreciation formula.

[3] Represents spend on work orders placed in service in 2014, eligible for 100% bonus depreciation. There was no 100% bonus Depreciation in 2014.

[4] Per Internal Revenue Code ("IRC") Sec 168(e)(3)(E)(viii), gas utility distribution facilities placed in service before January 1, 2011 have a MACRS life of 15 years. For utility distribution facilities placed in service after January 1, 2011, MACRS life is 20 years per IRC Rev. Proc. 87-56. Below is the formula for tax depreciation by year.

(1) Reference column is applicable to column 2014 under In Service Year section to the left.

[2] Agrees to Exhibit JMB-3g in Case No. 12-1423-GA-RDR, with the exception of the Cost of Removal Incurred amount (Line 22). See Note 4 for tax depreciation formula.

[3] Represents spend on work orders placed in service in 2014, eligible for 100% bonus depreciation. There was no 100% bonus Depreciation in 2014.

[4] Formula corrected for 2011 and 2012 to accurately remove Capitalized Interest to get to true tax basis. The remaining amount is eligible for accelerated Bonus Depreciation, if applicable, for the calendar year.

(5) Per Internal Revenue Code ("IRC") Sec 168(e)(3)(E)(viii), gas utility distribution facilities placed in service before January 1, 2011 have a MACRS life of 15 years. For utility distribution facilities placed in service after January 1, 2011, MACRS life is 20 years per IRC Rev. Proc. 87-56. Please note that meter installation is not considered a facility; therefore, 20 MACRS has applied to meter installation balances in 2009 - 2014. Below is the formula for tax depreciation by year.

Formula:	2009	2010	2011	2012	2013	2014
Line 19 = (Line 6-Line 3+Line 13) * 50% * Line 17	X	X				
Line 20 = Line 3 * 50% * Line 18	X	X				
Line 20 = Line 6 * 50% * Line 18			X	X	X	X

1 **Direct Testimony of**  
2 **Scott E. Albertson**

3 **I. INTRODUCTION**

4 **Q1. Please state your name and business address.**

5 A. My name is Scott E. Albertson, and my address is One Vectren Square, Evansville,  
6 Indiana.

7 **Q2. What position do you hold with Applicant Vectren Energy Delivery of Ohio, Inc.**  
8 **(VEDO or the Company)?**

9 A. I am Vice President, Regulatory Affairs and Gas Supply for Vectren Utility Holdings,  
10 Inc. (VUHI), the immediate parent company of VEDO. I hold the same position with  
11 two other utility subsidiaries of VUHI—Southern Indiana Gas and Electric Company  
12 d/b/a Vectren Energy Delivery of Indiana, Inc. (Vectren South) and Indiana Gas  
13 Company, Inc. d/b/a Vectren Energy Delivery of Indiana, Inc. (Vectren North).

14 **Q3. Please describe your educational background.**

15 A. I received a Bachelor of Science degree in mechanical engineering from Rose-Hulman  
16 Institute of Technology in 1984. I have been a professional engineer in Indiana since  
17 1990.

18 **Q4. Please describe your professional experience.**

19 A. I have over 30 years' experience in the utility industry. I began my career with Ohio  
20 Valley Gas Corporation in a project engineering position. I have worked at VUHI and its  
21 predecessor companies since 1987 in a variety of positions including Operations Staff  
22 Manager, Assistant Chief Engineer, Director of Engineering Projects, Director of  
23 Engineering, and Director of Technical Services. I was named Director of Regulatory  
24 Affairs for VUHI in 2004, and was promoted to my current position effective July 1,  
25 2012.

1 **Q5. What are your present duties and responsibilities as Vice President, Regulatory**  
2 **Affairs?**

3 A. I have responsibility for coordinating regulatory and rate matters of the regulated utilities  
4 within VUHI in proceedings before the Indiana and Ohio utility regulatory commissions.  
5 In addition, I am also responsible for overseeing the gas supply function for VUHI's  
6 three gas utilities.

7 **Q6. Have you previously testified before the Public Utilities Commission of Ohio?**

8 A. Yes. Among other cases, I filed testimony in the Company's most recent general rate  
9 case, Case No. 07-1080-GA-AIR; its Merchant Function Exit proceeding, Case No. 07-  
10 1285-GA-EXM; its 2010 Distribution Replacement Rider (DRR) proceeding, Case No.  
11 10-0595-GA-RDR (2010 DRR Filing); its 2011 DRR proceeding, Case No. 11-2776-GA-  
12 RDR (2011 DRR Filing); and the DRR extension proceeding, Case No. 13-1571-GA-  
13 ALT.

