To Whom It May Concern:

I understand that Ohio's clean energy standards have been frozen. *Please oppose an indefinite freeze of those standards.*

I would also like to ask you to work with the Ohio General Assembly to come up with legislation that supports a varied and reliable mix of electricity, so that we can get away from the ill effects of coal. It may be cheaper money-wise, but the toll it takes on our health is unacceptable. On that note, *please deny the rate increase that locks consumers into buying from Ohio's oldest and dirtiest coal plants.*

We must work toward clean air and water... basic essentials to all life. We have many creative minds in this state. Please put them to work to brainstorm solutions. Then call on the average Joes in Ohio to help where we can.

Thank you for your attention.

Sincerely,

Shirley Carpenter

Re: Case numbers 14-1297-EL-SSO, 14-1693-EL-SSO ^{RDR}

To Whom It May Concern:

I am writing to request that you deny the rate increase recently requested by Duke Energy, AEP, and First Energy to offload the expense of maintaining their outdated coal plants onto consumers. Granting such a request does not benefit the people of Ohio, but rather shareholders and stakeholders who are attempting to delay seeking newer, more efficient, and environmentally friendly sources of renewable energy in order to cut costs. Reducing our dependence on such outdated energy sources is the only way forward if we want to keep Ohio healthy.

Thank you for considering my request,

Rebecca Spagnuolo
