To Whom It May Concern
@ PUCO ;

Please do allow me to weigh in on the First Energy recap funds plan. THEIR power is the priciest I've paid in my life. The bill is high already and I perceive their electricity 4x as expensive to deliver as hydroelectric power. I subsidize First Energy now and use minimal power, under 1,000 kwh/month. To subsidize First Energy further just because they hung wire on the unstrung side of most transmission corridors. Their profits and preying are huge. I object to the PUCO Funding First Energy any more incrementally than is already present. Some of us know exactly where the 2003 blackout originated and why (Walden Hills, under First Energy). They can cut internal flab and waste, including time-wasters. First Energy doesn't keep employees with integrity anyway. Always a handsome dividend is paid the stockholders but hack up (or suspend) the budgets for electric line maintenance (tree trimming). First Energy should learn to do more with less. Their practices are not efficient, among other things. I object.

This was easy to predict First Energy wanting to extort more from customers since they hung the other side of their towers.

Thank you for time + consideration

Lynn Dawn Wiseman, CTSP, AU
