Dear Public Utilities Commission of Ohio,

My family and I care about reducing toxic pollution and saving money on our electric bills.

Limiting pollution to our air and water leads to fewer deaths and sicknesses, reducing health care costs.

Sincerely,

Elisa Ross, MD

Dear Public Utilities Commission,

I am writing in regards to case number for First Energy 14-1297-EL-SSO. My family and I care about reducing toxic pollution and saving money on my electric bill. Please deny the rate increases to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. A bailout of old, polluting technology only benefits utility shareholders and delays the inevitable investment in efficiency and renewable energy.

Stop the bailouts!

Dear Sir or Madam,

I hope you will deny FirstEnergy's request for a bailout (Case # 14-1297-EL-SSO). Ohio families should not be on the hook for paying for old, outdated, dirty coal plants. My family and I care about reducing toxic pollution and a bailout of these old plants only delays the inevitable and necessary investment in more efficient, renewable energy. Please deny this rate increase that would force us into buying from these dirty coal plants. Thank you for your time.

Sincerely,

Elizabeth Leib

Columbus, OH 43215

To whom it may concern,

Taxpayers should not be asked to fund the cost of outdated and inefficient coal plants. The cost to cut carbon emissions need to fall on the corporations behind these issue. To meet the EPA's 2030 goal of reducing these harmful emissions by 30%, change has to start today with investment in renewable energy. Passing the problems to future generations only prologs the damage caused by coal plants to the people, land, and water of Ohio.

Accountability must fall to Duke Energy, AEP and First Energy not to the tax payers. If I was ticketed for littering, I would be accountable for the fine. Corporations that have the rights of a person should be held to the same standard.

Sincerely,

Chris Engelhoven

My family and I care about reducing toxic pollution and saving money on our electric bills. Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

We care about this issue because we care about our beautiful GREAT lake. We enjoy the many parks and trails and waterways that makes NE Ohio an amazing place to live. We care about our health and the health of others. We care about how actions today can affect tomorrow and beyond.

A bailout of old, polluting technology only benefits utility shareholders and delays the inevitable investment in efficiency and renewable energy.

Sincerely,

Amy Engelhoven

PUCO,

14-1291-EL-SSO

I am a registered voter in Ohio and a business owner. My family and I care about reducing toxic pollution & saving money on our electric bills. I would ask you to deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

I paid a penalty to one of the dirty providers and switched over to WINDMILL POWER just this year. I told my new company and old one, that I was willing to pay more per month to limit pollution to our air and water. WE ARE SLOWLY POISONING OUR EARTH!

Sincerely,
Catherine Marschall

Greetings;

Higher rates and new riders of cost to us the customers. As a customer I am on fixed income of Social Security. With everything always on the rise I have gotten a 1.5% raise in the last 3 years, while everyone else gets more to live on. Taxes on schools, parks, roads, libraries, and other pay outs. You know what all these and more do to our way of living.

Do you ever think of a way to help the senior's on our cost. Cost of insurance on our homes, cars all going up, plus taxes on the homes. We need a hand to help combat our over all cost of life. Not to sit our hat so low just to pay more for gas and elect.

bills. Thanks for taking time to read this note but someone some day will I hope help out seniors to survive.
