**SECTION 2 - SERVICES**

**2.1. APPLICATION OF RATES**

**2.1.1. INTRODUCTION**

The regulations set forth in this section govern the application of rates for services contained in other sections of this Tariff. An application for service, whether made orally, in writing, or by use of service, establishes a contract between the Company and the Customer pursuant to the terms and conditions included within this Tariff. Neither the contract nor any rights acquired thereunder may be assigned or in any manner transferred to a third party by the Customer, without the Company's written approval.

**2.1.2. CHARGES BASED ON DURATION OF USE**

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- A. Calls are measured in durational increments identified for each service. All calls held for a fraction of a measurement increment are rounded-up to the next whole measurement unit.
- B. Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls starts with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- C. Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- D. Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call and will be billed according to applicable eastern standard or eastern daylight savings time.

**SECTION 2 - SERVICES**

**2.1. APPLICATION OF RATES (CONT'D)**

**2.1.3. RATES BASED UPON DISTANCE**

Where charges for a service are specified based upon distance, the following rules apply:

Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as references in the Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number. The airline distance between any two rate centers is determined as follows:

- A. Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.
- B. Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- C. Square each difference obtained in step (b) above.
- D. Add the square of the "V" difference and the square of the "H" difference obtained in step (c) above.
- E. Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- F. Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.
- G. FORMULA = 
$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$

**SECTION 2 - SERVICES**

**2.1. APPLICATION OF RATES**

**2.1.1. INTRODUCTION**

The regulations set forth in this section govern the application of rates for services contained in other sections of this Tariff. An application for service, whether made orally, in writing, or by use of service, establishes a contract between the Company and the Customer pursuant to the terms and conditions included within this Tariff. Neither the contract nor any rights acquired thereunder may be assigned or in any manner transferred to a third party by the Customer, without the Company's written approval.

**2.1.2. CHARGES BASED ON DURATION OF USE**

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- A. Calls are measured in durational increments identified for each service. All calls held for a fraction of a measurement increment are rounded-up to the next whole measurement unit.
- B. Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls starts with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- C. Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- D. Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call and will be billed according to applicable eastern standard or eastern daylight savings time.

---

**SECTION 2 - SERVICES**

**2.1. APPLICATION OF RATES (CONT'D)**

**2.1.3. RATES BASED UPON DISTANCE**

Where charges for a service are specified based upon distance, the following rules apply:

Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set or geographic coordinates, as references in the Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number. The airline distance between any two rate centers is determined as follows:

- A. Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.
- B. Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- C. Square each difference obtained in step (b) above.
- D. Add the square of the "V" difference and the square of the "H" difference obtained in step (c) above.
- E. Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- F. Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.
- G. FORMULA = 
$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$

### **Description of Changes**

On November 17, 2015, Comcast Cable Communications, LLC (“Comcast Cable”), on behalf of itself and its affiliates, including Comcast Phone of Ohio, LLC (“Comcast Phone”), and First Communications, LLC (“First Communications”) entered into an Asset Purchase Agreement (“Agreement”). (Comcast Cable and Comcast Phone are referred to herein collectively as “Comcast.” Comcast and First Communications are referred to hereafter as the “Parties”).

Pursuant to the Agreement, the Parties propose to assign certain Comcast telecommunications assets in Ohio, including telephone service customer accounts and related data, databases, and customer records needed to support the provision of telecommunications services to those customers (“Customers”), from Comcast to First Communications (hereinafter, the “Transaction”). The specific assets that First Communications is acquiring are those that were formerly owned by CIMCO Communications, which Comcast has served since 2010 under the trade name, “CIMCO, a Division of Comcast Business Services.” As a result of the assignment, First Communications will replace Comcast as the service provider to the Comcast-CIMCO Customers. Except for the sale of these assets and customer accounts, Comcast’s remaining, non-CIMCO operations will be unaffected by the transaction.

Immediately following the proposed transaction, the Customers will receive service from First Communications at the same rates, terms and conditions as currently provided by Comcast. First Communications proposes to adopt the terms of Comcast’s current tariff on file with the Commission (attached as **Exhibit A**) and attaches a proposed tariff as **Exhibit B**. Future changes in the rates, terms and conditions of service for Customers will be undertaken pursuant to applicable federal and state notice and tariff requirements.

Affected customers will be notified of the proposed transfer of their service to First Communications at least 30 days prior to the anticipated closing date, pursuant to Section 64.1120(e) of the rules of the Federal Communications Commission, 47 C.F.R. § 64.1120(e). A sample copy of the customer notice to be provided is attached as **Exhibit D**. First Communications will supplement this Application by filing with the Commission, once completed, an affidavit regarding the date the notices were sent by direct mail to affected customers.
