Subject: FIRST ENERGY IS LAST IN MY BOOK

Dear Commissioner Johnson,

I am a senior citizen on a fixed income and cannot afford these rate hikes.

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

ROBERT MACDONALD

Subject: Ignore utility companies' scare tactics

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Darlene Young

Dear Chairman Porter,

I have not had a salary increase for years. Most people I know are receiving little or no increase year over year. That said, our utility costs keep climbing. Before allowing the utility companies to raise rates on regular working people like me, my kids, my neighbors, please take a moment to look at the exorbitant salaries the utility executives make, the year over year increases in salary and compensation they experience; the annual profitability the utilities experience. Sometimes the executives deserve to be penalized for poor decision making.

Granting the utilities a deal like this is rewarding them with guaranteed profits which of course will reward the executives with large, undeserved bonuses and higher dividends paid out to the shareholders.

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Dear Commissioner Johnson,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

My husband and I are seniors and on a fixed income. He is a veteran and disabled. We have done everything we know to reduce our usage. We have changed out all of our lighting to LED lighting. We have had our house insulated and have a high efficient furnace and appliances. We also have integrated a home control system to control lighting and heating to use utilities more efficiently. We have attained the lowest rates offered thru the Choice Program. After investing in all the measures to save and conserve we are informed that the Electric Companies are trying to raise our rates. We have made our investment in our equipment. It is time they plan ahead and use their profits to fix their equipment and problems. They do not pay for our improvements. The fees they are allowed to charge are approved by the PUCO and are already extreme. It is time you as our representatives represent your voters and long time tax payers with a company who is exploiting the public for their losses.

Sincerely,

Nancy Gallina

Subject: Protect Ohioans from Utility Power Plays

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Subject: Protect Ohioans from Utility Power Plays

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Scott Rhodes

Dear Commissioner Johnson,

I worked for AEP 10 years and I don't anymore. If they would change management practices by making people work in the field instead of behind a desk. Fire workers that steal from them, instead it's easier to raise everyone rates. They always meet earnings for Wall Street. Maybe they need to change ways to make money.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

Subject: Protect Ohioans from Utility Power Plays

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Della Prather

My husband and I are seniors and on a fixed income. He is a veteran and disabled. We have done everything we know to reduce our usage. We have change out all of our lighting to led lighting. We have had our house insulated and have a high efficient furnace and appliances. We also have integrated a home control systems to control lighting and heating to use utilities more efficiently. We have attained the lowest rates offered thru the Choice Program. After investing in all the measures to save and conserve we are informed that the Electric Companies are trying to raise our rates. We have made our investment in our equipment. It is time they plan ahead and use their profits to fixed their equipment and problems. They do not pay for our improvements. The fees they are allowed to charge are approved by the PUCO and are already extreme. It is time you as our representatives represent your voters and long time tax payers with a company who is exploiting the public for their loses.

Sincerely,

Nancy Gallina

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Andrew Mogorovic

Subject: Pull the Plug on Utility Handouts

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Dear Commissioner Johnson,

My electric bill to go up to pay for AEP's and FirstEnergy's old power plants. Believe it or not, my electric bill is higher than my gas bill - in the winter! The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill would go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Dennis Ko

COMMENT DESCRIPTION:

the public who uses the power generated by the illuminating company has already paid way more for that power then they should have. now that same utility wants us to pay for the costs that were already paid for on our monthly utility bills. the maintenance and upgrades required to do business and provide power were already rolled into the utility rates, which i reiterate, we have already paid. no more outrageous rate hikes should be permitted. stop the hikes!!!!

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

COMMENT DESCRIPTION:

Been made aware of First Energy request to increase rates, I am a retired widower and feel that a rate increase is out of line since the reason for it is that they are not making enough money. Personally I don't receive enough money and as health premiums and other necessary items increase I don't that must because you aren't making a large enough profit then you need to find ways to improve your business in more realistic ways. Totally against this rate increase no matter how small.

