Subject: Browns Stadium/Ignore utility companies' scare tactics

Dear Commissioner Johnson,

First Energy had enough money to buy the name at the Cleveland Browns Stadium be now claim that they are not making enough money and want to raise rate to customers.
That's ridiculous, they need to manage there money better.....

ALSO....

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Adrian Spears

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. It is very sad that all Corporations put the financial burden on the customers. If it means they lose .5 billion dollars to keep up their corporation, hey its the cost of doing business as business owner not the responsibility of the consumer. I mean come on all ready, your 3 billion dollar profit isn't enough as the working class Americans drown in debt as are bills are raised EVERY YEAR BUT NOT OUR SALARIES. This is exactly what happened to the economy... the rich keep taking from the not so rich to benefit themselves.

Dear Chairman Porter,

First, thank you for your service. I understand the challenges of balancing public needs, competing demands and desires from constituents, and handling the sometimes acrimonious language used by all process participants and interested voters. I am grateful for your representation and for your civil service to our community.

However, I respectfully request that you not allow AEP and FirstEnergy to charge supplemental fees to Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when, based on their own internal reports, they knew full well that they needed to modernize and adjust to upcoming legislation.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

The PUCO has been improving its positions to be more public-oriented, but far too often it fails to fulfill its obligation to the word "PUBLIC" in its name. These utility companies can't have their cake and eat it, too.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Thank you for listening and for not allowing AEP and FirstEnergy to add to our bills.

With gratitude,
Dan

Subject: Protect Ohioans from Utility Power Plays

Dear Commissioner Johnson,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

kenneth veverka

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Judy Gruetter

Subject: Please prioritize clean energy development Wind Energy and Solar Energy and Batteries!
Date: Wednesday, February 24, 2016 11:58:41 AM

Dear PUCO,

Dear Ohio Public Utilities Commission,

I was pleased to hear AEP's new plan calls for the transition of more than 1500 megawatts of generation beyond coal, and the development in the next five years of 900 megawatts of new wind and solar. I am further pleased this plan prioritizes having those new solar panel and wind turbine components built right here in Ohio.

This represents a long term breakthrough for Ohio's growing clean energy economy. What's more, the preference for creating these sustainable jobs and industry in Appalachian Ohio provides tremendous new benefits for the region. The further preference for hiring Ohio veterans helps serve those Ohioans that have already given so much and we owe not just thanks, but opportunities.

It is my hope the PUCO Commissioners will prioritize clean energy development, and hold AEP to its clean energy and coal transition commitments.

Sincerely

Dear PUCO,

Dear Ohio Public Utilities Commission,

I was pleased to hear AEP's new plan calls for the transition of more than 1500 megawatts of generation beyond coal, and the development in the next five years of 900 megawatts of new wind and solar. I am further pleased this plan prioritizes having those new solar panel and wind turbine components built right here in Ohio.

This is a good beginning of repairing the damage done by the 2014 hold on clean energy sources in Ohio .

Time and technology marches on. The clean energy costs hane dropped dramatically in just the last 5 years. Even the federal supreme Court acknowledged recently that public energy cos must act in the public interest to incentivize big energy users to reduce use during peak times (thereby reducing the need for 'standby' sources)

This represents a long term breakthrough for Ohio's growing clean energy economy. What's more, the preference for creating these sustainable jobs and industry in Appalachian Ohio provides tremendous new benefits for the region. The further preference for hiring Ohio veterans helps serve those Ohioans that have already given so much and we owe not just thanks, but opportunities.

It is my hope the PUCO Commissioners will prioritize clean energy development, and hold AEP to its clean energy and coal transition commitments.

Sincerly

Sincerely,

Susan Handa

Dear PUCO,

Dear Ohio Public Utilities Commission,

I was pleased to hear AEP's new plan calls for the transition of more than 1500 megawatts of generation beyond coal, and the development in the next five years of 900 megawatts of new wind and solar. I am further pleased this plan prioritizes having those new solar panel and wind turbine components built right here in Ohio.

