

Public Utilities Commission of Ohio,

I am a citizen of Wyoming Ohio and have come to an understanding that the Public Utilities Commission of Ohio is trying to raise rates and use the profits to cover the costs of their outdated coal plants. Why should the rate increase which would lock consumers into buying power from Ohio's oldest, dirtiest coal plants even be on the table? Please deny this rate increase for my family and for all the citizens of Ohio.

These plants need to be cleaned up but not by the consumers. These plants currently give off mercury and other contaminants, polluting water in the Ohio River. Reducing our reliance on coal for electricity would help eliminate or reduce these types of contaminants. Please don't allow the bailout. Hold them accountable, the energy companies and utility shareholders, make them clean up the mess they have been making money on, not the consumer.

Sincerely,

Dear Commissioners,

I oppose an indefinite freeze of
Ohio's clean energy standards. Please
work to move our State towards
renewable clean energy and not coal
power plants.

Sincerely,

To The members of the Public Utilities
Commission,

Please do not allow for further environmental degradation by allowing a continued breeze of regulations. Please do not give bail-outs to companies that continue to use dirty old technologies. Instead, give subsidies to companies who provide clean energy (geothermal, solar, wind etc.) This could be helpful for old companies to transform from coal (and nuclear) ~~and~~ as well as new companies start up costs.

We've got to get "off this ferris-wheel!"
I am a Duke Stock Share holder and
feel that (as an Ohioan) this is

the only sensible course of
action. Thank you,

Sally Goldsmith

Dear PUCO members,

I support Ohio Citizen Action's clean air campaign to –

- Stop the financial bailout of Ohio's outdated, least efficient coal plants, which would be funded by customers, and
- Demand to end the freeze on Ohio's renewable energy and energy efficiency standards for utilities, which have saved Ohio businesses and consumers \$1.03 billion since 2009.

Innovation only happens when folks are forced to think differently. Do not let the utility companies delay taking action to study things further. We are beyond that point.

If they do not want to invest, I am sure there are startups out there will to do so.

Sincerely,

A handwritten signature in black ink that reads "Graham Harden". The signature is written in a cursive, flowing style.

Re: Stop Bailing Out Duke Energy
and Other Energy Companies

We need to focus on new
technology that allows for
the creation of energy with
less pollution.

Duke & other companies will never
do it voluntarily. You must
make them do it. Stop enabling
these irresponsible and dangerous
practices of using the same
old, polluting technology.

EC

12/15

Public Utilities of Ohio -

Please deny the bailout to our older facilities. We do not need rate increases.

Reduction of toxic pollution is a must.

Sincerely,
Sharon Chalmer

12/23/15

P.U.C.O.,

A bailout of old, polluting
technology only benefits
utility shareholders and delays
investment in efficiency and
renewable energy.

Please stop the
bailouts!

Thank you,
Leah R. O'Brien

PUCO,

Please deny the usage and

increase to lock consumers
