Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.
