Dear Governor Kasich and the Public Utilities Commission of Ohio,

I am writing to urge you to deny the energy rate increase and to ask you to oppose an indefinite freeze on our clean energy standards.

A bailout of old, polluting coal technology would only benefit utility shareholders, and delay investment in efficiency and renewable energy that would better benefit your constituents - including my family and all Ohio citizens.

My family and I care about reducing toxic pollution and saving money on our electric bills. Please act to reduce our dependence on coal for electricity. Reducing dependence on coal also reduces the presence of mercury and other contaminants that pollute the air we breathe and our drinking water from Lake Erie and the Ohio River.

Thank you for your consideration!

Sincerely,

Randeep Dhiman and family

Regarding case 14-1297-EL-SSO

14-1693-EL-SSO

My family and I care about reducing toxic pollution and saving money on our electric bills. We oppose an "indefinite freeze" of our clean energy standards. We would hope to reduce our dependence on coal for electricity to reduce mercury and other contamination which affects drinking water from Lake Erie and the Ohio River.

Thank you,

Dear Commissioners

My family believes that our lakes, streams and forests are our most valuable assets. Reducing our dependence on coal for electricity reduces mercury & other contaminants in our drinking water from Lake Erie & the Ohio River.

No one believes in "Clean Coal".

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

More effort on "indefinite freeze" of our clean energy standards. Make this a fore runner in producing clean renewable energy.

Do not aid in seducing our citizens. Do the right thing!!

Thank you,  
Cindy Sheridan

Dear Sir or Madam,

This is a letter showing my support for Ohio Citizens Action and the work that they do. We should be leading the world in establishing clean energy standards, not lagging behind. For our generation and future generations, we need to invest in efficient and renewable energy sources and stop depending on sources that continue to hurt our environment. Now that we know what harm the coal plants can do to our environment, there is not reason to continue to depend on it for our utility needs.

In addition, please do not allow a rate increase to cover the costs of these outdated sources of energy. We do not want to depend on these sources and should not have to shoulder the costs. Any money that is available for energy should be used to invest in efficient and renewable sources.

Thank you for your time and consideration.

Laurie Silver

Dear PUCO and associates

It is unfair to the citizens of Ohio to pollute their water supply and air. Lake Erie already has issues with pollution and Cleveland & other areas that drink from the great lakes pride themselves on how clean their tap water is. Please don't ruin a good thing and alienate those whom you signed up to serve. It is 2016 and we need to make steps toward a cleaner future. Any support given to coal power will result in short term gains and stunts growth.

Thank you  
Peter Grubbs
