CASE NO. 16-651-GA-BLN
PIR #541 VILLAGE OF DENNISON & UNION TOWNSHIP,
TUSCARAWAS COUNTY, OHIO
PIPELINE REPLACEMENT PROJECT

In its Application in the above entitled matter, under Section 4906-6-05 (B)(9)(a), Operating Characteristics, Required Structures and Right-of-Way and/or Land Requirements (page 5), Dominion East Ohio (“DEO”) indicated:

The temporary construction materials laydown areas will be necessary and will be determined after the bid has been awarded to the construction contractor.

DEO has now selected its construction contractor, Wenger Pipeline Construction (“Wenger”). Wenger has selected a laydown area that is located at 7141 Fuhr Drive SE, Denison, Ohio as shown on the map below.

CASE NO. 16-651-GA-BLN
PIR #541 VILLAGE OF DENNISON & UNION TOWNSHIP,
TUSCARAWAS COUNTY, OHIO
PIPELINE REPLACEMENT PROJECT

The land that Werner has arranged to lease temporarily from Mr. Dan Hershberger has been previously used as a pipe staging area by Wilbros Group. The laydown area can be accessed by a driveway from Fuhr Drive, SE. See the photograph below.

PIR #541 VILLAGE OF DENNISON & UNION TOWNSHIP,
TUSCARAWAS COUNTY, OHIO
PIPELINE REPLACEMENT PROJECT

Though the owner stated that there had been an environmental study several years ago, DEO requested EnviroScience to observe the site. The representative noted that there was wetland vegetation on all sides of the currently graveled area. Below is a photograph taken by the EnviroScience representative.

PIR #541 VILLAGE OF DENNISON & UNION TOWNSHIP,
TUSCARAWAS COUNTY, OHIO
PIPELINE REPLACEMENT PROJECT

He also noted that there was a stream on the east side that may include part of the roadside ditch along Fuhr Drive SE. See photo below.

PIR #541 VILLAGE OF DENNISON & UNION TOWNSHIP,
TUSCARAWAS COUNTY, OHIO
PIPELINE REPLACEMENT PROJECT

The EnviroScience environmentalist also observed a potential bat roost tree on the north corner:

He therefore recommended that the yard be limited to the currently graveled area and that Best Management Practices be applied.

Neither DEO nor Wenger plan any tree clearing, grading, agricultural impacts, and cultural resources impacts. Wenger has agreed to use only the graveled area (approximately 1.5 acres) for its staging and laydown activities, and to employ Best Management Practices.

As can be seen from the photographs, this property has already been used in a similar manner as planned by Wenger.
