As of the date of this application, Mobilitie is authorized to provide competitive local exchange, interexchange, and/or backhaul transport telecommunications services pursuant to registration, agency order, or on a deregulated basis in the following jurisdictions: Alabama, Alaska, Arizona, Arkansas, California, Connecticut, the District of Columbia, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Massachusetts, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Jersey, New York, North Carolina, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Texas, Utah, Virginia, Washington, and West Virginia. The public interest will also be served by expeditious consideration and approval of this Application. In particular, the Transaction is aimed at strengthening Mobilitie's competitive position by enabling the company to offer expanded product and service portfolios to customers. Prompt action on the Application will ensure that the public realizes these benefits as quickly as possible.

IV. CONCLUSION

For the reasons stated above, the Applicants respectfully submit that the public interest, convenience, and necessity would be furthered by the Transaction. Accordingly, the Applicants respectfully advise the Commission of their participation in the Transaction as described above.

Exhibit D

Financial Information

OH Exchange Facilities Networks operates on a customer demand basis as each customer has individual needs that vary according to the size and type of the company, each customer will have a unique build-out plan and equipment requirement. OH Exchange Facilities Networks does not plan to deploy a system until it has a customer under contract. As such, OH Exchange Facilities Networks cannot meaningfully determine its projected income, expenses, and operations until a build-out plan has been identified by a prospective customer.

The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (*i.e.*, the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.

The conversion equipment allows the Company to accept RF traffic from the Customer and then send bi-directional traffic transmission across the appropriate optical networks. At the remote end, Customer or Company provided RF-to-optical conversion equipment allows bi-directional conversion between optical signals and RF signals. RF signals can be received and transmitted at this remote node. Hence the Company provides optical transit services for RF signals.

The furnishing of RF Transport Services requires certain physical arrangements of equipment and facilities of the Company and other entities and is subject to the availability of such equipment and facilities and the economic feasibility of providing such necessary equipment and facilities and the RF Transport Services.

The specific limitations applicable to RF Transport Services are as follows:

- All optical services are provided on a single mode optical fiber.
- Some optical services may be of a multi-wavelength nature.
- Current wireless standards limit the distance between a hub site and a remote node to 20 km.
