PUCO Chairman Andre Porter  
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't burden the people with higher prices!

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mrs. Vera Donohue

As elected officials you are accountable to the electorate. You need to remember that when standing at the podium shouting promises, you need to remember that as you look into the future and imagine a tax payer supported lucrative pension with all its inherent health benefits and security for yourself and your families. There are many, many Ohio citizens who do not have that luxury and are being subjected to Corporate greed to fulfill the coffers of the power suppliers.

Your futures and reputations are all at stake here! There is a movement afoot to make PUCO elected not appointed. Just go ahead and give the power generators/suppliers their way and see how long this sweetheart, appointed situation continues.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

First Energy has it's costs higher than my electric bill from Ohio Edison. There is no sense in that. My sister's elec. bill was doubled because of First Energy. How is this fair to anyone especially senior citizens on a budget. Lets figure out what the hell their trying to do and get rid of it. It's just so unfair to ALL people.  
So we all vote NO in my family.

As a constituent and a consumer I feel it is time to take action.

PUCO Chairman Andre Porter  
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

"No negotiating with Terrorists that render us as hostages".

Please Ohio Governor, State Senators, State Representatives and the PUCO Chairman, Andre Porter. Say enough is enough! If they have chosen to pad their wallets instead of up keeping our Power Plants, too bad. Have them at the top take pay cuts. Hold them accountable or it will continue.

Best Regards.

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

This should also include the Local utilities such as the Columbus Ohio Department of Utilities. The Division of Sewer and water is implementing approximately 3.3% increase(about \$8.58 quarterly) to finish jobs that they started about three years ago. If they didn't budget properly to get the job completed, they need to sacrifice before putting the burden on the consumers.

Anyone on Social Security has gone at least three years without any raises, not even a cost of living raise. I just went on Social Security, so I do not know if this has been true fr a longer amount of time.

If the management of these facilities and the employees are willing to go without raises and bonuses and pay back what they have already received, then it may be acceptable to come to consumers. Once it is passed onto consumers the increase should be based on each consumers ability to pay. Right now the magic cutoff for a senior discount of 20% is a household with a \$24,000.00 yearly income. If you are over \$24,000.00 you will be charged the full 3.3%.

That doesn't sound like a large increase, but when you add in the 2-3% for gas and 2-3 % for electricity and other increases for consumers products it is a large hit for consumers on fixed incomes.

Please hold off any increases for anyone until the Public Utilities show that they are being fiscally sound in their business practices.

Thanks, Ric McGiffin

PUCO Chairman Andre Porter  
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Please urge the PUCO to carefully consider this proposal and the best interests of AEPs customers. Is it a necessary and warranted expense?

Electric choice was supposed to bring rate relief to customers but it doesn't appear that it has.

And what about the costs of renewable energy and energy efficiency programs that customers are paying for in their bills that are currently suspended. AEP agreed to these programs and they continue to receive money for them. What was AEP thinking when they agreed to these plans?

Couldn't the money they have received for these unimplemented plans be used to offset the costs of upgrades of old power plants?

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Ms. Linda Rominski

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Look at less profits, you can manage less money...much more than I can at \$1376/month. You need to be ashamed of yourselves! Asking poor people like me to subsidize you. You people are immoral.

My answer is NO! Shame on you for asking

Please DO NOT allow the utility to charge this extra money they want from us. My husband and I are both retired and live on fixed incomes. Between real estate taxes and doctor bills, etc., we just can't take on additional costs right now. PLEASE HELP US!!!

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. Maintaining the grid should be the utility company's issue, not the consumers. Every healthy business looks inward first, before asking for handouts.

I live in an area of frequent outages. 10-15 hours at a time. Going off grid is looking like a safe alternative.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mrs. Melba Tompkins

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Remember how our electric company stuck us with paying for over-priced light bulbs even if we didn't want them because they bought them and it was their "cost of doing business".

Enough dirty tricks. They could have upgraded.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

COMMENT DESCRIPTION:

Pls. Do not grant a raise to first energy. One they'd made million off us. 2 gas prices are dropping and their prices should also. 3 none of us seniors got. A raise. We can't afford any more. 4. The millions/billions they've raked in should have gone toward repairs.

PUCO Chairman Andre Porter  
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

COMPLAINT DESCRIPTION:

I do NOT want pucos to approve the rate plan as proposed by first energy. I do not want to pay higher than necessary electric rates to subsidize their old, inefficient coal power plants. Do not approve first energy's plan to increase rates. It is wrong for our state--pucos's represented constituents.

NO!! to utility bailouts. I am a retired widow and live on social security. I cannot afford to hand over more money to a big utility company for an update to their power plants. They should have been saving part of their income, like their customers do, for their needed "remodeling".

