Columbus OH 43215

Regarding First Energy Case # 14-1297-EL-SSO

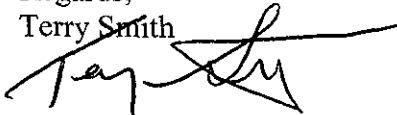

Dear Commission members:

There are several old and polluting coal fired power plants where electric companies are attempting to raise customers' rates and force them to purchase power from these plants. Rates should **NOT** be permitted to rise. It would be preferable to invest in cleaner, renewable energy sources.

We are concerned about the use of coal in old, dirty plants, as I suffer from respiratory problems and others in my family have allergies and asthma.

Thank you for considering this matter.

Regards,
Terry Smith