COMMENT DESCRIPTION:

Please do not allow FEC to trample on our dollars in their effort to extract a few more dollars from their old generators. The rapaciousness and swinish greed shown by FEC's executives is shocking. It will not result in any new jobs, but it WILL suppress and delay the move to cleaner energy sources. Finally, the cat is out of the bag on this issue: everyone who is aware of the situation knows the score. So please don't corrupt the reputation of the PUCO and weaken the State of Ohio in its effort to get cleaner. Bob Chalfant

As a consumer, I don't think it's my responsibility to ensure a certain level of "profits" for various electric producers and companies. If they need expansion, they need to pay for it the same as I do when I need updating on my home. I need a lot of remodeling....who do I send the bill to? AEP,& First Energy? The citizens of Franklin County turned down a request to voters to build the Nationwide Area....a resounding "NO"...you want it you build it! You make the profits it's not up to us to foot the bill for electric and expansion.

COMMENT DESCRIPTION:

AEP: 14-1693-EL-SSO I wish to log a formal comment regarding case number: AEP: 14-1693-EL-SSO. I am opposed to providing any subsidies to AEP, or any other power company, to prolong the operation of old and failing fossil fueled generation plants. To do so is a blatant misuse of public funds, and robbery of Ohio citizens. The sooner the polluting plants are retired, the better. Renewable technologies are now readily available, on the scale to provide sufficient, reliable power to Ohio customers. To continue propping up inefficient, toxic, legacy power plants is simply absurd, unwise, and even criminal. Our support must go toward solar and wind farms immediately. By removing support for legacy fossil fuel technologies, and subsidizing renewable, clean technologies, we will benefit Ohio industries, create tens of thousands of new jobs, and enhance the health and well-being of all who live in our state. Do NOT place the burden of retiring the old, toxic plants on the shoulders of Ohio citizens! Instead, give incentives to the power companies to build wind and solar farms. It is long past time that the power companies stop using fossil fuels to power their industry.

COMMENT DESCRIPTION:

Good morning, The following comment is in regards to the request submitted by AEP requesting the PUCO grant its request to offset its costs for infrastructure issues. As a home owner or business owner, the expectation is the insurance coverage purchased covers the cost of repairs. If no insurance was purchased, there are no rate hikes or special requests granted its just too bad and that person or business is made to cover that expense. So why are you even considering granting AEP a pass and/or financial break when it has chosen to neglect its infrastructure so it can pay its shareholders. Take a chunk of change out of their pockets rather than those of us who work hard to earn a living. AEP is a multi-billion dollar company it neither needs nor deserves a bailout from its consumers. The often received letter wanting me to buy outside line insurance is just another example of a way to con folks out of their dollars. Please, take a stand and seriously consider making a statement that ungrades and fixes following disasters are part of the companies expense of doing business and need to be planned for rather than reacted to as so often is the case. Maybe they should take some of their own advice and purchase that insurance!!!

Feb 17, 2016

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. William Neumeier

COMMENT DESCRIPTION:

I want to register a complaint regarding a possible rate increase on our electric service. I've been hearing radio and television commercials on this matter. I want to know the justification for a rate increase? I've seen another increase in my AT&T bill, and the cost of food isn't going down! The only commodity that's had a drop in price is gasoline. What domino affect are we going to experience from that! I so no to the proposed rate increase! Thank You, Tanya Hairston

COMMENT DESCRIPTION:

I strongly object to the AEP request for guaranteed profitability. I am a senior citizen. We had no raise this year. AEP is a public utility with many protections. The make enough money to both keep their business going and pay their workers and pay their executives way too much. The donate things to the community just so they can seem to be one of the good guys. But it is our money they are donating. Because of the way they function, they do not deserve to have protection from competitors. And they certainly don't deserve guaranteed profits. Your name implies you have some protection of consumers as part of your mission. Please protect us from their greed.