14 **Q7. What is the purpose of your testimony in this proceeding?**

15 A. My testimony describes changes to costs recovered through the DRR and supports the  
16 proposed DRR charges, as well as the proposed tariff sheet and associated bill impacts.

17 **Q8. Are you sponsoring any exhibits with your testimony?**

18 A. Yes. The following exhibits, which were prepared by me or under my supervision, are  
19 attached to my testimony:

- 20 • Exhibit No. SEA-1, DRR – Derivation of Charges;
- 21 • Exhibit No. SEA-2, DRR – Tariff Sheet; and
- 22 • Exhibit No. SEA-3, DRR – Annual Residential Customer Bill Impact.

1 **Q5. What are your present duties and responsibilities as Vice President, Regulatory**  
2 **Affairs?**

3 A. I have responsibility for coordinating regulatory and rate matters of the regulated utilities  
4 within VUHI in proceedings before the Indiana and Ohio utility regulatory commissions.  
5 In addition, I am also responsible for overseeing the gas supply function for VUHI's  
6 three gas utilities.

7 **Q6. Have you previously testified before the Public Utilities Commission of Ohio?**

8 A. Yes. Among other cases, I filed testimony in the Company's most recent general rate  
9 case, Case No. 07-1080-GA-AIR; its Merchant Function Exit proceeding, Case No. 07-  
10 1285-GA-EXM; its 2010 Distribution Replacement Rider (DRR) proceeding, Case No.  
11 10-0595-GA-RDR (2010 DRR Filing); its 2011 DRR proceeding, Case No. 11-2776-GA-  
12 RDR (2011 DRR Filing); and the DRR extension proceeding, Case No. 13-1571-GA-  
13 ALT.

14 **Q7. What is the purpose of your testimony in this proceeding?**

15 A. My testimony describes changes to costs recovered through the DRR and supports the  
16 proposed DRR charges, as well as the proposed tariff sheet and associated bill impacts.

17 **Q8. Are you sponsoring any exhibits with your testimony?**

18 A. Yes. The following exhibits, which were prepared by me or under my supervision, are  
19 attached to my testimony:

- 20 • Exhibit No. SEA-1, DRR – Derivation of Charges;
- 21 • Exhibit No. SEA-2, DRR – Tariff Sheet; and
- 22 • Exhibit No. SEA-3, DRR – Annual Residential Customer Bill Impact.

1     **II.   BACKGROUND**

2     **Q9.   Has the Commission approved changes to the DRR since it was originally approved**  
3     **in Case No. 07-1080-GA-AIR?**

4     A.    Yes. The Commission’s February 19, 2014 Order in Case No. 13-1571-GA-ALT  
5           approved a Stipulation and Recommendation (the 13-1571 Stipulation) between VEDO  
6           and the Staff of the Public Utilities Commission of Ohio. In the 13-1571 Stipulation, the  
7           Commission approved continuation of the DRR, which was originally approved in  
8           VEDO’s last general rate case, Case No. 07-1080-GA-AIR (the Rate Case). The 13-1571  
9           Stipulation continues to allow VEDO to recover a return on and of investments made by  
10          the Company under an accelerated bare steel and cast iron pipeline replacement program  
11          (the Replacement Program), inclusive of capitalized interest (or post-in-service carrying  
12          costs, or PISCC) associated with the Replacement Program, and to recover the  
13          incremental costs of assuming responsibility for service lines.

14    **Q10. How did the 13-1571 Stipulation modify the DRR?**

15    A.    The 13-1571 Stipulation provides that Replacement Program costs incurred through  
16          December 31, 2017 are recoverable in the DRR. It also accelerated the pace of the  
17          Replacement Program and clarified and expanded the scope of costs recoverable in the  
18          DRR. These and other modifications are described in further detail in the 13-1571  
19          Stipulation itself.

20    **III.   EXHIBITS**

21    **Q11. Please describe Exhibit No. SEA-1.**

22    A.    This exhibit contains the filing schedules to support the derivation of the Company’s  
23          proposed DRR charge.

