PUCO

January 4, 2016

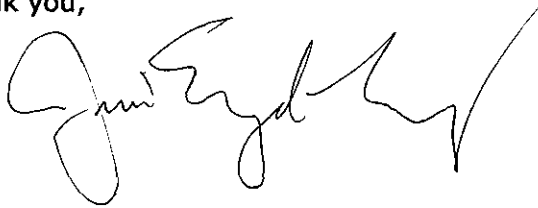

Dear members of PUCO,

I am writing to urge you to fulfill your opportunity to serve the residents of Ohio by keeping our environment safe and the health of our citizens secure. Although I am an older person, I am able to see the importance of change and we need to replace the traditional coal and gas resources in use since the Industrial Revolution with clean and renewable energy. With a huge increase in population in the last 75 years, we have to be realistic about which natural resources will take us into the future with the least amount of damage to both our people and environment. As you know, the toxicity of using fossil fuels has a tremendously negative impact on our health and well-being and has led to huge increases in illness and health care costs.

Please stop bailing out obsolete technologies and have the courage to move Ohio forward with more efficient and renewable energy. Europe is way ahead of us in this field and it's embarrassing that we don't have the backbone or vision to take the lead in research and the development of new technologies that leave a softer footprint on the Earth.

I urge you to use your position to provide the leadership that Ohioans expect of you by supporting actions that result in the cleanest possible air and water for all of us. As you review cases 14-1297-EL-SSO and 14-1693-EL-SSO, please take into consideration the long term issues enumerated above.

Thank you,

Jeni Engel-Conley
Manager, eni9
