Dear O.P.S.B.,

RECEIVED-DOCKETING DIV
PUCO
2016 JAN 13 AM 10:46

I am writing this letter to be entered as an "intervener" into Invenergy's newest change to the Hardin Wind industrial complex proposed to be situated in Hardin County. I heard they were entering changes to the wind complex by wanting approval of new turbines, access roads, and the like. If this is indeed true, I am petitioning for intervener status.

I apologize for not citing the number you may have assigned to them but my letter from the Invenergy and Hardin Wind must have been lost in the mail. I know that your board requires them to send such a letter concerning this process to alert the public within the wind complex foot print of such changes. I believe this is the same requirement pertaining to the O.P.S.B public hearing in January of 2010. (Invenergy never sent these required letters either to the property owner with in the foot print, which in itself should make it so they have to reapply for the ability to build. No one was notified other than those who were under contract. I had only stumbled upon the 2010 hearing by chance and was the only one who spoke against it. Oddly enough, I was later found to be on the "Participating Land Owner" list which meant a turbine could be 400 feet from my house. I am sure that was an innocent mistake however. Likewise, the other numerous past mistakes like over-looking an entire electric co-op.)

The adding new types and/or different manufacturers of turbines, changing of the access roads, adding and/or moving turbines themselves changes their original proposed wind complex. This also voids their permit as should it when they do not follow the procedures and requirements outlined by your board.

This entire project should be brought up to date by today's lawful setbacks and any changes to the original proposal calls for an entirely new process and application.

Humbly Submitted,

Ed Rogers

Hardin County Resident