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

AEP needs to shake its operations to the roots, but starting at the top. Perhaps a thorough audit by the the State (since we're being strong-armed to endorse their "request") with an ensuing public report of findings would help them understand their problems better. The reflex to seek higher rates needs to stop; the reflex to look for more efficient operations (and maybe a reduced profit margin in exchange for security with the the income base?) needs to be nurtured.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

PUCO Chairman Andre Porter  
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Sad that companies have this power. Who will help the senior citizens we are already squeezed to the max paying for medical expenses higher deductibles and copayment so. No more bailouts!

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mrs. Lydia J. Hruschak J. Hruschak

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

If most Americans have to "tighten the belt" to make ends meet, why can't the utility companies do the same. Those, like myself, who live on social security, did not get a raise in 2016, so let the utility company employees, especially upper management, learn to budget with what they make and not assume an annual raise is guaranteed.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. I'm still paying and will probably continue to pay for Columbia Gas to repair the riser on my gas line which was a mistake caused by their installation personnel in the first place. The AEP "plea" reminds yet again of their penchant of asking consumers to pay for their mistakes! I beg of you to take appropriate actions on their request on behalf of Ohio's aged population. Many thanks for your concern and consideration. Randy Blaine, Powell, OH

PUCO Chairman Andre Porter  
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. I am retired and \$10.50 a month is just to much.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Utility cost increases should not be passed on to consumer customers, to simply update or repair facilities. Companies should borrow and repay with interest, as do other businesses, from lending institutions to expand their operations. Do not aid in their attempt to shift the entire burden to the consumer. They should have a corporate program installed that would allow for these types of necessities. We trust in your good judgement and your concern for Ohio consumers, including senior citizens, in your decision as to this proposal. Please allow us to have a say in this matter.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

The Perry Power Plant is operating at 50% and has been for at least the past 20 years. The residences served by the Perry Plant has more than doubled in 20 years so there are more households paying for power. It would seem prudent to increase the power and lower the rates. Too much money is spent subsidizing the residents of Perry and all of us are paying for it.

As a retiree on a fixed income, with raising Medicare premiums reducing my Social Securing income, no COLA, increased property taxes for a lessor market value of my home, and other utility increases, the American Dream is gone. (Unless you are in the country illegally!)

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

This is ridiculous. It's only been a few of years since our electricity bills more than tripled overnight. Where we used to routinely pay around \$60/month, in the same house 800 sq ft house with the same usage our budget payment today is \$199.

This coupled with the fact that AEP often doesn't even pay their fair share of taxes (in 2010 didn't they write down their fed taxes to \$0?) and the fact that many working class families like myself often don't even get any annual pay increases makes the mere idea of "donating" billions in increased revenue to this corporation nothing more than lunatic piracy.

Maybe AEP should have invested any of their last budget windfalls in "renewable energy" and equipment upgrades or better yet maybe they should be expected to manage their finances the way I'm expected to manage mine. Like... Oh I dont know... instead of increasing their executive salaries 9.75% in 2014 take care of their own damn shortfalls!!!!!!!!!!!!

Lynda J Ross

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Utilities are for profit companies and as such, are responsible for their own profits and losses. There would be no difference if we subsidized GE or IBM. The utilities are profitable and can use some of their profits to build efficient plants.

Seniors are going to be especially hit hard with this increase. There was no COLA increase as you know and just day to day living expenses are difficult.

Say no to the increase.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

The Perry Power Plant is operating at 50% and has been for at least the past 20 years. The residences served by the Perry Plant has more than doubled in 20 years so there are more households paying for power. It would seem prudent to increase the power and lower the rates. Too much money is spent subsidizing the residents of Perry and all of us are paying for it.

As a retiree on a fixed income, with raising Medicare premiums reducing my Social Securing income, no COLA, increased property taxes for a lessor market value of my home, and other utility increases, the American Dream is gone. (Unless you are in the country illegally!)

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

I am a survivor of not only a Viet Nam War Veteran, but as a victim of the cancer that stole my husband's life. I survive on the benefits he earned through payments into our Social Security System. It is like he is still trying to help me through life.

However, I do not comprehend paying extra for utilities that I must depend on so that I can live as noble a life as I possibly can. And, so I beg of you my beloved Governor and Senators to be behind those who will be overwhelmed by bills should AEP, First Energy and all who ask to become yet richer at our expense.

Sincerely,  
Mrs. Chanty R. Netting

I do not want First Energy to get a bail out. Maybe their executives should take a pay cut or skip their bonuses instead of putting the burden on those who have to count their pennies. The wealthy are always getting richer on the backs of the middle class.

PUCO Chairman Andre Porter  
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. David Norris
