Technician MI Date Processed FEB 08 2016

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Do not allow these utilities to squash the success that competition has enjoyed because they are losing customers to more competitive providers.

PUCO Case #: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Pat Fulps Principal Clarity Energy Consulting

Docketing Case No.: 14-1297

Notes:

Please docket the attached in the case number above.

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

Docketing Case No.: 14-1297

Notes:

Please docket the attached in the case number above.

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

Docketing Case No.: 14-1297

Notes:

Please docket the attached in the case number above.

Dear Chairman Porter,

New, clean, natural gas plants are great and should help continued diversity in our energy resources. AEP and FirstEnergy's existing coal fired power plants are far from old and inefficient are a great compliment to natural gas fleet. They have been maintained well and are in good condition.

Placing all of our energy eggs in one natural gas basket would be incredibly foolish and its irresponsible for organizations to mislead people this way. We will ultimately have a larger percentage of our energy supply coming from natural gas and renewables, but it has to be part of a larger energy plan. Failing to maintain current infrastructure for the sake of short term natural gas prices is also irresponsible.

PPA's are not subsidies. They provide consistency in a volatile market. This has been the whole sales pitch for energy choice in Ohio (consistency). These people are getting their message confused.
