Public Utilities Commission of Ohio -

I urge you to switch to cleaner energy options. This will provide new jobs to Ohioans and make us an example for other States. We are leaving this world to our children. They are entitled to it in the best condition possible. We MUST clean it up before it's too late. Attached is a picture of my children, they deserve better.

Dear Sir or Madam

Regarding Case # 14-1297-EL-SSO and 14-1693-EL-SSO

I am writing today to share my concerns about your upcoming policies. My family and I care about reducing toxic pollution and saving money on our electric bills. Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. It's time for our state to become more progressive and choose cleaner types of energy. We need to lead the way in making our country a better place to live and stay for the rest of our lives; it can start right here with you and our state! A bailout of old, polluting technology only benefits utility shareholders and delays investment in efficiency and renewable energy.

A concerned Ohio citizen,

Re: Case Numbers: 14-129EL-SSO & 14-1693-EL-SSO

PUCO members,

My family and I care about reducing toxic pollution in the air and in our water systems. Look at what has happened in Flint MI and consider the pollution that will increasingly contaminate our respiratory tracts, placing life us at risk for life threatening disease processes.

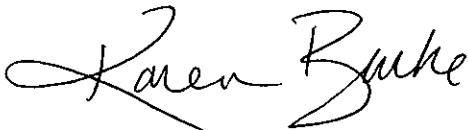

Please do not disappoint the proud citizens of OHIO any further by allowing the utility company shareholders the benefit of a bailout.

Further, do not allow for these companies to pass along a "rate increase" that will lock us consumers into buying power from old and dirty coal plants.

Your actions in favor of the bailout or allowing of the rate increase will leave OHIOANS suffering the consequences. Any decisions in favor of the bailout will have a strong impact on the outcome of the GENERAL ELECTION.

We are "OUR" voice; hear us ROAR!

Kind regards,

A handwritten signature in black ink that reads "Karen Burke". The signature is fluid and cursive, with the first name "Karen" and last name "Burke" clearly legible.

Case # 14-1297-EL-SSO

14-1693-EL-SSO

Reducing dependency on coal significantly reduces pollutions of our water and air. Our electric bills continue to rise and it is time for cleaner energy.

Public Utilities Commission of OHIO
180 East Broad Street
Columbus, OH 43215

Reference Case #'s 14-1297-EL-SSO, and 14-1693-EL-SSO

Dear Commissioners,

My family and I care about reducing toxic pollution and saving money on our electric bills, especially since I'm retired and living on a fixed income.

Reducing our dependence on coal for electricity reduces mercury, arsenic and other contaminants from polluting our drinking water from the Ohio River.

Limiting pollution to our water and air also leads to fewer deaths and sickness for everyone, inside and outside Ohio.

As the electric utility companies are lobbying for a rate increase, please deny the rate increase to lock customers into buying power from Ohio's dirtiest coal plants.

A bailout of old, polluting technology only benefits utility shareholders and delays investment in efficient equipment and renewable energy.

Also, please oppose an "indefinite freeze" of our clean energy standards.

Thank you for your consideration to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "James J. Wachter", with a long horizontal flourish extending to the right.
