Thomas H. Smith

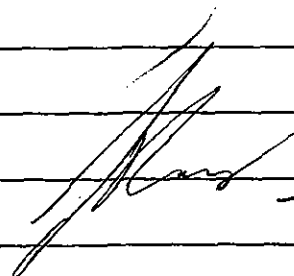

PUCO

I would like

to see further consultation before  
imposing an indefinite freeze on clean energy  
standards. As a result limiting  
pollution and optimizing the case  
for air and water is important.

Subj cases such as 14-1297-EL-550

and 14-1693-EL-550 Thank you

703 Patriots Way  
Medina, OH 44284

Public Utilities Commission of Ohio  
180 East Broad St.  
Columbus, OH. 43215

To. Whom it may concern;

As a concerned citizen for the future  
and a cleaner environment, I urge you to  
oppose an indefinite freeze of our clean  
energy standards.

It would be in the best interest for  
the environment and future generations, to  
invest in efficient and renewable energy. I  
call your attention to case numbers: 14-1297-EL-SSO  
and 14-1693-EL-SSO.

Please take the responsible action to  
insure a cleaner and safer tomorrow for  
us all. Thank You.

Sincerely,  
Pamela A. Schmitt  
24001 Bruce Rd.  
Bay Village, OH. 44140

Public Utilities Commission of Ohio,

As an Ohio citizen I am asking you to please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. My family and I care about reducing toxic pollution and saving money on electric bills. Please know that limiting pollution to our air and water leads to fewer deaths & sickness for everyone, inside and outside OHIO.

To Governor Kasich

To Public Utilities Commn. of Ohio

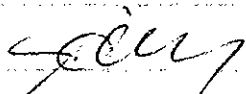

PUCO

Case No. 14-1297-EL-SSO

14-1693-EL-SSO

Please end the freeze on Ohio's clean energy standards. I also ask that the First Energy's AEP rate increases be denied.

While I value "studying issues", I more value clean energy standards. As long as Ohio "subsidizes" inefficient energy sources, corporations will not seek clean energy. I am concerned about air & water pollution. Please think about Ohio's future if the freeze/bailout continues.

14-1297-EL-880  
14-1693-EL-880

Our family is very concerned with our state's efforts in using renewable energy. We care about reducing toxic pollution and saving money on our electric bills. Ohio needs to be a leader in reducing dependence on coal for electrical generation. There is no such thing as clean coal as coal creates mercury and other contaminants that pollute drinking water sources as well as Lake Erie - right here in our neighborhood.

Ohio can do better and should! Do not put a indefinite freeze on our clean energy standards. Why would you want our state to go backward? Do not subsidize old polluting technologies but rather invest in new technologies and renewable energy. Renewable energy creates jobs too!

Finally, you need to care about the health and safety of the citizens on this State - Stop polluting our air and water when sound strategies exist and can be implemented. Stop supporting the anti-environment line with failed policies and inaction.

Governor Kasich

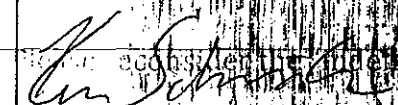

Please reconsider the indefinite freeze on our clean energy standards.

The pollution created by the usage of outdated coal plants is harming Ohioans. Technology to make these plants cleaner is available, which will allow people to live healthier lives, help our environment and position Ohio as an innovator.

The time is right, we have seen the rejuvenation of the American auto industry through regulation and the creation of higher emission standards. It is time to do the same with the underperforming, dirty coal plants in Ohio.

I am writing to voice my opinion regarding to potential bailout of First Energy and their outdated, inefficient coal plants.

Have we not learned our lesson from previous failed bailouts of large corporations whose sole intent is to drain the consumer of more money and control their choice of purchase suppliers? It is time for First Energy to spend some of their profits on updated and efficient means of supplying power to the consumer in a manner that makes sense for us now, as well as into the future.

