

BEFORE

THE PUBLIC UTILITIES COMMISSION OF OHIO

In the Matter of the Authorization of)
Ohi-Rail Corp. to Install Active Grade) Case No. 15-1715-RR-FED
Crossing Warning Devices in Village of)
Minerva, Carroll County.)

FINDING AND ORDER

The Commission finds:

- (1) R.C. 4905.04 provides that the Commission has statutory authority to regulate and promote the welfare and safety of railroad employees and the traveling public.
- (2) R.C. 4907.471 provides that the Commission shall survey all grade crossings and establish a priority list to determine which grade crossings are in need of additional protective devices.
- (3) R.C. 4907.476 provides that where the Ohio Department of Transportation (ODOT) enters into contracts and agreements for grade crossing protective device projects, the Commission shall work with and through the department. Federal funding for such projects is provided through the Ohio Rail Development Commission (ORDC), which is an independent agency of the state within ODOT, established in accordance with R.C. 4981.02.
- (4) Ohi-Rail Corp. (OHIC) is a railroad as defined in R.C. 4907.02 and subject to the jurisdiction of the Commission under R.C. 4905.04.
- (5) On October 2, 2015, Staff filed a memorandum stating that the ORDC has authorized funding for OHIC to install mast-mounted flashing lights and roadway gates in the village of Minerva, Carroll County, S. Market Street/State Route 183 (DOT#503439M), approved actual cost \$240,751.00.

Staff notes that the crossing was surveyed on November 5, 2013, because of its hazard ranking, and was found to warrant an upgrade. Staff adds that between the time of the survey and the authorization to begin the project, OHIC and ORDC were

engaged in discussions regarding engineering for the project; it was determined that issues may still arise during the construction phase of the project. The project will be paid for with federal funds. Staff requests that the Commission issue an order directing completion within nine months.

Also on October 2, 2015, OHIC filed a request in *In re Petition of Ohi-Rail Corp. to Close to the W. Plain Street Grade Crossing*, Case No. 15-1714-RR-UNC, seeking closure of the West Plain Street crossing, which is adjacent to the S. Market Street crossing. According to its OHIC, it is requesting the crossing be closed to alleviate circuitry issues that are expected to arise in the construction phase of the upgrade at S. Market Street/State Route 183.

- (6) Upon review, OHIC is hereby authorized to acquire project materials and to commence construction as detailed in the letter of construction authorization. OHIC shall notify Staff at least five working days before the date work is scheduled to begin at the project so that arrangements can be made for any inspection. In addition, OHIC shall timely notify Staff of any changes in the scope of work, cost overruns, materials, etc., which are not in the approved plans in order to estimate and secure approval before the work is performed.
- (7) Within 30 days of the issuance of this Finding and Order, OHIC shall file notice that it has initiated discussions with American Electric Power (AEP), or any other applicable utility, to ensure that electric service will be available to enable the grade crossing improvements to be constructed and placed in service within the deadline specified by the Commission. Such filing shall identify the steps OHIC has taken with AEP, or any other electric utility, and the local highway authority to have electric service available during the construction and cut-in phases of the project. OHIC shall serve a copy of the notice upon AEP or any other applicable utility. To ensure that the deadline is met, AEP or any other applicable utility shall timely inform the Commission in writing of any issues regarding the availability of electric service.
- (8) The Commission will issue no further construction authorization. Further, the grade crossing improvement project should be completed by August 4, 2016.

- (9) It is expected that all work necessary for Federal Highway Administration acceptance of the warning devices will be completed by the in-service due date and that the railroad will be responsible for this work. This work includes, but is not limited to, any ancillary work to make the warning devices function as designed and visible to the roadway user, and Manual of Uniform Traffic Control Devices compliance, including minor roadway work if necessary.
- (10) In order to expedite the activation of the warning devices, the Commission no longer requires railroad companies to delay such activation pending final inspection by Staff. However, OHIC should notify Staff and ORDC 30 days before the projected date of completion. At the time Staff or ORDC makes its final inspection of the devices and finds that the identified installation is complete and the warning devices have been put in service, Staff should file a memorandum in this docket indicating that the installation is complete and that the warning devices have been put in service.
- (11) With the intention of promoting increased public safety during the pendency of the project, the Commission urges the appropriate local government agency to make an immediate assessment of interim physical improvements, which would enhance driver awareness at the crossing. The Commission may provide assistance in funding improvements, such as rumble strips, illumination, signs or other safety enhancements for the project. Applications for such funding should be made to the Commission's Transportation Department, Rail Division, which shall review any proposal. In the event the department finds the improvements appropriate, the department director is hereby authorized to execute a contract with the local government agency, and obligate up to \$5,000 from the State Grade Crossing Safety Fund for such improvements at the project location. However, the local government agency should not initiate any improvements until a contract has been executed.

It is, therefore,

ORDERED, That by December 4, 2015, OHIC file notice that it has initiated with AEP, or any applicable utility, the process to ensure that electric service will be available at the involved grade crossing as set forth in finding (7). It is, further,

ORDERED, That OHIC follow the detailed instructions as outlined in the ORDC letter of construction authorization and proceed with and complete the project by August 4, 2016. It is, further,

ORDERED, That OHIC notify Staff at least five working days before the date work is scheduled to begin at the project site so that arrangements can be made for any inspection. It is, further,

ORDERED, That OHIC timely notify Staff of any changes in the scope of work, cost overruns, materials, etc., which are not in the approved plans and estimates, and shall secure approval before the work is performed. It is, further,

ORDERED, That OHIC notify the Commission and ORDC 30 days before the projected date of completion. It is, further,

ORDERED, That, at the time Staff or ORDC makes its final inspection and finds that the installation at the grade crossing is complete and the warning devices have been put in service, Staff will file a memorandum in this docket indicating that the installation is complete and the warning devices have been put in service. It is, further,

ORDERED, That a copy of this Finding and Order be served upon ORDC, OHIC, Administrator of the village of Minerva, AEP, and any other interested person of record.
