Re: Trishe Wind Ohio, LLC, Case No. 13-197-EL-BGN

Dear Ms. McNeal:

The December 16, 2013 Opinion, Order, and Certificate approving Northwest Ohio Wind Energy, LLC's [now known as Trishe Wind Ohio, LLC ("Trishe")] Certificate of Environmental Compatibility and Public Need ("Certificate") and the October 1, 2013 Supplement to Amended Application ("Supplement") established a set of conditions and supplemental commitments as part of the Certificate.

Within this set of conditions and commitments, **Supplement Commitment No. 3** requires that:

Applicant will prepare a construction and maintenance access plan based on final plans for the Facility, access roads, and types of equipment to be used. Prior to commencement of construction, Applicant will submit the plan to OPSB Staff for review and acceptance. The plan will consider the location of streams, wetlands, wooded areas, and sensitive plant species, as identified by the ODNR DOW, and will explain how impacts to all sensitive resources will be avoided or minimized during construction, operation, and maintenance. The plan will provide specific details on all wetlands, streams, and/or ditches to be crossed by the Facility, including those where construction or maintenance vehicles and/or Facility components such as access roads cannot avoid crossing the waterbody. In such cases, specific discussion of the proposed crossing methodology for each wetland and stream crossing (such as culverts), and post-construction site restoration, will be included. The plan will include the measures to be used for restoring the areas around all temporary access points, and a description of any long-term stabilization required along permanent access routes. The plan will include a detailed frac-out contingency plan for stream and wetland crossings that are expected to be completed via horizontal directional drilling (HDD).

Since construction of the foundation substation site will **not**: cross a stream; be in any wetlands or wooded areas; and involve any sensitive plant species, a construction and maintenance access plan is not required. Thus, this letter is to inform the OPSB Staff that Trishe is in compliance with the above-mentioned commitment for this phase of the construction.