If First Energy is forced to shutter their outdated plants, then so be it. Personally, I am not inclined to pad the pockets of First Energy executives while they continually search for ways to charge me more to extend the life of their archaic facilities.

Respectfully,

A handwritten signature in black ink, appearing to be 'Thad Gregg', with a long horizontal line extending to the right.

Columbus, OH 43215

I am writing to voice my opinion regarding to potential bailout of First Energy and their outdated, inefficient coal plants.

Have we not learned our lesson from previous failed bailouts of large corporations whose sole intent is to drain the consumer of more money and control their choice of purchase suppliers? It is time for First Energy to spend some of their profits on updated and efficient means of supplying power to the consumer in a manner that makes sense for us now, as well as into the future.

If First Energy is forced to shutter their outdated plants, then so be it. Personally, I am not inclined to pad the pockets of First Energy executives while they continually search for ways to charge me more to extend the life of their archaic facilities.

Respectfully,

A handwritten signature in black ink, appearing to read 'Aaron Gregg', with a long horizontal flourish extending to the right.

Aaron Gregg

To Public Utilities Commission of Ohio:

A bailout of old, polluting technology only benefits utility shareholders and delays investment in efficiency and renewable energy. My family and I care about reducing toxic pollution and saving money on our electric bills. I have a young daughter and would like to see her grow up in a healthy environment with less pollution.

Case #'s

Willoughby OH 44104

12/12/15

Dear Governor Kasich and  
The Public Utilities Commission of Ohio,

I am writing today in regard to  
Case numbers 14-1297-EL-SSO and  
14-1693-EL-SSO pertaining to clean  
energy and the elimination of dependence  
on coal for energy. As a citizen  
of North East Ohio, I have witnessed  
for years the foul colored haze  
spilling from the CEI plant  
in Timberlake, Ohio. The neighborhood  
and houses have been covered  
in ash and soot from the emission.  
I work in the local hospital and  
have encountered countless patients  
with pulmonary complications  
which are only made worse by the  
poor air quality. As a voter, I  
hope that you will be a voice  
for myself and other concerned  
citizens. Please oppose an  
indefinite freeze on clean energy  
standards and help to provide  
higher standards at an affordable  
price for all citizens. Let's once  
and for all stop unnecessary  
pollution of our water and air.  
Lives are more important than  
dollars.

Sincerely,

Dawn M. Berotes

Lake County Ohio Resident

To those concerned and involved,

Case # 14-1297-EL-SSO; 14-1693-EL-SSO

- Please deny the rate increase to lock consumers into buying power from Ohio's oldest coal plants.
- Please oppose an "indefinite freeze" of our clean energy standards.
- No bailouts for old, polluting technology. Support investment in clean energy.
- As concerned citizens, we support as a priority the reduction of toxic pollution, greenhouse gases and carbon emissions.
- We further support accelerated reduction of dependence on coal and a mandatory reduction in pollutants such as mercury which risk our drinking water and the environment for our and future generations.
- The reduction of pollution to our air, water and environment resulting from old and polluting technologies is not simply a choice. It's a requirement for our sustainability and a responsibility to uphold the health and a safe environment for all.

Sincerely,

Curtis C. Vaught

1987 Willow Ridge Ln

14-1297-EL-SSO +  
14-1693-EL-SSO

It's time to put an end to burning coal for power in Ohio! We all know it's bad for us & the environment & it's time to find clean renewable sources of energy in Ohio. We need to not encourage the use of coal so the changes can be made. I don't want my power to come from coal plants. Please do what you can to stop it.

Thanks,

Eunice Palfy-Muhoray

12/19/15

To the Public Utilities Commission  
of Ohio,

I am writing to you concerning the  
case numbers 14-1297-EL-SSO and  
14-1693-EL-SSO  
and their importance to the future  
of Ohio's clean + protected  
environment.

I grew up knowing the country  
was (more or less) protected by the  
Clean Air Act. My dad is a bio-  
chemist who worked to invent a  
system to clean up industrial  
waste water using sunlight.

