To whom it may concern,

14-1297 EL-ASO

Please Deny the rate increase to Lock consumers into buying power from Ohio's oldest, dirtiest coal plants. It only benefits ~~locks~~ Utility Shareholders & delays investment in efficiency & renewable energy.

I am concerned about the  
continued use of coal to generate  
electricity. It pollutes our air +  
water.

Sincerely

Anne Gardner

Dear Commissioners!

PUCO

Thank you for your attention to First Energy's bailout proposal. I am a First Energy customer who is concerned about rates impacts from a bailout of this company that acted imprudently in overbuilding coal and nuclear generation while fighting the national trend of investing in efficiency and clean energy technologies... NO, I DON'T WANT TO BAIL THEM OUT!

Company Leadership had a choice; Investors in this for profit had a choice about resource plans and investments. They put great effort into overturning the will of the people to have a cleaner, more efficient, more modern energy system. Please do not reward the company and its investors for imprudently betting on business as usual at the expense of customers. They made a business decision they should live with.

Sincerely,  
Ruby J. Nance

FILE

To the Public Commission Members,  
 AEP of Ohio sent a letter to its  
 users proudly telling us of all the  
 improvements it has made for  
 future consumers. It has been my  
 impression that these capital in-  
 vestments were made before they  
 approached PUCO. Is this legal?  
 Of course, now, they want to raise  
 their customer's cost. It might not  
 seem like much of an increase but  
 added to water, sewer and other  
 utilities plus rent and other  
 necessities, it is becoming back-  
 breaking. In '92 and I don't get a  
 raise while for others with much  
 worse problems, it's just not possible.  
 Please give AEP's request careful  
 consideration before deciding.

Sincerely,  
 Nancy Heath