I agree with those opposed to the AEP/FirstEnergy proposal to capture/recapture their costs for older coal-fired plants. I know of no business model, except for our energy providers, that says push ahead, future be damned, and then says we screwed up, let's stick it to our customers! While I am not a customer of either utility, My wife and I both work for AEP customers. They do not need more bottom line challenges. It's time for these utilities to suck it up, especially since they are ALREADY guaranteed profits!

COMMENT DESCRIPTION:

We are writing to let you know that we oppose paying higher monthly electric bills to bankroll FirstEnergy and American Electric Power plants, especially in light of the fact that (1) here in NE OH we do not have a choice of electric suppliers (like we do with gas suppliers) and (2) we routinely have 10-20 outages throughout the year; have for at least 5 yrs now (and when we contact First Energy-they tell us it's either an animal getting into the substation or the underground wires heaving because of water--even when it hasn't rained in weeks and in either instance there is nothing they can do about it!). The consistent outages have damaged our appliances/electric devices because of power surges and we have had to pay a lot of money to have a whole house surge protector/back up natural gas powered generator attached to our home to try to protect our investments (appliances/tv's/computers/any/all electrical devices). We urge you to decline First Energy's/AEP's request to have customers pay more to subsidize their operations. We cannot afford an additional \$800 a year to pay for inconsistent services. Thank you for your consideration of our comments/concerns.

COMMENT DESCRIPTION:

I am curious on how First Energy can cry poor mouth now. Natural gas has plummeted, electricity is now produced more and more by natural gas. We never hear First Energy saying that they will have a "rate adjustment" (reduction) when their profits go up. To expect the consumer to support a profit guarantee is absolutely ridiculous. I think more folks would support that when First Energy and the PUCO have hearings on rate reductions when their costs go down... not going to see that happen EVER!! How about in the summer when the "discounts" on electricity go away so they can gouge the consumer when they actually use electricity !! Sadly, the PUCO will give in no matter what the

consumer says, they are made up of industry insiders, pundits and investors, not elected or responsible to we the people. Every year my bill goes up and I am using less and less electricity through upgrading my home with high efficiency everything (I might add that First Energy does not PROTECT MY BANK ACCOUNT when I invest in the bulbs, appliances and upgrades necessary to conserve). I am told that "summer rates" approved by the PUCO kick in and help offset the slow times when I call First Energy. For your organization or the energy producers to even ASK OR ENTERTAIN this is absolutely insulting. They ask for profit protection, I want 401k protection, car insurance protection, savings account interest rate protection.... get the point... this is stupid to even be considered, but for some reason it has traction with you and others in Columbus. Don't you protect us in matters like this, OR DO WE JUST GO THROUGH THE MOTIONS and wait for the issue to be eclipsed by something else then slip it through?

COMMENT DESCRIPTION:

I would like for the PUCO Committee to deny the rate increase AEP is wanting for some sort of protection for ??? don't know what, but have heard increase on an average bill could be as much as \$10-\$15 per month. This concerns me for my self and other seniors that (DID NOT) get a raise on their Social Security this year. That make TWO-2 out of the last THREE-3 years we did not get a raise, but AEP did for one thing or another every year. There is very little help for the ones that need it because income level that is set pretty much has them making to much. Those people have to make a choice between- Drugs, food, rent gas, and/or electric. Many don't even own a car so they either rely on family if any live close, neighbors, friends or find money for a taxi. Please consider that the seniors are the ones that need protection against the raises AEP is always wanting PUCO to approve for them. In ending I HAVE NOT heard of any that have been declined in the last few years. If so please send me a copy of those. I would like to see them.

COMPLAINT DESCRIPTION:

Letter to Public Utilities Commission of Ohio (PUCO) I just signed the following petition addressed to: Public Utilities Commission of Ohio (PUCO). ----- Tell AEP "NO" to passing on repair costs through yet another rate hike. AEP made \$1.9 BILLION dollars in profits last year. Paying for the repairs won't hurt their bottom line, and if they were updating infrastructure the way they should, a lot of the damage could have been avoided. Customers are already burdened with extremely high electric bills and with the economy in its current state, customers can't afford to pay for repairs that are AEP's responsibility. As I hear from my employer so often, we need to do more with less. well so can they, fire some executives , out source their jobs or it's a free market. go into another line of work where they can make more. we hear it all the time maybe they should try it once ! ----- Sincerely, joseph Osborne

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

FirstEnergy should NOT have spent MILLIONS
naming a Cleveland sports stadium!!!
That did not help Ohio customers!