This represents a long term breakthrough for Ohio's growing clean energy economy. What's more, the preference for creating these sustainable jobs and industry in Appalachian Ohio provides tremendous new benefits for the region. The further preference for hiring Ohio veterans helps serve those Ohioans that have already given so much and we owe not just thanks, but opportunities.

It is my hope the PUCO Commissioners will prioritize clean energy development, and hold AEP to its clean energy and coal transition commitments.

Sincerely

Sincerely,

Dear PUCO,

Dear Ohio Public Utilities Commission,

I was very happy to hear about AEP's new plan calls for the transition of more than 1500 megawatts of generation beyond coal, and the development in the next five years of 900 megawatts of new wind and solar. I am further pleased this plan prioritizes having those new solar panel and wind turbine components built right here in Ohio.

The AEP and FirstEnergy requests of the PUCO are totally different. Whereas FirstEnergy wants a consumer bailout to continue funding its old, dirty, and inefficient coal and nuclear plants, AEP would use the money to launch an entire new industry in renewable energy based right here in Ohio. This represents thousands of jobs that cannot be exported to other states.

What's more, the preference for creating these sustainable jobs and industry in Appalachian Ohio provides tremendous new benefits for the region. The further preference for hiring Ohio veterans helps serve those Ohioans that have already given so much and we owe not just thanks, but opportunities.

It is my hope the PUCO Commissioners will prioritize clean energy development, and hold AEP to its clean energy and coal transition commitments.

Dear PUCO,

Dear Ohio Public Utilities Commission,

I was pleased to hear AEP's new plan calls for the transition of more than 1500 megawatts of generation beyond coal, and the development in the next five years of 900 megawatts of new wind and solar. I am further pleased this plan prioritizes having those new solar panel and wind turbine components built right here in Ohio.

This represents a long term breakthrough for Ohio's growing clean energy economy. What's more, the preference for creating these sustainable jobs and industry in Appalachian Ohio provides tremendous new benefits for the region. The further preference for hiring Ohio veterans helps serve those Ohioans that have already given so much and we owe not just thanks, but opportunities.

It is my hope the PUCO Commissioners will prioritize clean energy development, and hold AEP to its clean energy and coal transition commitments.

Sincerely

Sincerely,

Patsy Deerhake

Dear PUCO,

Dear Ohio Public Utilities Commission,

I was pleased to hear AEP's new plan calls for the transition of more than 1500 megawatts of generation beyond coal, and the development in the next five years of 900 megawatts of new wind and solar. I am further pleased this plan prioritizes having those new solar panel and wind turbine components built right here in Ohio.

This represents a long term breakthrough for Ohio's growing clean energy economy. What's more, the preference for creating these sustainable jobs and industry in Appalachian Ohio provides tremendous new benefits for the region. The further preference for hiring Ohio veterans helps serve those Ohioans that have already given so much and we owe not just thanks, but opportunities.

It is my hope the PUCO Commissioners will prioritize clean energy development, and hold AEP to its clean energy and coal transition commitments.

Sincerely

Sincerely,

Mandy Fooce

For real energy independence, job creation, and making Ohio a clean safe place to live now and into the future clean renewable energy is the ONLY reasonable option. Let's all work to take fossil fuels off the table and out of our environment!

Thank you, for myself and my grandchildren!

Sincerely

Sincerely,

Clean energy makes sense in the long run. Asthma makes people sick and dirty coal energy makes more people more ill. We all can make Ohio lead the way by breathing easier using CLEAN ENERGY. Next the USA, then the world!

Dear PUCO,

I work for [PPG Industries](#), the world's largest paint and coatings company (Fortune 200), as the government affairs representative. We have eight manufacturing facilities from Cincinnati to Cleveland, and over 3,000+ high-tech manufacturing employees across the state.

Please see the attached letter in opposition to the recent PPA developments in Ohio with AEP and FirstEnergy. Please reach out to us with any questions or comments.

Thank you,
Arthur
