COMMENT DESCRIPTION:

In relation to case 15-1921-EL-BGA - The citizens of Greenwich have never wanted wind turbines in or near their town for many reasons. Now that WindLab has proposed new turbines to their project, we want them even less. Since Ohio has a very low wind rate, we wonder why our area was chosen for wind energy in the first place. Adding turbines that are faster and have louder engines will not make it any easier for them to produce green energy and will make the

residents even more determined to oppose this project. I encourage you to disband this project while the company can still get out. It had lots of flaws in it from the beginning and changing the turbines will not make the project any more viable. We have a geothermal heating system at our house because it is green, saves us money, and uses less energy. When the wind turbines can pay for themselves, create affordable energy that is truly green, and does not lower property values, then people will be more open to them. Please go back to the drawing board and force the manufactures of these turbines to create something that will truly be green and not put humans and animals at risk in a peaceful area they call home!