1           Exhibit No. SEA-1, page 1, shows the allocation of the DRR revenue requirement  
2 and the derivation of DRR charges by rate schedule. The rate schedule allocation factors  
3 from page 2 (described below) are multiplied by the total revenue requirement (from  
4 Exhibit No. JCS-1) to determine the allocated revenue requirement by rate schedule. For  
5 residential (Rates 310, 311, and 315), small general service (Group 1 customers served  
6 under Rates 320, 321, and 325; hereinafter referred to as “Group 1 Customers”), and Rate  
7 341 (Dual Fuel Standard Choice Offer Service) customers, the allocated revenue  
8 requirement for each rate schedule is then divided by the projected number of customers  
9 in each rate schedule, and then divided by 12, to determine the monthly DRR charge  
10 applicable to customers in those rate schedules. For larger customers (Group 2 and  
11 Group 3 customers under Rates 320, 321, and 325, hereinafter referred to as “Group 2  
12 and Group 3 Customers”) and all customers receiving service under Rates 345 and 360,  
13 the allocated revenue requirement for each rate schedule is divided by the projected  
14 annual throughput for each rate schedule to determine the DRR charge per Ccf applicable  
15 to those rate schedules.

16           Exhibit No. SEA-1, page 2, lists the rate schedule distribution mains and service  
17 lines allocation factors from the Rate Case. These allocation factors are used to allocate  
18 the mains and service lines revenue requirements to the various rate schedules.

19           Exhibit No. SEA-1, page 3, shows how the general service customer DRR  
20 charges are determined. Due to the similarity in facilities required to serve Group 1  
21 Customers and those required to serve residential customers, and consistent with the  
22 Commission’s order in the Rate Case, VEDO presents a DRR charge to Group 1  
23 Customers equal to the DRR charge applicable to residential customers. The residential

1 DRR charge is multiplied by the number of Group 1 Customers, with that result  
2 multiplied by 12 to determine the annual DRR revenue requirement to be recovered from  
3 Group 1 Customers. The Group 1 Customer revenue requirement is then subtracted from  
4 the total revenue requirement allocated to Rates 320, 321, and 325. The resulting amount  
5 is then divided by the projected annual throughput for Group 2 and Group 3 Customers to  
6 determine the DRR charge per Ccf applicable to those customers.

7 Exhibit No. SEA-1, page 4, shows the impact of the proposed DRR on each rate  
8 schedule.

9 Exhibit No. SEA-1, page 5, identifies the recoveries applicable to the periods  
10 September 2015 through December 2015 and January 2016 through August 2016. These  
11 are the 12 months during which the proposed DRR is projected to be in effect. The  
12 purpose of this schedule is to provide the basis for determining the revenue requirement  
13 recovery variance applicable to the period of September through December 2015, since in  
14 the next annual DRR filing VEDO will reconcile actual costs and actual recoveries  
15 through December 2015<sup>1</sup>. The variance determined on Exhibit No. JCS-4, page 1, is  
16 allocated to mains and service lines based upon the approved revenue requirements in  
17 VEDO's 2013 and 2014 DRR Filings. The allocated variances are added to the annual  
18 revenue requirements for mains and service lines, shown on Exhibit No. JCS-2 and  
19 Exhibit No. JCS-3 respectively, for investments made in 2014. Likewise, in the 2016  
20 DRR filing the variance applicable to the period of January through August 2015 will be  
21 based upon the recoveries for that period as identified on page 5. This methodology is  
22 consistent with the company's previous annual DRR filings.

---

<sup>1</sup> Recoveries applicable to January through August 2015 were included in the determination of the DRR revenue requirement in the 2014 DRR Filing, Case No. 14-0813-GA-RDR.

1 **Q12. Please describe Exhibit No. SEA-2.**

2 A. Exhibit No. SEA-2 illustrates the proposed DRR tariff sheet (redlined and clean).

3 **Q13. Does the proposed DRR charge exceed the cap on the DRR charge applicable to**  
4 **residential and Group 1 customers included in the 13-1571 Stipulation?**

5 A. No. The proposed DRR charge of \$4.79 per month applicable Residential and Group 1  
6 Customers is less than the approved cap (\$5.45 per month) for the recovery period  
7 September 1, 2015 through August 31, 2016.

8 **Q14. Please describe Exhibit No. SEA-3.**

9 A. The annual impact of the proposed DRR on a residential customer is shown on Exhibit  
10 No. SEA-3.

11 **Q15. Does this conclude your direct testimony?**

12 A. Yes.