Keeping our environment clean +  
hazard-free + protected for all + for  
all time is extremely important  
to me +, I would hope, to you.  
After all, you + your families  
breathe the same air as the  
rest of us.

1909 Basswood Place  
Kent, OH 44240  
Please oppose an "indefinite  
freeze" of our clean energy standards.  
Please stand against those who  
want to exploit the environment  
of the great state of Ohio -

Thank you, Ellen Haggerty

Re: Case # 1297-EL-SSO  
Case # 1693-EL-SSO

12/19/15

To the members of PUCO,

There has never been a more important time to take a stand and fight for clean air and water in our state, our country and our world. As the agency charged with the regulation of utility service providers in our state, you are in a powerful position to take a leadership role in protecting the environment now and for future generations. My family and I care deeply about reducing toxic pollution in the air, ground and water. Reducing our dependence on coal for electricity reduces mercury and other contamination from polluting drinking water from Lake Erie and the Ohio River. Limiting pollution to our air and water leads to fewer deaths and illnesses for everyone, inside and outside of Ohio.

A bailout of old, polluting technology only benefits utility shareholders and delays investment in efficiency and renewable energy. Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest ~~and~~ coal plants and oppose an "indefinite freeze" of our clean energy standards. It is our responsibility right now to ensure a safe and habitable planet for ourselves and future generations. Your leadership on these matters is critical.

Thank you,  
Margaret Kernen

PUBLIC UTILITIES COM, of Ohio  
180 EAST BROAD ST.  
COLUMBUS, Ohio 43215

DEAR SIRS:

EVERYONE IN OHIO, CARES ABOUT Reducing  
TOXIC POLLUTION, AND Lowering OUR ELECTRIC  
BILLS EACH MONTH. We should Reduce The  
AMOUNT of COAL That COMPANIES USE, to  
STOP Mercury AND other TOXINS from  
Polluting our water systems, Pollution  
leads to illness AND possibly death  
AMONG people IN OUR STATE.

There should be a freeze of our clean  
ENERGY STANDARDS. you should deny A RATE  
INCREASE to lock consumers into purchasing  
power from coal plants That are outdated  
by today's standards AND pollute our  
ATMOSPHERE

IN RE: Case #14-1297-EL-SSO and #14-1693-EL-SSO

18 December 2015

Dear PUCO Commissioners,

Please listen to your citizens who care about the environment in our home state. We Ohioans need you to stop enabling Ohio's oldest, dirtiest coal plants from continuing to harm the environment. We need action on clean energy standards. We need investment in renewable energy NOW.

I believe we can reduce pollution with proper investment in renewable energy resources. I'm very concerned about Lake Erie pollution. Here in Medina County, we derive our drinking water from the lake. I don't want it to be tainted with heavy metals or other contaminants. Having a clean, beautiful lake will help with building tourism along the lakefront, too—we're going to be showcased at the RNC convention just a few months from now. Do we want the "local color" stories to feature pollution on the lake? NO!!! We want those stories to feature how forward-thinking we are about protecting the lake and the environment for everyone's health and enjoyment.

An old Chinese proverb states: The best time to plant a tree is 20 years ago. The second-best time is NOW. Please act now, for the sake of my child and niece and nephew, all Ohioans who I want to grow up with a cleaner, brighter future.

Sincerely,

A handwritten signature in black ink that reads "Karla Robinson". The signature is written in a cursive, flowing style.

14-1693-EL-SSO

Donna Kasich  
Public Utilities Commission of Ohio  
180 East Broad  
Columbus, Ohio 43215

I am writing this letter in conjunction with Ohio Citizens Action Committee as a supporter of reduction of our dependence on coal for electricity purposes.

I am of the understanding coal break down increases contaminants to Ohio waterways including the Ohio River and Lake Erie. Water is a valuable resource we can not afford to squander. Limiting pollution to these resources only makes sense. As a nurse, I'm actively aware of what air pollution and/or water pollution can transpire into related diseases contracted via pollution. (over)

Dear Commissioners,

Please deny the rate increase; and please work to increase efficient and renewable energy sources.

