Dear PUCO,

Please ~~do more~~ to help protect

our environment to preserve and protect our current and future generations.

- Improve clean air standards
- provide incentives upgrade fuel processing
- increase incentives to invest to create affordable alternate, clean, renewable energy resources

RECEIVED-PUCO MAIL ROOM
2016 MAR 25 AM 11:29

Sirs & Madams:

I write to request denial of a rate increase to First Energy.
As a senior I take the cost of power very seriously. Those on a
fixed income must cut elsewhere if costs increase.

I would also urge a transition to newer and cleaner technologies.
Toxic pollution caused by these old technologies needs to be
fazed out. How can we keep and attract people to live
in our state if conditions continue like this?

Please consider a transition to newer cleaner power.

Sincerely,

Mary Faulhaber
