Public Utilities Commission of Ohio

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. I care about reducing toxic pollution and saving money on my electric bills throughout the year. I care about this issue because clean air is crucial to our good health! Toxins in the air can directly affect our health and cause so many issues with our physical well being.

A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy. Please deny the rate increase.

Sincerely,

Sue Davis