We must reduce our dependence on coal. As a child, I saw the incredible pollution that ~~came~~ from a coal furnace - our house was constantly needing cleaning up from the soot deposited daily. The air pollution resulting from burning coal was extremely evident.

There is no excuse for continuing to produce toxic polluting substances. Every effort must be made to limit pollution as much as possible. We know the problems and we know ways to solve them - there is no excuse for doing otherwise.

Thank you for your consideration,

Attention, to whom this may concern,  
who has power and influence, at the  
Public Utilities Commission of Ohio:

Citizens do care, about paying  
money, towards things that will do good for  
the world. Rewarding old plants, with  
money, is counterintuitive to a healthy  
growth and a sustainable environment  
for all. Please take into consideration, of  
those concerns, from people who do want  
to invest into more renewable energy and  
clean air, as well as, drinking water. The  
pollution, on this planet, is seen in our weather  
and is killing this earth.

I seek long term health for all,  
not just money.

Thank you.

Sincerely,  
Karen Slaminke

Columbus, Ohio 43215

Dear Public Utilities Commission of Ohio,

I am concerned about your choices and the direction that Ohio's Energy consumption is heading with the cases 14-1297-EL-SSO and 14-1693-EL-SSO.

I want to reduce air pollution, save money on my electric bill and urge our utilities to provide cleaner energy sources for our electricity.

Coal power plants are the largest source of carbon pollution in the country. The federal EPA finalized rules on the clean power plan in August 2015, requiring a 32% reduction in carbon emissions from the power sector by 2030. The plan gives each state flexibility in creating a state plan for implementation of the rule. A state plan that emphasizes energy efficiency and renewables as tools for compliance is cost-effective and yields significant health benefits.

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, and dirtiest coal plants. You need to oppose an "indefinite freeze" of our clean energy standards.

A bailout of old, polluting technology only benefits utility shareholders and delays investment in efficiency and renewable energy. Please consider supporting wind turbines on the lake through project Icebreaker by LEEDCo.

Choosing to support clean, renewable energy is a better strategy than the bailout.

Sincerely,

  
Adam Calvelage

**Re: Please STOP the Bailouts and STOP the Freeze**

- **Case # 14-1297-EL-SSO**
- **case # 14-1693-EL-SSO**

Please STOP the bailouts of OLD, polluting technology. My family believes that this benefit to utility share holders only delays investment s in more efficient and renewable energy. We are strongly in favor of clean energy standards and incentives to increase the use of such power. Further, the money saved from the bailouts can be used to invest in retraining of workers to the more efficient and clean energy, so as not to put hard working Ohioans out of work.

My family and I care about reducing toxic pollution and our dependence on coal for electricity. I want my children to breathe fresh Ohio air, and drinking clean water that is free of mercury and other contaminating polluting drinking water from Lake Erie and the Ohio River. Many of my family and friends, including myself, suffer from asthma and other air pollution related illnesses. You have the power to clean up the air and water for us; to help improve our health. Please use your powers wisely.

Thank you for all you do for Ohio and Ohioans!

Dear ~~Gov. Kasich~~: PUCO

My family has lived in Willoughby, Ohio, for 18 years. We have 3 children. Our daughter does research @ Nationwide Children's Hospital, & we have twins who are @ OSU & Miami U.

As they grew up, we would drive up our street & see the coal powerplant every day. When they were young, I told them it was a cloud maker. Now, I am so pleased it has been shut down. Either way, we will not be sure about the damage this plant has done over the years.

Please, support all efforts to make our air & water safe. Oh my gosh — I live less than a mile from the wonderful, fresh water of Lake Erie! It's a World treasure that we must protect.

