Subject: ADDITIONAL SIGNATURES ---PETITION ATTACHED FROM BLUEWING TERRACE RESIDENTS RE: CENTRAL CORRIDOR

April 25, 2016

To: Duke Energy & The Ohio Power Siting Board

Please find attached an ADDENDUM to the petition filed yesterday from property owners on our street requesting that the Central Corridor Pipeline not be built on our street.

This will also be filed online with the OPSB public comment section on case 16-0253-GA-BTX and sent through US mail.

Your prompt consideration in this matter is sincerely appreciated.

Thanks,

Glenn Rosen

PUCO

TO: DUKE ENERGY AND OHIO POWER SITING BOARD AND PUBLIC UTILITIES
COMMISSION OF OHIO

RE: CENTRAL CORRIDOR EXTENSION PROJECT PLAN (BLUEWING TERRACE)

DATE: APRIL 2016

We, the citizens of Bluewing Terrace, Blue Ash, Ohio, petition DUKE ENERGY and THE OHIO
POWER SITTING BOARD to refrain from planning/building the extension natural gas line in our
back yards.

Several of us have a treeline in the proposed area which acts as a buffer zone between us and
apartments and other properties which will be disrupted or totally obliterated by putting in the
gas line. This will create an eyesore in our backyards, make our properties less desirable, and
will decrease our property values.

In addition, we don't want 30 inches of natural gas flowing so close to our homes for safety
reasons. Can you say with absolute certainty that this is safe and will not explode? We don't
think so based on the facts below:

**From 1994 through 2013, the U.S. had 745 serious incidents with gas distribution,
causing 278 fatalities and 1059 injuries, with $110,658,083 in property damage**

**From 1994 through 2013, there were an additional 110 serious incidents with gas
transmission, resulting in 41 fatalities, 195 injuries, and $448,900,333 in property damage.**

**From 1994 through 2013, there were an additional 941 serious incidents with gas all
system type, resulting in 363 fatalities, 1392 injuries, and $823,970,000 in property
damage**

**A recent Wall Street Journal review found that there were 1,400 pipeline spills and
accidents in the U.S. 2010-2013. According to the Journal review, four in every five
pipeline accidents are discovered by local residents, not the companies that own the
pipelines.**

The above mentioned accidents were involved with large reputable companies such as El Paso
Energy, Olympic Pipeline, P G & E, Columbia Gas, Xcel Energy, Hiland, and Viking Gas to
name few. We do not want to be added to that list.

We respectfully request that the pipeline not be built on our street.