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility
bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and
14-1694.

Sincerely,

Ms. Adriana Miranda

COMMENT DESCRIPTION:

Regarding: Case no. 14-1297-EL-SSO First Energy rate proposal wants me to pay for their expensive plants. They fought for years to be deregulated and now don't like competing in the energy market. I buy my electric power from companies that provide it at a lower cost and they suggest I should help pay for their poor decision making. First Energy had a profit of \$578 million In 2015. Let them cut their dividend and charge their shareholders for the monies they say they need rather than everyone who buys electricity in the state. Reject FirstEnergy Corp. rate proposal. Protect the consumer of the state of Ohio.

COMMENT DESCRIPTION:

I urge you to deny the rate proposal from AEP. Year after year I look for additional ways to keep my electric bill as low as possible, both for economic reasons as well as conservation of natural resources. Despite my efforts, my electric bill rises year after year. Unfortunately, my income does NOT rise in alignment with my electric bill. I do unplug most of the 'vampire' energy users in my home, I switched to LED light bulbs, I leave only one light on at night for home security, lights are only on in the room I'm in at the time, etc. Regardless of steps I've taken, my bill has continued to increase, never showing any drop to reflect conservation on my part. The power companies have had rate increases - what have

they done with that money? Updating their infrastructure has apparently not yet been one of their priorities, but making plenty of profit beyond expenses has been.. If I knew AEP had made internal conservation efforts and decisions in the way I've had to, I might be sympathetic to their request. You have to understand that from my perspective, I've been consistently doing with less - less light, less dryer time, less blow dryer, less tv, less radio, less microwave, and so on. I don't have the option to charge my employer more per hour because my expenses go up. Maybe some of us customers could, as independent consultants, come visit the offices of the power companies, and help THEM find ways to cut costs. I am utterly appalled by a quote I read from WBNS-10tv, attributed to an AEP spokesperson, that the rate proposal "will save customers money over the length of the agreement and help stabilize rates during turbulent times". I'll be the first to make it clear I'm no genius, but I fail to understand how increasing my rate will save me money during the time one raises my rate, AND when was the last (or first) time we got a reduction in rate due to a downward fluctuation in cost of supplying energy? I don't believe we've ever gotten a rebate when their costs went down, so exactly what does that quote mean - 'stabilize rates during turbulent times'? Oh, silly me, that's a guarantee that even when their costs drop, they'll be able to charge us the same high rate so as to keep their profit consistent, because heaven forbid THEIR income ever decline a bit. All those shareholders working so hard to provide the rest of us with a constant flow of energy must be rewarded. How about those shareholders put up or shut up? They've invested in these companies, so let them now reap the result of their short-sighted plans, and make a few sacrifices to update the aging plants they've ignored until now. It's not fair nor realistic to expect that they make profit from not maintaining and modernizing their equipment, and now want to profit through increased rates to finally make those changes. Please do not approve their rate proposal.

You have before you, a request by this company AEP, for a rate increase to pay for their expenses. this is UNCALLED for!! we as citizens of this state, do not have anyone to go to to PAY OUR BILLS!!! We live on what WE make Not What someone else would GIVE to us just because we ask for it!! Tell AEP NO MORE HANDOUTS!!! Do your job for the people of this state!! Not the UTILITIES, we have to live on a fixed incomes, make them do the same. Everytime you turn around the gas, electric or water company's wants more money, and YOU give it to them!!! We need for YOU to stand up for the PEOPLE of this state this time. Do your job and tell them NO!! NOT THIS TIME!! USE YOUR

