COMMENT DESCRIPTION:

Re: Case No. 16-253-GA-BTX My family opposes Duke Energy's current plans for the Central Corridor pipeline, specifically the "pink" line. Running what appears to be an experimental 30" diameter underground high pressure gas line through my community will not only pose an environmental risk; it will have adverse impact on the quality of life and will be a threat to overall safety. For 11 years, AmberleyVillage has been recognized by the Arbor Foundation as a "Tree City," an honor that celebrates the importance of urban tree canopy. We understand that Duke Energy will be clearing 30-50 feet of tree line for this project. This is unacceptable and not

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.

in keeping with the environmental goals and the character of our Village. In the past, when we have had power outages in our Village, we have waited longer than other neighborhoods to have our power restored; we were told by Duke operators "Your area is small and not as important. We go to the big areas first." Yes, while we are small, we are also an integral historical neighborhood whose values will not be overlooked. Until this technology is proven, we oppose this line through our Village.
