RE: Cases: 14-1297-EL-SSO
14-1693-EL-SSO

To the Members of the Public Utilities Commission:

I am writing to strongly encourage you to deny the rate increase and bailout of First Energy. It is also extremely important to oppose an indefinite freeze of our clean energy standards. Continuing to allow the coal plants to pollute our air and water is irresponsible as caretakers of this state and its people. We need to be a leader in the transition to clean energy.

Sincerely,

Tara Hata, M.D.

I am writing you in regards to the pending proposals from the Public Utilities Commission of Ohio (PUCO).

I ask that you please deny the rate increase that will lock consumers into buying power from coal plants that are polluting our air and water. My family and the entire community deserve better than this, and ask that you not allow us to bear the burden for them to continue producing at the oldest and dirtiest coal plants in Ohio.

The second issue is the freeze on our clean energy standards. My family and friends want to reduce toxic pollution and contamination in our drinking water, let alone the need to create long-term solutions for future generations. We must stop making short-term, and short-sighted decisions, and ask that you do your part by opposing an indefinite freeze on these clean energy standards.

Thank you for your consideration and your support of the health and prosperity of Ohioans.

Best Regards,

Scott Jennings

To whom it may concern:

Do not shut down
the coal industry. Make
the coal plants
produce cleaner
energy.
