**Re: Oregon Clean Energy, LLC
Case No. 12-2959-EL-BGN**

Dear Ms. McNeal:

The May 1, 2013 Opinion, Order, and Certificate approving Oregon Clean Energy, LLC's ("Oregon") Certificate of Environmental Compatibility and Public Need to Construct an Electric Generation Facility ("Certificate") and the March 15, 2013 Second Supplement to Application established a set of conditions and supplemental commitments as part of the Certificate.

Specifically, in part, **Commitment No. 20**, which included in the Second Supplement filed on March 15, 2013, requires that:

Prior to the commencement of construction activities that require permits or authorizations by federal or state laws and regulations, the Applicant will obtain and comply with such permits or authorizations. The Applicant will provide copies of permits and authorizations, including all supporting documentation, to Staff within seven days of issuance or receipt by the Applicant. The Applicant will provide a schedule of construction activities and acquisition of corresponding permits for each activity at the preconstruction conference.

On September 16, 2015, Oregon filed copies of the City of Toledo's heavy haul permits in compliance with Commitment No. 20. These permits have been updated due to the expiration of the original permits. Attached for filing are the updated copies of the City of Toledo's heavy haul permits.

If you have any questions please call at the number listed above.

Sincerely,

Sally W. Bloomfield