Dear Public Utilities Commission of Ohio:

I have lived in Ohio my full almost 44 years (with the exception of my 2-year service in Ghana with the Peace Corps), and I am writing to express my concern about the current situation with regard to clean energy in this state. This is in reference to Cases 14-1297-EL-SSO and 14-1693-EL-SSO.

As I know you've also expressed recently, I am not fond of the extended freeze on clean energy standards in Ohio. Please continue to oppose this freeze and help our state move forward.

I truly believe in reducing our dependence on coal for a number of reasons; mainly, I feel that continued dependence on fossil fuels hampers economic growth and harms the health of our environment and our people.

Please continue to work to expand renewable energy in Ohio.

Sincerely,

A handwritten signature in black ink, appearing to be 'Mari', with a long horizontal flourish extending to the right.

Dear Governor Kasich,

I know that you are very involved in your Presidential campaign but I would ask you to indulge me for a few moments. In fact, you might want to incorporate some of what I am writing about into your thoughts for your presidency.

Energy production is high on your list of priorities. I know that we need to find less expensive sources of electricity for the people of Ohio and the United States. However, using a rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal fired plants is not the way to achieve that goal.

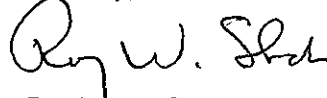

These plants are using old technologies in producing energy. A bailout of old, polluting technology only benefits utility shareholders and delays investment in efficiency and renewable energy. My wife and I care about reducing toxic pollution and saving money on our electric bills. Our son is an "eco-biologist" so we truly understand the cost of pollution. It is not only a monetary cost, It is a "life changing and earth changing" challenge.

We must some how reduce or dependence on coal for electricity to ensure that we have clean water in our streams, rivers and our greatest resource, Lake Erie. Limiting pollution benefits everyone.

I hope that I can depend on you to take action and see to it that no more bailouts are given to the utility companies. Please oppose an "indefinite freeze" of our clean energy standards.

Thank you very much for your consideration.

Re: PUCO Rate Hearings and Coal Plant Pollution  
Case Number 14-1297-EL-SSO  
Case Number 14-1693-EL-SSO

My family and friends care deeply about reducing air pollution. My husband has COPD, and several of our friends have respiratory ailments, which are sensitive to air-borne pollutants – including those from coal-fired power plants.

We are also interested in saving money on our electric bills.

Please deny any rate increases that would lock Ohio consumers into buying electric power from Ohio's oldest, dirtiest and least efficient coal fired power plants. Also, please oppose an "indefinite freeze", or any freeze of our clean energy standards. Ohio should be making continual progress towards clean energy goals.

Bailing out old, polluting coal plant technology only provides a short-term benefit to utility shareholders and executives. It causes long-term, perhaps irreversible damage to our environment, our air and water, and may well shorten my and my husband's life. It delays investment in more efficient, cleaner and renewable energy. Moreover, reducing our dependence on coal for electricity will also reduce mercury and other toxic contaminants from polluting water from the Ohio River to Lake Erie.

Limiting and reducing pollution of our air and water will lead to fewer deaths and illness for everyone, both inside and outside Ohio. I fear we are losing our clean water supply through complete lack of concern over toxic pollution of these sources.

Please deny the rate increases I mentioned above, and please do not allow any freeze in Ohio's clean energy standards.

Re: PUCO Rate Hearings and Coal Plant Pollution  
Case Number 14-1297-EL-SSO  
Case Number 14-1693-EL-SSO

My family and friends care deeply about reducing air pollution. I have COPD and PAH, and several of our friends have respiratory ailments, which are sensitive to and aggravated by air-borne pollutants – including pollutants from coal-fired power plants.

We are also interested in saving money on our electric bills, and opposed to rate increases that would force us and other Ohio consumers to buy electric power from Ohio's oldest, dirtiest and least efficient coal fired power plants. Please deny any rate increases that would lock Ohio consumers into buying power from such inefficient outdated coal fired power plants.