BILLIONS OF YOUR OWN PROFIT \$\$\$\$\$ and PAY YOUR OWN BILLS!!! We cant come to you and say "hey i got some work that needs to be done on my house and i need for you to give me some money so i can do it, cause i do not want to touch any of the money i have in the bank" YOU going to stand up for the citizens of this state the way you do for the utilitys of this state?? We all know the answer to that!! So do something good for the people who pay their OWN bills with the MONEY we make. Not what someone on the PUCO board decides is a GOOD IDEA for the AEP, cause they do not want to spend their Own money!! Oh No, they want more money to give a BIG FAT RAISE to their CEOs and BIG company higher ups!! AEP says WE can Save OUR Money and make OUR CUSTOMERS PAY!! So just as the saying goes "JUST SAY NO!!! Thank You and Please stick up for the little guy this time!! Robert Shultz U.S. Navy Vet '68.

COMPLAINT DESCRIPTION:

How can First Energy tell me my bill is based on 7.32 cents per KWH when my bill tells me otherwise. On the side of my bill, it says to come to your site and do an "apples to apples" comparison with the rate of 7.32. However, what First Energy does not include is their charge for the Distribution Related Component and other charges. So my bill goes from \$205.21 using 2802 KWH to \$386.76. If I would have known when comparing prices a few years ago that using that 7.32 number was misleading, I would have switched then. I believe it is your job to see First Energy put the proper pricing on their bills.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

COMMENT DESCRIPTION:

Regarding: Case 14-1297-EL-SSO First Energy Rate Increase Proposal Please vote against any proposal to increase the cost of Electricity. I am currently retired and rely on Social Security as my sole income. Due to the bankruptcy of my former employer, I receive no assistance in any way. Any increase in the cost of electricity would be a burden that would be difficult to absorb. I feel that the electric companies should manage their finances so that they are able to invest in their infrastructure resources and not put all their profits in their and investor pockets. PLEASE !! Stop any rate hikes and hold them responsible for better financial management. Thank You, for your consideration !

COMMENT DESCRIPTION:

Please do not let First Energy/Ohio Edison pay their bills on the backs of citizens. I understand that they want to add more fees to our electric bills. We pay our electric bills so they can pay their own bills. Energy companies have become money guzzlers. Why do they need to charge us for research etc? They should use their own funds and not charge the customers. Columbia Gas is doing the same thing. We pay extra fees on our bills for a riser program. Columbia Gas was the one that installed faulty risers and now we have been paying to replace these risers for several years now. When will this be paid off? Plus Columbia also has a monthly set fee that we pay all year. Even in the summer when I barely use gas just a hot water tank, I am overcharged for using just a few ccf. These Energy Companies have become money hogs.

recovery fees????? Where does everyone of the utility companies get off charging recovery fees, does this mean I can send all of the utility companies my cancer bills so I can recover my money??????? I know this is unconstitutional but everyone is afraid to speak up because they know the utility companies will just find another way to rape us. What, do you guys think your Congress????? IT NEEDS TO STOP

COMMENT DESCRIPTION:

Why is it that when I talk about First Energy I feel like I'm talking about the mob? The idea that consumers should subsidize their outdated unprofitable plants feels a bit like paying them Protection money. Deregulation was intended to create competition and drive prices down. You know, the grand "Free Market" that all public servants claim to love? Now that First Energy is on the losing end of that deal thanks to their shortsightedness, they expect us to pony up the difference and reward them handsomely with generous profits. And their justification is that these new gas powered plants may some day be more expensive to operate than their outdated coal fired and troubled nuclear plants? Have they checked out fracking lately?? Give me a break! I'll take my chances, thank you very much. What

really frosts me is how you, PUCO, the regulatory body who is supposed to represent US, gets carried around in First Energy's pockets, like so many nickels and dimes. Enough with the backroom deals, closed door meetings and non-disclosure requirements. Tell First Energy that the PEOPLE deserve better and the FREE MARKET has spoken. Or as my Grandpappy would have said "Go Pound Salt!". Thank you. Louis Appleby 440-281-6729 PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694
