To: The Ohio Power Siting Board Re: Case No. 15-1921-EL-BGA Amendment I wish to state my objection/ opposition to the amendment before the board which is seeking to add three wind turbines to the so-called "wind farm" in the Greenwich area. As I have stated in previous correspondence to the Siting Board, I am opposed to the "Wind Farm" for reasons that have been clearly expressed to the board by the residents of this community, especially by those in closest proximity to the proposed wind turbines. The reasons expressed include: Health and Safety issues, depreciation of land values, environmental and wildlife concerns, increased cost of production of electricity (higher rates), and the simple fact that we like the landscape as it is. I ask you to please consider the wishes of the people have worked hard to establish their homes, raise their families and make this community a safe and appealing place to live. It is my understanding that the Board has received many times more letters of opposition to

the Wind Farm than those who are in favor of it. The voice of the people have spoken. Is the Board listening? Respectfully, Dr. Richard Pettit