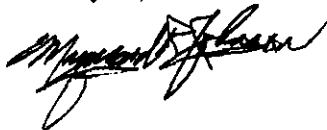

Also, please oppose an "indefinite freeze", or any freeze of our clean energy standards. Ohio should be making continual progress towards clean energy goals. Ohio should be a leader – not a foot-dragger at the back of the pack.

Bailing out old, polluting coal plant technology only provides a short-term benefit to utility shareholders and executives. It delays investment in more efficient, cleaner and renewable energy. Aside from the damage done to our air, water and public health, delay in moving to cleaner and more efficient energy will make it more expensive in the long run.

Moreover, reducing our dependence on coal for electricity will also reduce mercury and other toxic contaminants from polluting water from the Ohio River to Lake Erie. Limiting and reducing pollution of our air and water will lead to fewer deaths and illness for everyone, both inside and outside Ohio. And fewer death and illness saves money, as well as lives and health.

Again, please deny the above-mentioned rate increases and please oppose any freeze on Ohio's clean energy standards.

Thank you,

Maynard R. Johnson

Dear ~~XXXXXXXXXX~~ and Puco,

Please stop the bailouts and end the freeze. Please deny the rate increase to lock the consumer into buying power from Ohio's oldest and dirtiest coal plants. As a family we want to reduce toxic pollution, immediately! If we reduce dependency on coal for electricity, Mercury and other contaminants will no longer pollute our drinking water.

Thank you for listening to us the consumers.

Re: Case Numbers 14-1297-EL-SSO and 14-1693-EL-SSO

Dear ~~Governor Kasich~~ and PUCO,

I am writing to oppose bailing out the utility companies and continuing to fund fossil fuels. You need to be on the side of the consumers and customers and not the side of the industry that is trying to perpetuate what we science shows to be bad for the environment, our health, and our planet.

Sincerely,

A handwritten signature in black ink, appearing to read "Ellie Block". The signature is fluid and cursive, with the first name "Ellie" and last name "Block" clearly distinguishable.

Rick Block

PUCO,

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

Please oppose an "indefinite freeze" of our clean energy standards. A bailout of old, polluting technology only benefits utility shareholders and delays investment in efficiency and renewable energy.

My family & I care about reducing toxic pollution and saving money on our electric bills.

Reducing our dependence on coal for electricity reduces mercury and other contamination from polluting drinking water from Lake Erie and the Ohio River.

Limiting pollution to our air and water leads to fewer deaths and sicknesses for everyone, inside and outside Ohio.

Thank you,

Columbus, OH 43215

To Whom It May Concern:

Our family sincerely cares about reducing pollution, and, like most families, we would appreciate saving money on our electric bills. Reducing pollution in and to the air and water results in fewer illnesses and deaths (thereby reducing health care costs to us all). Reducing our dependency on coal for electricity also decreases mercury in our drinking water, the Great Lakes, and local rivers. Our family absolutely opposes an indefinite freeze of our clean energy standards. We ask that you stand with us and stop bailouts for old technologies, and deny the rate increase to lock families into

buying power from Ohio's oldest  
coal plants.

