Columbus, OH 43215

Dear members of the Public Utilities Commission of Ohio,

This letter is in reference to case number 14-1297-EL-SSO. I would like to commend you for denying the initial request by Duke Energy and AEP for a Purchase Power Agreement that would transfer costs of outdated and inefficient coal power plants to the citizens of Ohio. I would also like to encourage you to deny as similar request by First Energy. Your initial decision supports your mission as follows: (1) mandating the availability of adequate, safe and reliable utility service to all business, industrial and residential consumers; (2) ensuring financial integrity and service reliability in the Ohio utility industry; and (3) promoting utility infrastructure investment through appropriate regulatory policies and structures.

Protecting the safety of the citizens of Ohio includes reducing negative impacts energy sources have on our environmental and, thus, human health. Shifting financial responsibility to Ohioans, allows companies such as these to continue to operate inefficient plants that directly contribute to current environmental and human health challenges we face, particularly increased algal blooms in western Lake Erie due to warmer water temperatures and larger, more intense storm events. To be fiscally responsible and make sound infrastructure improvements, these companies should be moving away from antiquated technology toward more responsible and sustainable "Lake friendly" power sources, such as wind and solar.

Sincerely,

Kristin K. Arend, PhD

Public Utilities Commission of OHIO,

My family and I care about reducing toxic pollution and saving money on our electric bills.

We have a family of six and would like to raise healthy kids and put our money towards their future, every little bit helps!

Limiting Pollution to our air and water leads to fewer deaths and sicknesses for everyone, inside and outside OHIO.

Sincerely ,

case # 14-1297-EL-SSO

Case # 14-1297-EL-SSO

A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy. I have 3 young children that I would like to see grow up and have families of their own, and still be able to breathe fresh air and enjoy the lakes!!

PUCO

Dear Members of PucO:

On behalf of today's citizens and future generations of Ohioans please consider the devastating effects on our environment and health by not bailing out old energy technologies. Ohio has the capacity, work force, talent, and vision to be a national leader in future, sustainable energy technologies that are already in use, even in their infancy. These are the economic engines of the future, why not resolve now to become a leader? Please deny the rate increase.

Sincerely yours,

Anne Knecht  
2482 Kingston Rd. Cleveland 44118

December 21, 2015

Public Utilities Commission of OHIO,

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

My family and I care about reducing toxic pollution and saving money on our electric bills.

We have a family of six and would like to raise healthy kids and put our money towards their future, every little bit helps!

Sincerely ,

case # 14-1297-EL-550

I urge you to continue  
to deny Just Engou's  
request for a bailout of  
their outdated and  
inefficient coal plants.  
I feel they cause pollution  
of our rivers and lakes.  
Endanger of our water supply.

Dear members of the Public Utilities Commission,

Recently, a representative from Ohio Citizen Action informed us of the 2-year freeze on Ohio's clean energy standards. We are concerned about this, and request that you do your part in reinstituting Ohio's development of renewable energy. It is imperative to consider the negative effect of pollution on our children and families. In addition, we believe Ohio should be a leader in clean energy technology. We appreciate your support on this issue.

Sincerely,

Elizabeth Rauschultz Farrell

To the PU CO —

I am old enough to remember PU CO as a  
sometimes advocate of ordinary citizens  
at the mercy of deals between elected  
officials and people we never saw.

But that was another governor.

You were chosen for reasons I do not  
want to examine closely, because I  
am sick of how commonplace foxes  
have become in running the various  
hen houses citizens rely on to protect their  
interests.

And it's not even sensible to get angry,  
or ask if you have no shame — because  
I'll never know. What I do know is that  
there is only one way to interpret raising the  
rates and consigning Ohio's citizens to the  
filthy products of old, polluting facilities. Only  
money that serves other interests — not ours — could  
convince you to so betray us — to put us even further  
behind in the inevitable arc toward same and  
efficient renewable energy.

Your grand children will not be rich enough to avoid the  
consequences of that delay.

Judith
