COMMENT DESCRIPTION:

Regarding the proposed rate hike by First Energy. PLEASE DO NOT VOTE FOR THIS INCREASE! When prices were high, they didn't offer any breaks for their consumers, they just raked in the profits! Now that tables are turned, they expect us to help them???? I DONT THINK SO! They shouldn't have gotten involved with the Energy Choice Program unless they were prepared to handle both aspects of profit and loss. Bank the profits when they are good, and spread them out when times are tight. What ever happened to common sense in business??? Thank you for you time Steve

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. Stephen Rentz

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. Bernard Grossman

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Ms. mitzi frank

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

I recently found out that I owed AEP \$282.00 that I didn't know about until I had to file bankruptcy. I live on a fixed income & there are times when I have to decide who gets paid 1st. My utilities are a top priority along with my rent. My electric bill runs \$100 per month and it is killing my food budget. If it goes \$2 higher, I'll be dining by candlelight and cooking in my fireplace. I won't be able to use my furnace or refrigerate my food.

I switched to florescent lighting to save on energy. I only purchase Energy Star appliances so if I can make the commitment to save energy why can't AEP make a commitment to their consumers too keep energy costs affordable for all.

It's all about profits and the rich getting richer by making the poor & middle class carry the financial burden of their greed.

It's downright shameful and if the PUCO allows it you are not protecting the public!

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Ms. Mary T Beausoleil

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from \$10.00 to \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. Cindy Ardner

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Puco, has been getting several riders approved for AEP, the one that upsets me the most is the fuel recovery rider, they did not bear the cost of hauling the coal independent drivers did. This was for years 2009 to 2010 and they are still getting it in 2016. AEP has over 5,000,000 consumers with a average of \$ 5.00 per customers, they have been raking in over 25,000,000 a month. That is ridiculous. Not to mention the other riders on the bill, they do not need any more riders, some on these riders need to come off.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

I have had my power turned off about 8 times for being unable to pay while on unemployment. The bill is so high now we struggle with it I hear they made a record 400 million dollars profit last year when is enough enough for the little guy weird rounding out here our economy in Ohio sucks we're dying

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from \$10.00 to \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Matt Middleton

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

It seems to be the latest scam where the utility companies get to tack on made up fees to boost their bills. People on fixed incomes shouldn't be held hostage. The more we try to conserve, the more we get it stuck up our rear. Please don't grant this increase.

Michael P. Hawkins

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

A greater problem for the utilities, unaddressed in most instances, is the issue of extended outages. Some are better than others in this respect, but the threats of shut-downs are absurd when a utility can't maintain service because it failed in its engineering and maintenance functions that allow outages that can last days and even weeks.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from \$10.00 to \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

I am not able to afford anymore on my electric bill, I am 59 husband is 65 and dying of lung cancer, I just found out that I am paying a additional 8.50 a month for uncollected rider that the PUCO put on my gas bill, I get 16.00 in food stamps, that more than half, When do the American elderly get a break.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mrs. Teresa Redmond

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from \$10.00 to \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. Stephen Ollom

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from \$10.00 to \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Dominica sanchez

we can not afford the bills as they are now a lot of us are on fixed income and right now can barley get by
we do not need this on the bills you get enough from the poor as it is
we can not even buy food because of the bills being so high

As a constituent and a consumer I feel it is time to take action.
Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from \$10.00 to \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. AEP is already taking \$5 per month to pay for THEIR loss during the 2013 derachio. Who do we charge to recoup our losses?

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. J. A. Bellman

How much more are we to be expected to pay? As a senior citizen with a critically ill husband we live on a fixed income. Do you expect us to stop taking life saving treatments to pay for someone to line their pockets and say it's for the company? I think not please do not let them have this money!!!

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

FirstEnergy, AEP and DPL want Ohio consumers to subsidize inefficient power plants with rate increases that can cost consumers from \$10.00 to \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Mr. James Oliver

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because these inefficient power plants are not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

Sincerely,

Ms. Carhleen Huey

Bad enough that in the eightys you offered a discount to electric homes and then took it away, now you get even greedier and want to raise rates by a fee to raise your income. Cut the fat folks, live within your means like we have to. Stop being bullies!

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 15-1830.

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers on March 23 and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Miss Mary Kennedy