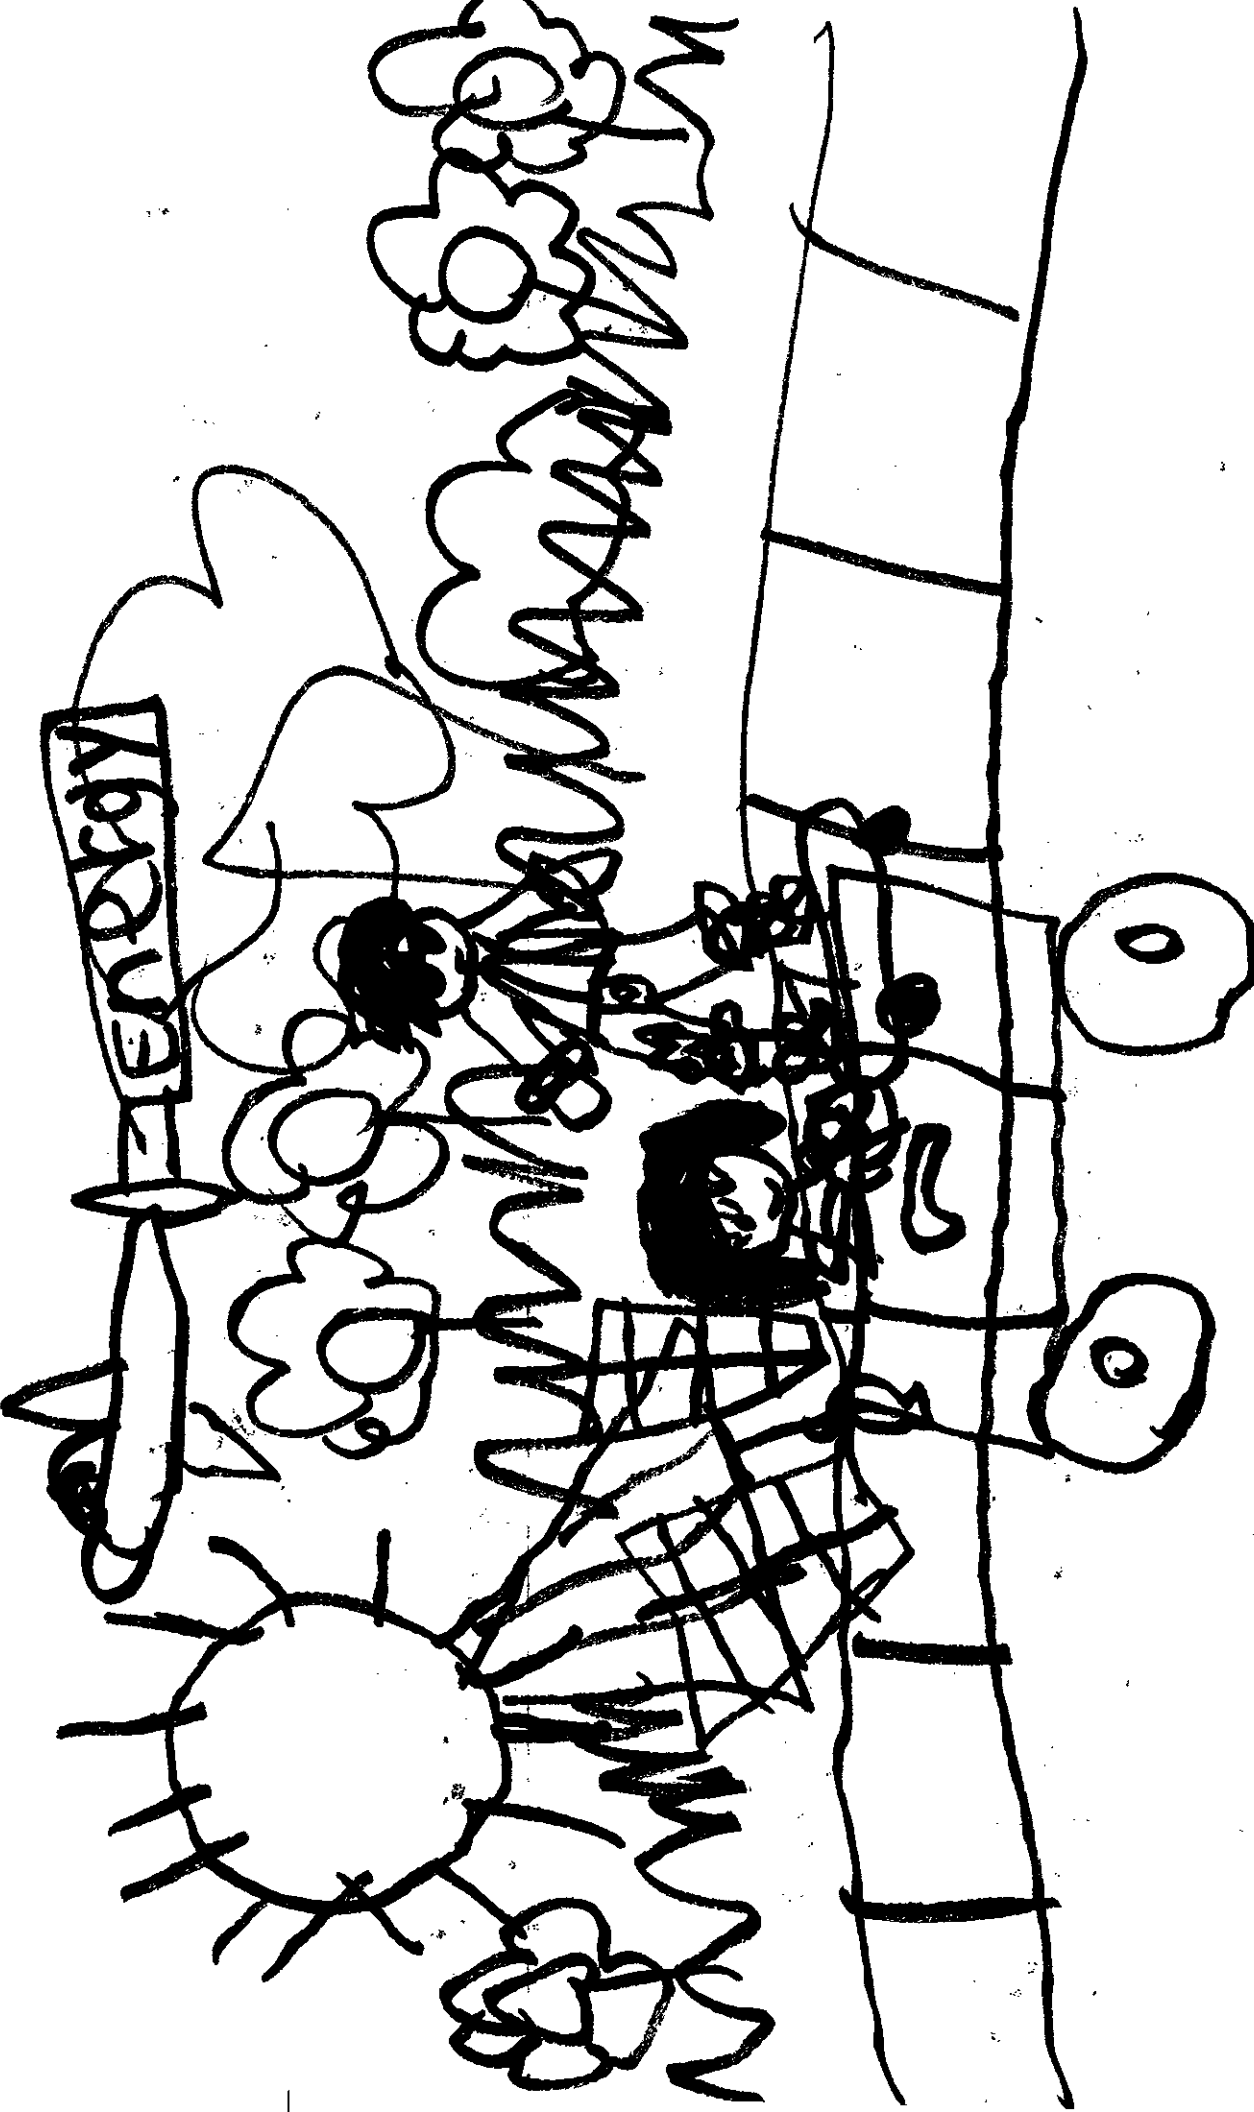

Thank you for your time and  
consideration.

Sincerely,  
Erin E. Langrove
